PCHQR Program Best Practices
Mitigating Outpatient Pain

Thursday, July 27, 2017
2 p.m. ET

Agenda: This presentation will provide participants in the PPS-Exempt Cancer Hospital Quality Reporting (PCHQR) Program an overview of pain management in the ambulatory cancer patient population, describing effective mitigation strategies to reduce this adverse event associated with the measure, Admissions and Emergency Department Visits for Patients Receiving Outpatient Chemotherapy.

Objectives
Upon completion of this event, participants will be able to perform the following:
• Explain why pain is a significant clinical concern for cancer patients
• Summarize the PCHQR Program measures related to pain management, including current performance data
• Describe effective strategies to identify, assess, and manage pain experienced by cancer patients in the outpatient setting
