Non-Measure Data Collection Tool
Discharges 01-01-2024 (Q1 2024) through 12-31-2024 (Q4 2024)

The Centers for Medicare & Medicaid Services (CMS) provides this paper tool as an optional, informal mechanism to aid inpatient psychiatric facilities in the collection of non-measure data for the Inpatient Psychiatric Facilities Quality Reporting (IPFQR) Program. CMS will store the data you submit in the CMS Centralized Data Repository for analysis and report generation. If there are any questions or concerns regarding the use of this paper tool, please contact the IPFQR Program Support Contractor at IPFQualityReporting@hsag.com.

Total Annual Discharges

Age Strata	Total Annual Discharges
Children (≥ 1 year and < 13 years)	
Adolescent (≥ 13 years and < 18 years)	
Adult (≥ 18 years and < 65 years)	
Older Adult (≥ 65 years)	

Diagnostic Categories	Total Annual Discharges
Anxiety disorders (651)	
Delirium, dementia, and amnestic and other cognitive disorders (653)	
Mood disorders (657)	
Schizophrenia and other psychotic disorders (659)	
Alcohol-related disorders (660)	
Substance-related disorders (661)	
Other diagnosis—not included in one of the above categories	

To define the diagnostic categories above, please note the following:

- Categorization should be based on the primary diagnosis at discharge.

- To report non-measure data to CMS, IPFs must group the annual discharges based on the diagnostic categories listed in the table above. CMS created crosswalk tables of the Clinical Classifications Software (CCS) and the Clinical Classifications Software Refined (CCSR) codes developed under the Healthcare Cost and Utilization Project by the Agency for Healthcare Research and Quality as they relate to International Classification of Diseases, Tenth Revision, Clinical Modification (ICD-10-CM) codes. To determine the primary diagnostic category, see the instructions below and use the crosswalk tables found in Appendix C of the IPF Specifications Manual, Version 1.2a.

Instructions to Determine Diagnostic Category

- Identify the ICD-10-CM code for the primary diagnosis of the case in question.

- Search for the ICD-10-CM code in the appendix of this document.

  o You can search the electronic version of this document by clicking Ctrl+F and typing in the ICD-10-CM code.

- Determine the appropriate diagnostic category based on the ICD-10-CM code.

  o If the ICD-10-CM code is listed in a table in the appendix, then add "1" to the corresponding CCS code listed at the top of the table.

    ▪ Example: A patient is discharged from the IPF unit on March 10, 2024, with a primary diagnosis code of F0633. This code is in Table 3: CCS 657 – Mood Disorders. Add "1" to the Mood disorders (657) in the table on page one of this document.

  o If the ICD-10-CM code is not listed in a table in the appendix, then add "1" to the "Other diagnosis–not included in one of the above categories" row in the table on page one of this document.
