Subject: CART-Inpatient Psychiatric Facility Quality reporting (IPFQR) Version 2.3.0 Release

We are pleased to announce the CMS Abstraction and Reporting Tool (CART)-IPFQR 2.3.0 has been released and is available on the *QualityNet* website, <http://www.qualitynet.org>.

This release contains updates to CART IPFQR 2.3.0 to support the Calendar Year 2023 abstractions. This CART version must be used for discharges and events that occur 01-01-23 through 12-31-23. IPFs are required to report IMM-2 measure data based on discharges from 10-01-22 through 03-31-23 during the summer 2023 submission; therefore, you must use this version to abstract Quarter 1 2023 (01-01-23 through 03-31-23) IMM-2 measure data. This version may also be used to abstract all IPFQR Program measures for discharges and events that occurred in Calendar Year 2022.

In addition to the CART 2.3.0 download, installation instructions, edits, and an online help guide are available for download from the *QualityNet* website. Select the **Inpatient Psychiatric Facilities** card on the home page of QualityNet. On the Inpatient Psychiatric Facilities page, select **Data Management** and then, select **CMS Abstraction & Reporting Tool (CART)** under **Data Collection**.

The CART-IPFQR version 2.3.0 can be accessed under the CART Overview page. Edits and the Online Help Guide are at the bottom of the Download Cart page under Resources.

Known issues for CART-IPFQR are located on the [QualityNet Home page](#) under the Help menu. Select the **Known Issues** link and navigate to Hospital Quality Reporting System Known Issues PDF.

If you have any questions, please notify your internal point of contact. Do not respond directly to this email.
