

Using Public Reporting Websites to Access IPFQR Program Data

Evette Robinson, MPH, CPHQ

Program Lead

Inpatient Psychiatric Facility Quality Reporting (IPFQR) Program

Inpatient Value, Incentives, and Quality Reporting (VIQR)

Outreach and Education Support Contractor

January 31, 2023

Purpose

This presentation describes how to access publicly reported data for the IPFQR Program.

Learning Objectives

Attendees will understand how to access publicly reported facility-, state-, and national-level data for the IPFQR Program.

Using Public Reporting Websites to Access IPFQR Program Data

Overview of Public Reporting

Overview of Public Reporting of IPFQR Program Data

Section 1886(s)(4)(E) of the Social Security Act requires the Secretary of Health and Human Services to establish procedures for publicly releasing data collected under the IPFQR Program. CMS currently publicly reports data on the [Medicare Care Compare](#) and [Provider Data Catalog](#) websites.

Overview of Public Reporting of IPFQR Program Data

Medicare Care Compare allows patients, caregivers, and families to enter their city, state, or zip code to find and compare information about the quality of care at facilities.

The screenshot displays the Medicare.gov website interface. At the top, there are navigation menus for 'Basics', 'Health & Drug Plans', and 'Providers & Services', along with 'Chat' and 'Log in' options. The main heading reads 'Find & compare providers near you.' Below this, a woman is shown holding a smartphone. A link states 'Not sure what type of provider you need? Learn more about the types of providers.' A vertical 'Feedback' button is on the right. A sidebar on the left lists provider types: Welcome, Doctors & clinicians, Hospitals, Nursing homes including rehab services, Home health services, Hospice care, Inpatient rehabilitation facilities, Long-term care hospitals, and Dialysis facilities. The main content area features a 'Welcome!' message and a paragraph explaining the tool's purpose: 'You can use this tool to find and compare different types of Medicare providers (like physicians, hospitals, nursing homes, and others). Use our maps and filters to help you identify providers that are right for you.' A 'Find out what's new' link is at the bottom right.

Overview of Public Reporting of IPFQR Program Data

The Provider Data Catalog provides direct access to CMS official data that are used on the Medicare Care Compare site. Data are available to providers in open, accessible, and machine-readable formats.

The screenshot displays the CMS.gov website interface. At the top left is the CMS.gov logo and the text "The Centers for Medicare & Medicaid Services". On the right side of the top navigation bar are links for "About Us", "Newsroom", "Data & Research", and a search icon labeled "Search". Below the navigation bar is a blue header area with a background image of two healthcare professionals. The header contains the following navigation items: "Home" (underlined), "Datasets", "Topics" (with a dropdown arrow), "About", and "What's new?" (with a dropdown arrow). The main heading in the header reads "Explore & download Medicare provider data". Below this heading is a white search input field with the placeholder text "Type search term here..." and a rounded "SEARCH" button with a right-pointing arrow. At the bottom of the header area, there is a link: "Looking to compare healthcare providers and services? Find a health care provider on Medicare.gov >".

Using Public Reporting Websites to Access IPFQR Program Data

Accessing IPFQR Program Measure Data on Medicare Care Compare

Accessing IPFQR Program Data on Medicare Care Compare

1. Go to <https://www.medicare.gov/care-compare/> to access the Medicare Care Compare web page for hospitals.

Medicare.gov Basics Health & Drug Plans Providers & Services Chat Log in

Find & compare providers near you.

Not sure what type of provider you need?
[Learn more about the types of providers.](#)

- Welcome
- Doctors & clinicians
- Hospitals
- Nursing homes including rehab services
- Home health services
- Hospice care
- Inpatient rehabilitation facilities
- Long-term care hospitals
- Dialysis facilities

Welcome!

You can use this tool to find and compare different types of Medicare providers (like physicians, hospitals, nursing homes, and others). Use our maps and filters to help you identify providers that are right for you.

Feedback

Accessing IPFQR Program Data on Medicare Care Compare

2. To view publicly reported data at IPFs, select **Hospitals** in the left menu. Enter information in the MY LOCATION field to locate providers near a specific address or zip code.

The screenshot displays the Medicare Care Compare interface. On the left, a vertical menu lists various care settings: Welcome, Doctors & clinicians, **Hospitals** (highlighted with a red box), Nursing homes including rehab services, Home health services, Hospice care, and Inpatient rehabilitation facilities. The main content area is titled 'Find hospitals near me' and includes a descriptive paragraph about the data. Below this, there is a section for 'ambulatory surgical centers (ASC)' with a link to 'Visit the ASC data on CMS.gov'. A search section titled 'MY LOCATION' (highlighted with a red box) contains two input fields: 'Street, ZIP code, city, or state' and 'Use my current location', both with location icons. To the right of this section is a field for 'NAME & TYPE (optional)' with the placeholder text 'Facility name or type'. At the bottom of the search section is a link for 'Show past search results'.

Accessing IPFQR Program Data on Medicare Care Compare

3. On the next web page, select up to three providers by clicking the Compare button. 
4. Once selections are complete, click the Compare button to the right of the selections in the blue bar near the top of the page.

Accessing IPFQR Program Data on Medicare Care Compare

5. The next page will display the selected hospitals in a row at the top and default to the Overview tab. Click on the Psychiatric Unit Services tab to compare IPFQR Program measure results between the selected facilities.

Accessing IPFQR Program Data in the Provider Data Catalog

4. The next page includes a menu of topics on the left side. On the right side, you will find a brief description of the IPFQR Program, hyperlinks that align with the menu items on the left side, a series of quality measure tables, a description, and the reason it is important.

The screenshot shows a web interface with a left-hand navigation menu and a main content area. The menu items include: Psychiatric unit services (selected), Preventive care and screening, Healthcare Personnel Vaccination, Substance use treatment, Patient safety, Follow-up care, Unplanned readmissions, Which patients are included, Where the information comes from, Risk adjustment, Significance testing, IPF performance categories, Additional information, Survey of patients' experiences (HCAHPS), and Timely & effective care. The main content area is titled 'Psychiatric unit services' and contains a paragraph describing the IPFQR Program, a bulleted list of hyperlinks corresponding to the menu items, and a 'Back to top' button.

Psychiatric unit services

The Inpatient Psychiatric Facility Quality Reporting (IPFQR) Program provides consumers with quality of care information to make informed decisions about options for inpatient psychiatric care. To meet the IPFQR Program requirements, eligible inpatient psychiatric facilities (IPFs), which include psychiatric hospitals and psychiatric units, are required to submit to the Centers for Medicare & Medicaid Services (CMS) data on quality measures specified by CMS. If the IPF doesn't meet program requirements for that fiscal year, CMS reduces the annual update otherwise applicable to an IPF for a fiscal year by 2 percentage points. The quality data that IPFs must submit address these topics:

- [Preventive care and screening](#)
- [Substance use treatment](#)
- [Patient safety](#)
- [Follow-up care](#)
- [Unplanned readmissions](#)

These quality measures show how often or how quickly inpatient psychiatric facilities that are eligible for the IPFQR Program give recommended treatments and services known to get the best results for people with mental health conditions, substance abuse, and other health conditions. Some measures also describe whether these facilities have certain processes and procedures in place. This information can help you compare the quality of the care inpatient psychiatric units provide to patients.

- [Which patients are included](#)
- [Where the information comes from](#)
- [Risk adjustment](#)

Accessing IPFQR Program Data in the Provider Data Catalog

Below the introductory portion of the web page is a table that groups the IPFQR Program measures by category, describes each quality measure, what it is, and why it matters.

Accessing IPFQR Program Data in the Provider Data Catalog

Healthcare Personnel Vaccination

Quality measure	What is this and why is it important?
<p>COVID-19 Vaccination Coverage Among Healthcare Personnel (HCP)</p> <p>Higher percentages are better</p>	<ul style="list-style-type: none">• CMS believes it is important to incentivize and track HCP vaccination in inpatient psychiatric facilities (IPFs) through quality measurement to protect health care workers, patients, and caregivers, and to help sustain the ability of hospitals to continue serving their communities throughout the Public Health Emergency (PHE) and beyond.• The measure will assess the proportion of an IPF's health care workforce that is vaccinated against COVID-19.• This quarterly measure identifies the percent of healthcare personnel who completed COVID-19 primary vaccination series.

Accessing IPFQR Program Data in the Provider Data Catalog

Which patients are included

Measures in the IPFQR Program apply to all patients treated in a psychiatric hospital or psychiatric unit. This includes Medicare beneficiaries enrolled in Original Medicare (traditional fee-for-service Medicare) and non-Medicare patients. The measures that CMS calculates using Medicare claims (which includes several measures of follow-up care) include only patients enrolled in Original Medicare.

Where the information comes from

- Data for most measures reported for IPFs come from patient medical records. IPFs calculate results and submit the facility-level data for eligible patients to CMS through a web-based form. When submitting the data, IPFs must acknowledge that all of the information submitted is complete and accurate to the best of their knowledge.
- CMS calculates some measures of follow-up care using both Medicare claims and other data. Using claims and other data makes it possible to calculate rates of unplanned hospital visits after discharge (readmissions) and follow-up care from an outpatient mental health provider after discharge, without having to review medical charts or requiring IPFs to report additional information.

Accessing IPFQR Program Data in the Provider Data Catalog

Risk adjustment

To accurately compare IPF performance, the unplanned readmission measure adjusts for patient characteristics that may make readmission more likely. These characteristics include the patient's age, past medical history, and other diseases or conditions the patient had when they were admitted that are known to increase the patient's chance of returning to the IPF.

Significance testing

The statistical model used to calculate the unplanned readmission after leaving the IPF provides interval estimates for each IPF's results. The upper and lower boundaries of an interval estimate represents a range in which there is 95% certainty of where the true results lie.

Accessing IPFQR Program Data in the Provider Data Catalog

IPF performance categories

The measure evaluating unplanned readmission after leaving the IPF assigns IPF results to performance categories. To assign readmission performance categories, the IPF's interval estimate is compared to the national rate of readmissions. The table below describes the performance categories and classification criteria in detail:

Category	Better than the national rate	No different than the national rate	Worse than the national rate	The number of cases is too small
Criterion	The entire 95% interval estimate surrounding the hospital's rate is lower than the national rate.	The 95% interval estimate surrounding the hospital's rate includes the national rate.	The entire 95% interval estimate surrounding the hospital's rate is higher than the national rate.	Fewer than 25 cases

Additional information

- [Learn more about the Inpatient Psychiatric Facility Quality Reporting Program](#) .
- For more details on the IPF measures, please refer to the IPFQR program guide, manual and specifications documents located on [QualityNet](#) .

A Deeper Dive into the Provider Data Catalog

Refer to page 7 of [*Inpatient Psychiatric Facility Quality Reporting Program: Accessing Publicly Reported Data*](#) for step-by-step instructions to view the numerator, denominator, and rate or percentage values of a measure(s) reported to the IPFQR Program by CMS Certification Number (CCN).

The instructions review the data set by facility, but the instructions are also applicable to the state- and national-level data tables.

A Deeper Dive into the Provider Data Catalog

View Facility-Level IPFQR Program Data

Listed below are instructions to view the numerator, denominator, and rate or percentage values of a measure(s) reported to the IPFQR Program by a specific IPF by CMS Certification Number (CCN). The following instructions describe ways to review the data set in Microsoft Excel by facility; however, these instructions are also applicable for the state- and national-level data tables.

1. Follow instructions listed above to download the dataset as a CSV or CSV for Excel file.
2. Open the file from Microsoft Excel. At this point, you may choose to save the file as a Microsoft Excel file using the naming convention of your choice.
3. Add filters to columns.
 - a) Select columns all the way across from column A through the last column of data that you wish to review.
 - b) Click the Sort & Filter button in the top Home menu.
 - c) Select Filter.
4. View data for one or more specific IPFs, preserving all original data in the file.
 - a) Click on the filter down arrow for Column A. A list of all CCNs will appear.
 - b) Deselect the checkbox next to Select All.
 - c) Click on the checkbox next to the CCN(s) of the IPF(s) you wish to view.
 - d) Click OK and only data for the selected CCN(s) will appear. To view all data for all CCNs, go back to the filter for Column A and select the checkbox next to Select All.
5. View data for one or more specific IPFs, removing data for other facilities from the file.
 - a) Right-click on the tab of the original data file.
 - b) Select Move or Copy.
 - c) Click on the checkbox next to Create a Copy and click OK.
 - d) Click on the filter down arrow for Column A in the copy version of the spreadsheet. A list of all CCNs will appear.
 - e) Deselect the checkbox next to the CCN(s) of the IPF(s) you wish to keep
 - f) Click OK.
 - g) Highlight from Row 2 down to the last CCN listed in the file.
 - h) Right click and select Delete Row.
 - i) Click on the filter for Column and select the checkbox next to Select All to review the data for the remaining IPF(s) selected in step 5e.
6. View data for only one measure for providers in State X.
 - a) Click on the filter in column E.
 - b) Deselect State X.
 - c) Highlight rows 2 through last row of data.
 - d) Right click and select Delete Row.
 - e) Click on the filter in column E.
 - f) Select State X.

A Deeper Dive into the Provider Data Catalog

To access data reported to the IPFQR Program:

1. Go to the Provider Data Catalog Hospitals Data Archive web page, which groups files by year:

<https://data.cms.gov/provider-data/archived-data/hospitals>

The screenshot shows the CMS.gov website with the 'Hospitals data archive' page. The page is titled 'Hospitals data archive' and has a 'View topic >' link. It lists annual files for 2022 and 2021. The 2022 section is expanded, showing four files: 'hospitals_10_2022.zip' (10/26/2022, ZIP, 14 MB), 'hospitals_07_2022.zip' (07/27/2022, ZIP, 13 MB), 'hospitals_04_2022.zip' (04/27/2022, ZIP, 14 MB), and 'hospitals_01_2022.zip' (01/26/2022, ZIP, 14 MB). The 2021 section is also expanded, showing four files: 'hospitals_10_2021.zip' (10/27/2021, ZIP, 15 MB), 'hospitals_07_2021.zip' (07/21/2021, ZIP, 14 MB), 'hospitals_04_2021.zip' (04/28/2021, ZIP, 15 MB), and 'hospitals_03_2021.zip' (03/01/2021, ZIP, 14 MB). There are 'Download all' links for each year's files.

The screenshot shows the 'Hospitals data archive' page with a list of annual files from 2022 down to 2016. Each year has a 'Download all' link. The 2022 section is expanded, showing four files: 'hospitals_10_2022.zip' (10/26/2022, ZIP, 14 MB), 'hospitals_07_2022.zip' (07/27/2022, ZIP, 13 MB), 'hospitals_04_2022.zip' (04/27/2022, ZIP, 14 MB), and 'hospitals_01_2022.zip' (01/26/2022, ZIP, 14 MB). The 2021 section is also expanded, showing four files: 'hospitals_10_2021.zip' (10/27/2021, ZIP, 15 MB), 'hospitals_07_2021.zip' (07/21/2021, ZIP, 14 MB), 'hospitals_04_2021.zip' (04/28/2021, ZIP, 15 MB), and 'hospitals_03_2021.zip' (03/01/2021, ZIP, 14 MB). There are 'Download all' links for each year's files.

A Deeper Dive into the Provider Data Catalog

2. Select the zip file of choice for download.

- The public reporting websites are usually refreshed on a quarterly basis, as is reflected in the naming convention of the zip files:
hospitals_MM_YYYY
- The most current zip file for a given year is at the top of the list.
- Each zip file contains CSV files for all data reported to CMS.

The screenshot displays the CMS.gov website interface for the 'Hospitals data archive'. The page is titled 'Hospitals data archive' and includes a 'View topic >' link. It features two main sections: '2022 Annual files' and '2021 Annual files'. Each section has a 'Download all' link and a list of individual zip files with their respective dates and sizes.

Year	File Name	Date	Format	Size
2022	hospitals_10_2022.zip	10/26/2022	ZIP	14 MB
	hospitals_07_2022.zip	07/27/2022	ZIP	13 MB
	hospitals_04_2022.zip	04/27/2022	ZIP	14 MB
	hospitals_01_2022.zip	01/26/2022	ZIP	14 MB
2021	hospitals_10_2021.zip	10/27/2021	ZIP	15 MB
	hospitals_07_2021.zip	07/21/2021	ZIP	14 MB
	hospitals_04_2021.zip	04/28/2021	ZIP	15 MB
