Ambulatory Surgical Center Quality Reporting News Blast www.qualityreportingcenter.com

Now that the web-based measure data submission deadline has come and gone, have you ever wondered:

- Where does your data go?
- When will your data be posted for everyone to view?

Where? On [*Hospital Compare*](#).

But first, your Security Administrator will receive in their QualityNet Secure Portal inbox your ASC's *Hospital Compare* preview report in July 2019. The report will contain the data your ASC entered and will be available for approximately 30 days. This preview period is not a review and correction period; it serves as a heads-up about how your data will look when they are published on *Hospital Compare*.

When? In October 2019.

And that's a change from previous years. The data that you entered in May 2019 and the data that were pulled from claims (those Quality Data Codes you placed on your Medicare claims in 2018) will be posted on *Hospital Compare* in October. The precise date will be announced via the ListServe. The only new data not available will be for ASC-12, Facility 7-Day Risk-Standardized Hospital Visit Rate after Outpatient Colonoscopy. Your ASC will receive a facility-specific report containing that data to be published in January 2020.

For additional information, we posted a webinar about public reporting on [Quality Reporting Center](#). We are also available via phone at 866.800.8756.
