# **IPFQR Program: Review of ISRs for CBMs**

**Megan Keenan, MPH**

**Executive Director**

**Inpatient Psychiatric Facility (IPF) Measure Development Contract  
Health Services Advisory Group (HSAG)**

**December 12, 2018**

# Introduction

Starting in Fiscal Year (FY) 2019, CMS is providing facilities with reports for their Inpatient Psychiatric Facility Quality Reporting (IPFQR) Program claims-based measures (CBMs) prior to public reporting.

- IPF-Specific Reports (ISRs) are confidential and allow facilities to preview results before results are made public.
- ISRs provide additional information to facilities that is not available to the public to help inform quality improvement activities.

# IPFQR Program FY 2019 CBMs

- Follow-Up After Hospitalization for Mental Illness (FUH)
  - Added to the IPFQR Program in the federal rule published August 19, 2013 and first publicly reported in December 2016
  - FY 2019 public reporting:
    - Version 2.0
    - Performance period: July 1, 2016–June 30, 2017
- 30-Day All-Cause Unplanned Readmission Following Psychiatric Hospitalization in an Inpatient Psychiatric Facility (IPF Readmission)
  - Added to the IPFQR Program in the federal rule published August 22, 2016 and first publicly reported in February 2019
  - Dry run conducted in October 2017
  - FY 2019 public reporting:
    - Version 1.2
    - Performance period: July 1, 2015–June 30, 2017

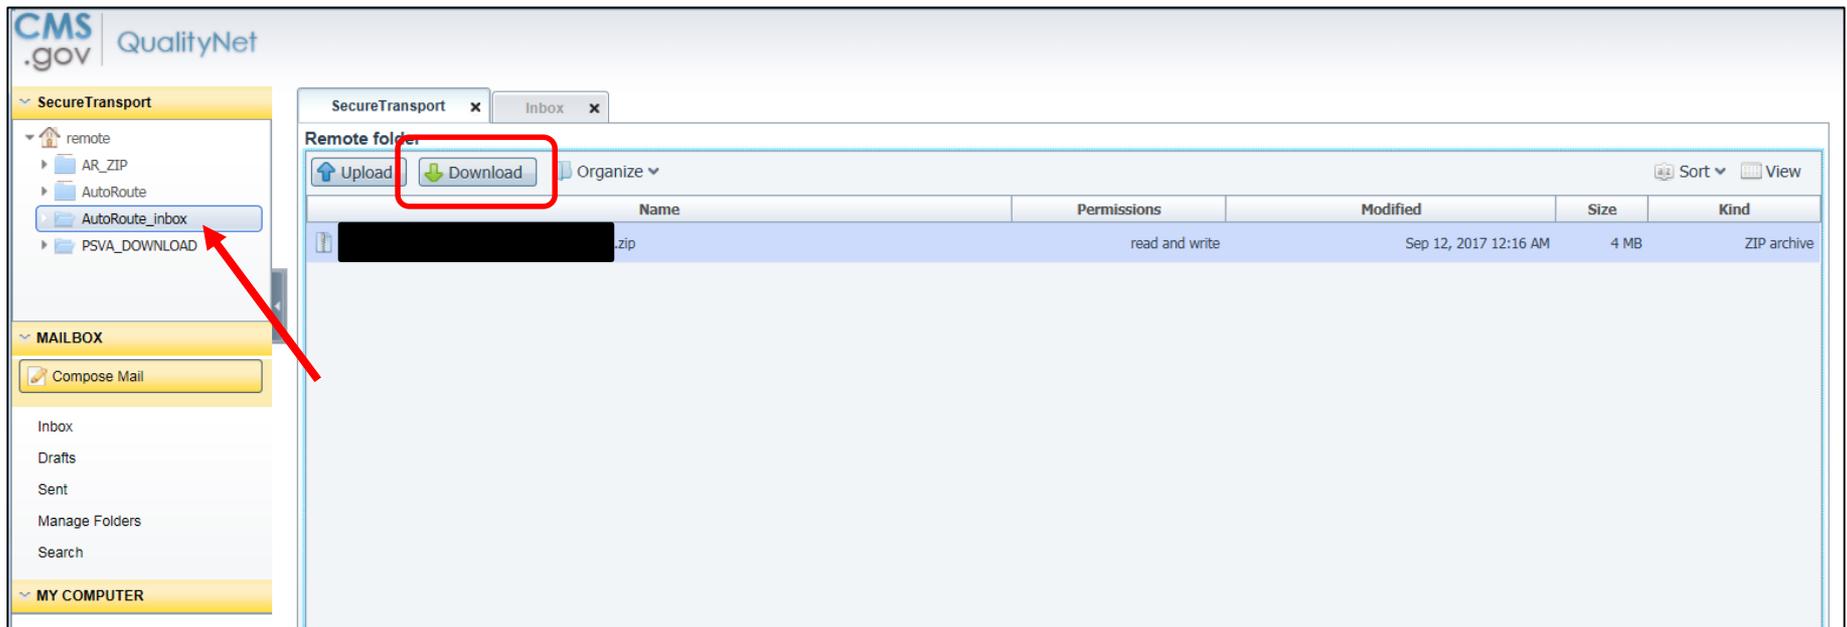

# Purpose of Presentation

During this presentation, participants will learn the following:

- Ways to access ISRs and supporting documents
- Ways to use FUH and IPF Readmission measure ISRs

# Accessing Your ISRs

Facilities can download their confidential results through the *QualityNet Secure Portal* AutoRoute\_inbox.

The screenshot displays the QualityNet Secure Portal interface. On the left, a navigation pane shows the folder structure under 'SecureTransport', with 'AutoRoute\_inbox' selected and highlighted in blue. A red arrow points from this folder to the main content area. The main area shows a 'Remote folder' view with a table of files. A red box highlights the 'Download' button above the table. The table contains one entry: a file named '[REDACTED].zip' with a size of 4 MB and a modified date of Sep 12, 2017 12:16 AM.

Name	Permissions	Modified	Size	Kind
[REDACTED].zip	read and write	Sep 12, 2017 12:16 AM	4 MB	ZIP archive

## **ISRs for FUH Measure, Version 2.0**

# Measure Overview

- The goal of the measure is to improve follow-up rates and reduce variation between facilities.
- There are effective strategies that inpatient facilities have used to improve follow-up rates among psychiatric patients.
  - Communicating discharge plan to patients, caregivers, and other healthcare providers
  - Establishing contact with outpatient provider prior to discharge
  - Discussing potential barriers with the patient
  - Providing letter or telephone reminders
  - Acting as a resource for questions or concerns between discharge and first outpatient appointment

# Facility Results

Results are provided in an ISR that consists of five worksheets:

1. Summary
2. Publicly Reported
3. Distribution of Rates
4. Patient Characteristics
5. Discharge-Level Data

# Worksheet 1: Summary

- The summary worksheet provides general information on the measure, links to resources, and information on your facility.
