

Hospital Inpatient Quality Reporting Program Reference Guide: Entering PC-01 Data via the Hospital Quality Reporting System

This guidance is for providers in the Hospital Inpatient Quality Reporting (IQR) Program entering Perinatal Care (PC)-01 data through the Hospital Quality Reporting (HQR) System. Hospitals that do not have an obstetrics unit or do not deliver babies may submit an <u>Inpatient Prospective Payment System (IPPS) Measure Exception Form</u>. Hospitals that do not deliver babies must enter a zero (0) for each of the PC-01 data entry fields prior to each quarterly submission deadline unless they submit this form.

Note: If your hospital submitted an IPPS Measure Exception Form for PC-01 and the data are not submitted, your Provider Participation Report will continue to display "Not Submitted" for PC-01 measure submission.

- 1. In your Internet browser, navigate to <u>https://hqr.cms.gov</u>.

10. The *PC-01: Elective Delivery* screen will open. Complete the eight (three Population, one Numerator, one Denominator, and three Exclusion questions) measure questions as indicated by the red asterisk.

Helpful Tip: Make sure to allow ample time before the deadline to review and, if necessary, correct your data. Hospitals can update/correct their submitted clinical data until the Centers for Medicare & Medicaid Services (CMS) submission deadline. Immediately after that deadline the *HQR Secure Portal* will be locked. Any updates made after the submission deadline will not be reflected in the data CMS uses.
