Subject: Available for Download Now: Claims-Based Measures (CBM) Specifications Manual and CBM codebooks for FY 2022

The Claims-Based Measures (CBM) Specifications Manual for fiscal year (FY) 2022 of the Inpatient Psychiatric Facility Quality Reporting (IPFQR) Program is now available for download at QualityNet's [IPFQR Measures Resources](#) page. The Centers for Medicare & Medicaid Services (CMS) updates the specifications of the IPFQR Program's claims-based measures annually to align with current clinical guidelines and code systems so that the measures remain relevant and actionable within the clinical care setting.

In previous years, codes used to calculate the three CBMs have been included in tables in the CBM Specifications Manual. This year, these codes are available in measure-specific Excel codebooks, also available for download on the [IPFQR Measures Resources](#) page.

Please direct any questions on the manual or codebooks to the [QualityNet question and answer tool](#).
