

# Welcome!

- Audio for this event is available via GlobalMeet® Internet streaming.
- Connect via Chrome.
- No telephone line is required.
- Computer speakers or headphones are necessary to listen to streaming audio.
- Limited dial-in lines are available. Please request a dial-in line via the “Ask a Question” box.
- This event is being recorded.

# Troubleshooting Audio

Audio from computer  
speakers breaking up?

Audio suddenly stop?

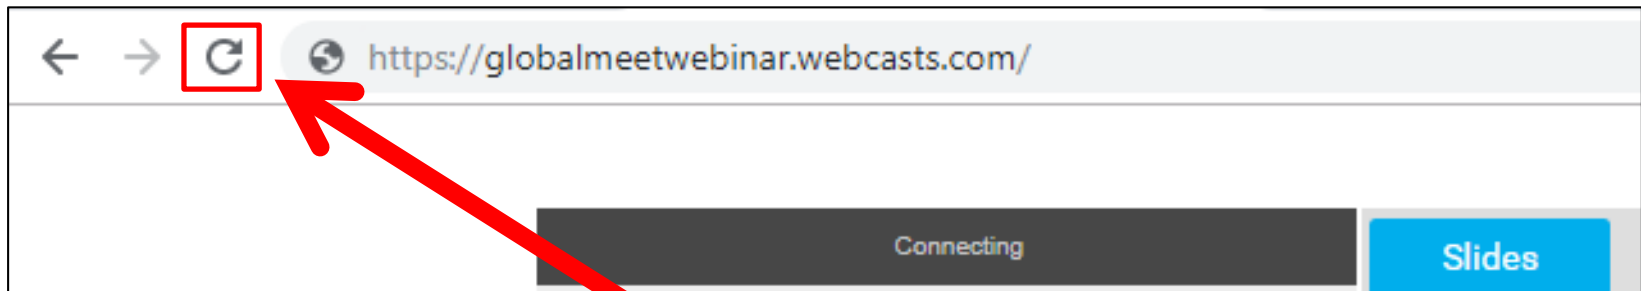

Click Refresh

– or –

Press F5

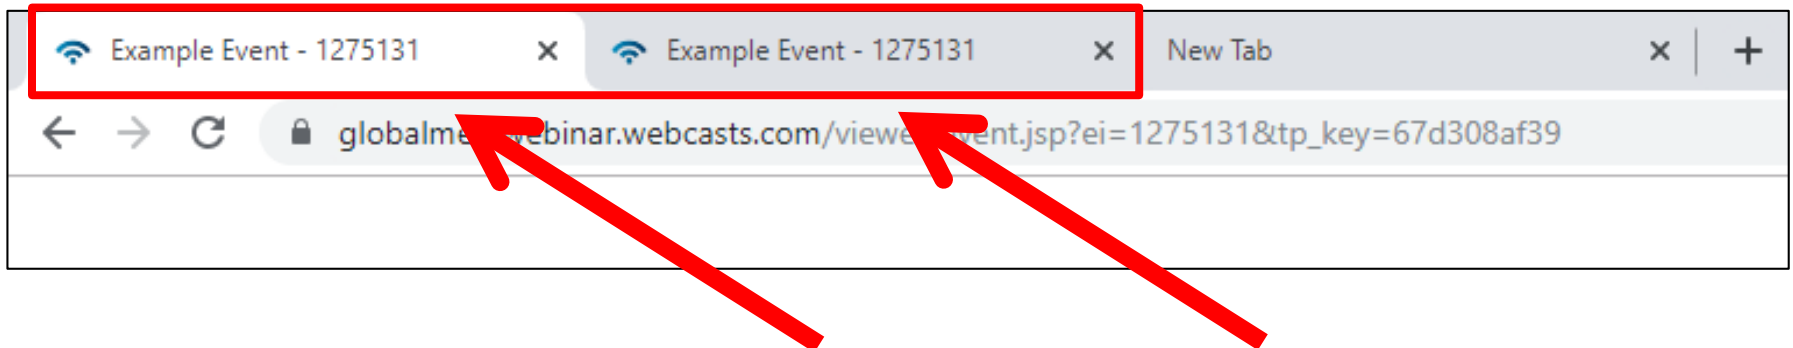

F5 Key  
Top Row of Keyboard

Refresh

# Troubleshooting Echo

- Hear a bad echo on the call?
- Echo is caused by multiple browsers/tabs open to a single event (multiple audio feeds).
- Close all but one browser/tab and the echo will clear.

**Example of Two Browsers/Tabs Open in Same Event**

# Submitting Questions

Type questions in the “Ask a Question” section, located on the left-hand side of your screen.

**Inpatient Value, Incentives, and Quality  
Reporting (VIQR) Outreach and Education  
Support Contractor**

A screenshot of a live chat interface. At the top, there is a black bar with a pause icon, a refresh icon, the word "Live", and a speaker icon. Below this is a blue header with a downward arrow and the text "Ask a Question". Under the header is a text input field with the placeholder text "Ask a Question". At the bottom left of the input field is a grey button with the text "Send". The entire "Ask a Question" section is highlighted with a red rectangular border.

**Today's Presentation**

# **Measure Collaboration Workspace Webinar Series: Measure Collaboration Workspace and eCQM Flows and Clinical Flow Prototype**

---

**Artrina Sturges, EdD**

Alignment of Electronic Clinical Quality Measures (eCQMs) Lead  
Inpatient Value, Incentives, and Quality Reporting (VIQR)  
Outreach and Education Support Contractor

**July 29, 2020**

# Purpose

This presentation, the second of three Measure Collaboration Workspace Series sessions, highlights the tools supporting the electronic clinical quality improvement activities for Eligible Hospitals (EHs), Critical Access Hospitals (CAHs), Eligible Professionals, and Eligible Clinicians reporting eCQMs for Centers for Medicare & Medicaid Services (CMS) quality programs.

# Objectives

Participants will be able to:

- Understand the purpose of the Measure Collaboration (MC) Workspace, its components, and use of the tool.
- Share feedback on clinical workflow and data capture with measure developers for measures under development.
- Describe the purpose of eCQM flows and ways they can improve understanding and implementation of eCQMs.

# Webinar Chat Questions

Please submit any questions that are pertinent to the webinar topic via the Chat tool. As time permits, we will answer these questions at the end of the webinar. Pertinent questions not answered will be addressed in a questions-and-answers document, to be published later.

**Note:** As a reminder, we do not use the raised-hand feature in the Chat tool during webinars.

If you have an additional question after this event, submit your question through the [QualityNet](#) Inpatient Questions and Answers tool, at [QualityNet Q&A Tool](#). Include the webinar name, slide number, and speaker name.

If you have a question unrelated to the current webinar topic, we recommend that you first search for it in the [QualityNet](#) Inpatient Questions and Answers tool, at [QualityNet Q&A Tool](#). If you do not find an answer, then submit your question to us via the same tool.

We will respond to questions as soon as possible.

# Presenters

- Debbie Krauss, MS, RN, Nurse  
Center for Clinical Standards and Quality (CCSQ), CMS
- Bridget Blake, MBA, Principal Systems Engineer, MITRE
- Rose Almonte, MS, RN, Principal Clinical Informatics, MITRE
- Claudia Hall, DNP, RN, Clinical Program Lead, Mathematica

## **Measure Collaboration Workspace**

# Measure Collaboration (MC) Workspace

- Hosted on the eCQI Resource Center (<https://ecqi.healthit.gov/>)
- Contains a set of interconnected resources, tools, and processes for eCQMs
- Promotes transparency and better interaction across stakeholder communities interested in developing and implementing more harmonized, accurate, and meaningful eCQMs
- Provides access to the eCQM Data Element Repository, an online, searchable tool that provides all the data elements associated with eCQMs used in CMS Quality Reporting Programs

# How to Access the MC Workspace

The screenshot shows the eCQI Resource Center website. The browser address bar displays [ecqi.healthit.gov](http://ecqi.healthit.gov). The eCQI Resource Center logo is in the top left. The navigation menu in the top right includes: eCQMs (Electronic Clinical Quality Measures), Resources (Standards, Tools, & Resources), About (eCQI, CDS, FAQs, Engage), and My account (Manage Your Account). A search bar with the placeholder text "Enter keywords" is also present. A red box highlights the "eCQMs" link in the navigation menu. Below this, a dropdown menu is visible with two main sections: "EP/EC ECQMS" and "EH/CAH ECQMS". The "EP/EC ECQMS" section lists "Eligible Professional / Eligible Clinician eCQMs", "Pre-Rulemaking eCQMs", and "Hybrid Measures". The "EH/CAH ECQMS" section lists "Eligible Hospital / Critical Access Hospital eCQMs", "Pre-Rulemaking eCQMs", and "Hybrid Measures". A red box highlights the "MEASURE COLLABORATION" link in the dropdown menu. Below the navigation menu, a large blue banner features the text "Updated eQMs and Implementation Resources for 2021 Reporting Now Available" and two orange buttons: "Eligible Professional/Clinician" and "Eligible Hospital/CAH". Below the banner, a section titled "Featured Resources" displays three icons: a stethoscope, a hospital building, and a graduation cap.

MC Workspace

## Measure Collaboration (MC) Workspace

[About](#)[eCQM Concepts](#)[eCQM Clinical Workflows](#)[eCQM Test Results](#)[eCQM Data Element Repository](#)

### New Electronic Clinical Quality Measure (eCQM) Clinical Workflow

The New eCQM Clinical Workflow module allows users to review measure flow and clinical context for CMS measures under development. This allows for stakeholders interested in a measure to provide comments, clinical workflow concerns, and guidance early in the measure development lifecycle. Browse the measures under development for areas of interest for your organization, review the supporting documentation, and share comments to help achieve feasible clinical workflows.

### How to review clinical workflows for measures and submit feedback

1. Search the eCQMs to find your eCQM of interest.
2. Click the title of the eCQM to view the measure details for relevance to your patient population.
3. Scroll to the review workflow descriptions and workflow files based on your organization's processes.
4. Enter feedback on proposed data flow and/or workflow in the comment field for measure developer consideration. Comments will be publicly visible.

### Post eCQM Clinical Workflow

Sign in as an MC Workspace member to submit a New eCQM Clinical Workflow entry.

Create new account >

Already have an eCQI RC account? [Sign in](#)

# New eCQM Clinical Workflow Demo

<https://ecqi.healthit.gov/mc-workspace-2/ecqm-clinical-workflows>

- Access the New eCQM Clinical Workflow module.
- Search existing measures.
- Review measure information and download sample workflows.
- Annotate workflow with feedback.
- Upload documentation and share feedback with measure developer.

# eCQM Test Results

- Review data elements proposed for a measure.
- Share data element feasibility based on your organization's workflows for measure developer consideration.
- Express interest in participating in measure testing activities.

 MC Workspace

## Measure Collaboration (MC) Workspace

[About](#)[eCQM Concepts](#)[eCQM Clinical Workflows](#)[eCQM Test Results](#)[eCQM Data Element Repository](#)

### Electronic Clinical Quality Measure (eCQM) Test Results

The eCQM Test Results module allows users to participate in eCQM testing by providing proposed eCQMs for testing, submitting test results using a template, and viewing test results. Measure developers use testing to assess measure feasibility and determine the extent to which the required data elements are available and retrievable in the electronic health record and the extent to which they can be implemented without undue burden for performance measurement. The draft test results offer transparency into the feasibility.

### How to review data elements for measures and submit feedback

1. Search the eCQMs to find your eCQM of interest.
2. Click the title of the eCQM to view the measure details for relevance to your patient population.
3. Scroll to the Data Element Feasibility Testing template to download and complete it based on data element feasibility assessment for your organization.
4. Upload the completed template and click submit to send those results to the measure developer. The submitted test results will be accessible by the respective measure developer. They will not be publicly available.
5. Enter additional comments in the comment field. Comments will be publicly visible.

### Post eCQM Testing Template

Sign in as an MC Workspace member to submit an eCQM Test Results entry.

# eCQM Test Results Demo

<https://ecqi.healthit.gov/mc-workspace-2/ecqm-test-results>

- Access the eCQM Test Results module.
- Search existing measures.
- Review measure information and download data element feasibility spreadsheet.
- Update data element feasibility spreadsheet.
- Upload documentation and share feedback with measure developer.

Claudia Hall, DNP, RN, Clinical Program Lead, Mathematica

---

## **Eligible Hospital (EH) and Critical Access Hospital (CAH) eCQM Flows and Clinical Flows**

# EH eCQM Flows

The eCQM flows supplement eCQM specifications for EHs and CAHs for the following programs:

- Hospital Inpatient Quality Reporting (IQR) Program
- Medicaid Promoting Interoperability Program for Eligible Hospitals and Critical Access Hospitals
- Medicare Promoting Interoperability Program for Eligible Hospitals and Critical Access Hospitals

CMS publishes the EH and CAH eCQM flows to the [eCQI Resource Center](#).

# What is the purpose of the eCQM flows?

- The eCQM flows are designed to assist in interpretation of the eCQM logic and calculation methodology for reporting rates. They provide an overview of each of the population criteria components and associated data elements that lead to inclusion in or exclusions from the eCQM's quality action (numerator).
- The flows are intended to be used as an additional resource when implementing eCQMs and should not be used in place of the eCQM specification or for reporting purposes.
- A “Read Me First” guide to understanding the flows is also available to assist users as they navigate the flows. The guide can be found on the [eCQI Resource Center](#) website within the eCQM Flows zip file.

Claudia Hall, DNP, RN, Clinical Program Lead, Mathematica

## Measure Flow Diagram\* (continued)

### Median Admit Decision Time to ED Departure Time for Admitted Patients (ED-2)

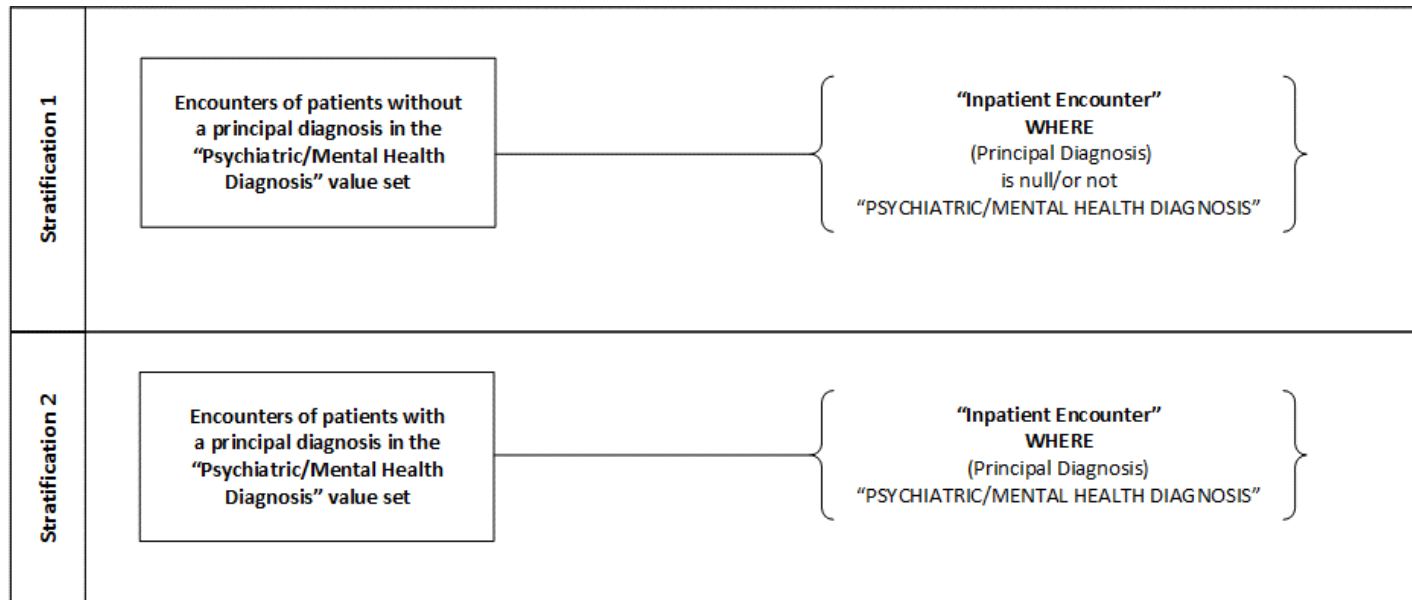

\*This flow diagram represents an overview of population criteria requirements. Please refer to the eCQM measure specification for a complete list of definitions, direct reference codes, data or timing elements included in this measure and required for submission.

# 2020 eCQM Flow – CMS111v8

## Measure Flow Diagram\* (continued)

### Median Admit Decision Time to ED Departure Time for Admitted Patients (ED-2)

Sample Calculation
<p>Measure Observation = median time (minutes) (ED facility location departure time - decision to admit time) = 75 Minutes</p> <p>Each population in the measure definition should be reported both without stratification and by each stratification criteria.</p>

\*This flow diagram represents an overview of population criteria requirements. Please refer to the eCQM measure specification for a complete list of definitions, direct reference codes, data or timing elements included in this measure and required for submission.

# 2020 eCQM Flow – CMS111v8

## Measure Flow Narrative\*

### Median Admit Decision Time to ED Departure Time for Admitted Patients (ED-2)

<b>Measure Description</b>	This measure assesses the median time (in minutes) from admit decision time to time of departure from the emergency department for emergency department patients admitted to inpatient status
<b>Initial Population</b>	<p>Start by identifying:</p> <ul style="list-style-type: none"> <li>• Inpatient encounters ending during the measurement period with length of stay (Discharge Date minus Admission Date) less than or equal to 120 days</li> <li>• Where the decision to admit was made during the preceding ED visit at the same physical facility unless the ED and admitting hospital share the same CCN</li> </ul>
<b>Denominator</b>	The measure population criteria is the same as the initial population
<b>Measure Population Exclusion</b>	The measure population exclusions criteria identify a subset of the measure population by excluding emergency department encounters with an admission source from another “Hospital Setting” (any different facility, even if part of the same hospital system) resulting in an inpatient stay

The measure flow diagram on the preceding pages illustrates the steps to determine the population criteria for this measure.

\*This flow diagram represents an overview of population criteria requirements. Please refer to the eCQM measure specification for a complete list of definitions, direct reference codes, data or timing elements included in this measure and required for submission.

# 2020 eCQM Flow – CMS111v8\*

## Measure Flow Narrative (continued)

### Median Admit Decision Time to ED Departure Time for Admitted Patients (ED-2)

<b>Measure Observation</b>	The measure observations criteria identify the encounters from the measure population (that did not meet the measure population exclusions criteria) and calculates the time (in minutes) of the interval between the decision to admit and the ED departure time for patients admitted to the inpatient facility from the emergency department
<b>Stratification 1</b>	Stratification 1 is an aggregate of all patients seen in the ED and admitted as an inpatient who DO NOT have an inpatient encounter principal diagnosis consistent with psychiatric/mental health disorders
<b>Stratification 2</b>	Stratification 2 is an aggregate of all patients seen in the ED and admitted as an inpatient who DO have an inpatient encounter principal diagnosis consistent with psychiatric/mental health disorders

The measure flow diagram on the preceding pages illustrates the steps to determine the population criteria for this measure.

\*This flow diagram represents an overview of population criteria requirements. Please refer to the eCQM measure specification for a complete list of definitions, direct reference codes, data or timing elements included in this measure and required for submission.

# Questions?

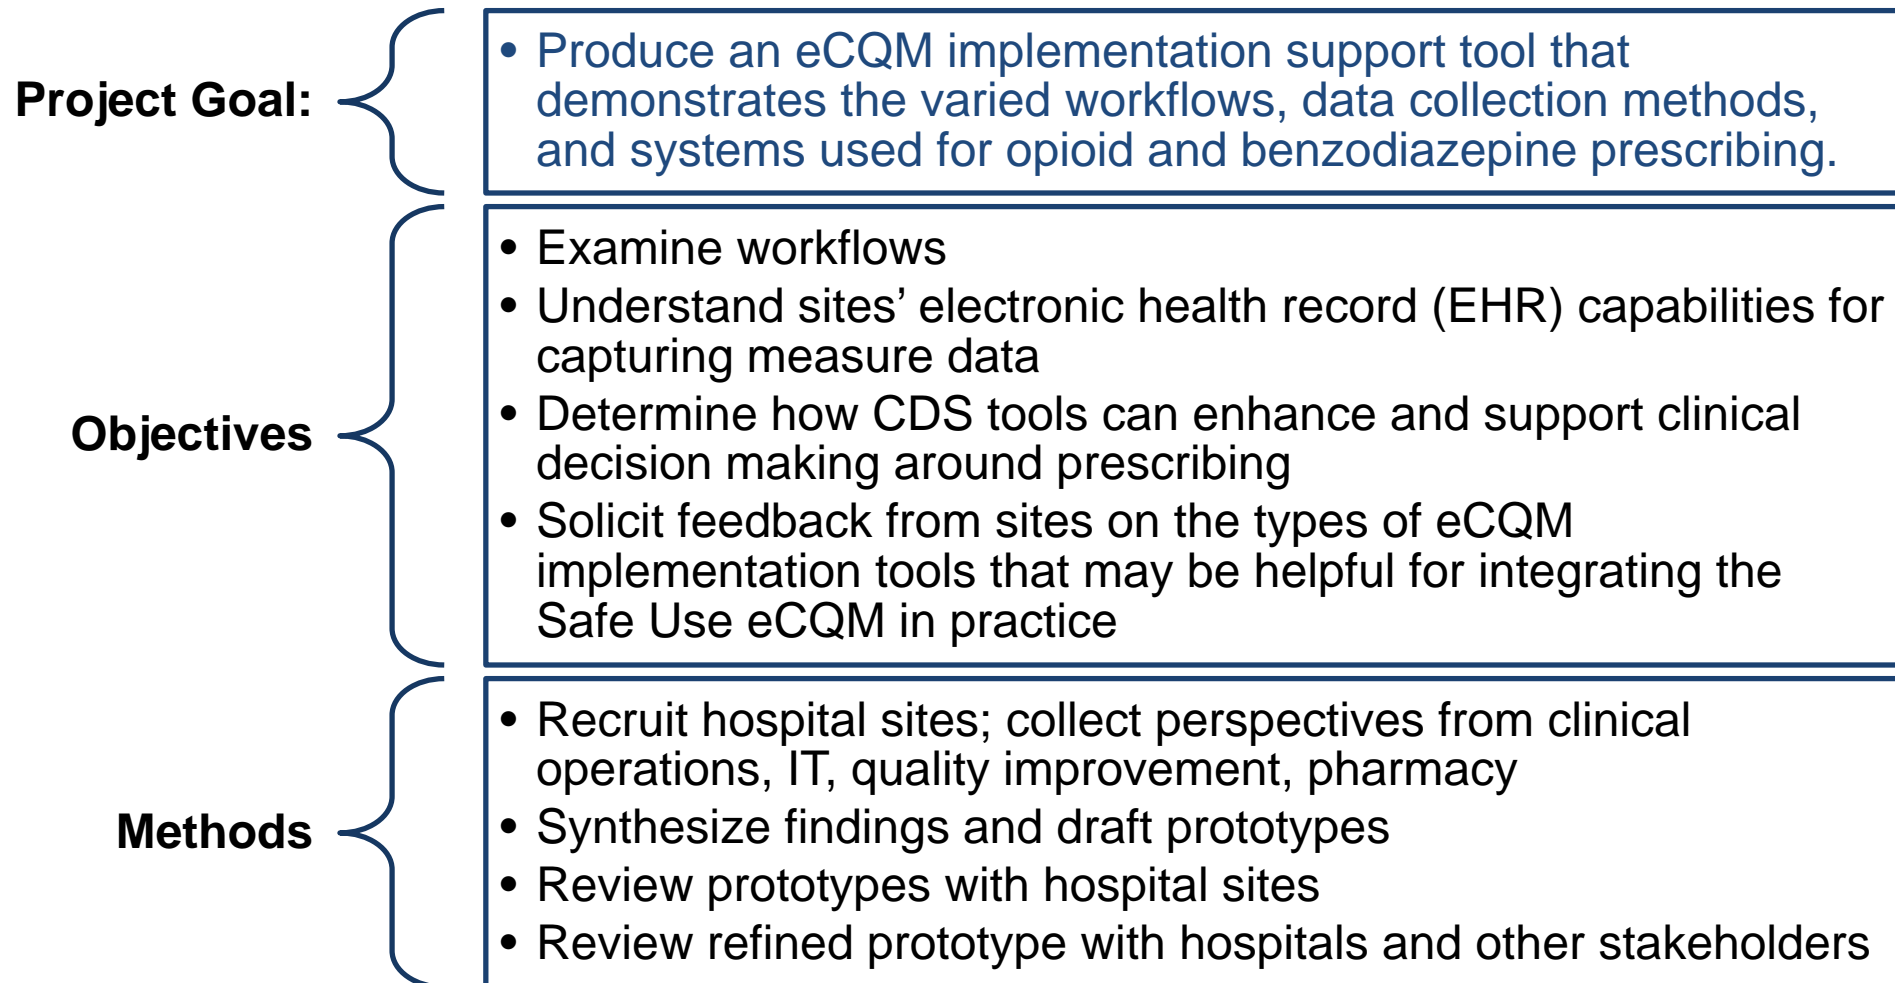

For questions regarding the eCQM flows, please submit your question via the ONC Project Tracking System (JIRA) [eCQM Issue Tracker](#) and indicate in the issue summary that your question is regarding an eCQM flow.

Claudia Hall, DNP, RN, Clinical Program Lead, Mathematica

## **Clinical Flow - Prototype Development**

# Clinical Flow - Workflow Analysis & Clinical Decision Support for eCQMs

# CMS506v2: Safe Use of Opioids

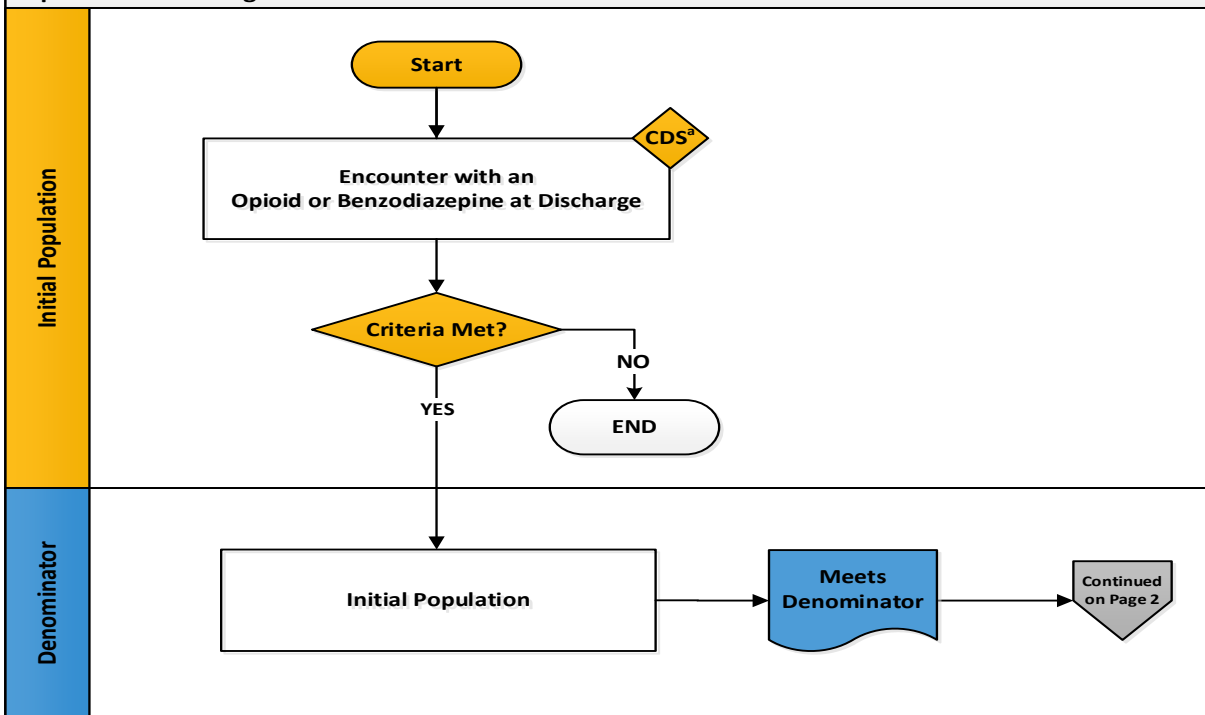

## CMS506v2: Safe Use of Opioids – Concurrent Prescribing Implementation Support Tool (DRAFT)

**Measure Description:** Proportion of inpatient hospitalizations for patients 18 years of age and older prescribed, or continued on, two or more opioids or an opioid and benzodiazepine concurrently at discharge (Link to specification: <https://ecqi.healthit.gov/ecqm/eh/2020/cms506v2>)

**Measure Intent:** Adopting a measure that calculates the proportion of patients with two or more opioids or opioids and benzodiazepines concurrently has the potential to reduce preventable mortality and reduce the costs associated with adverse events related to opioid use by

- (1) encouraging providers to identify patients with concurrent prescriptions of opioids or opioids and benzodiazepines and
- (2) discouraging providers from prescribing two or more opioids or opioids and benzodiazepines concurrently.

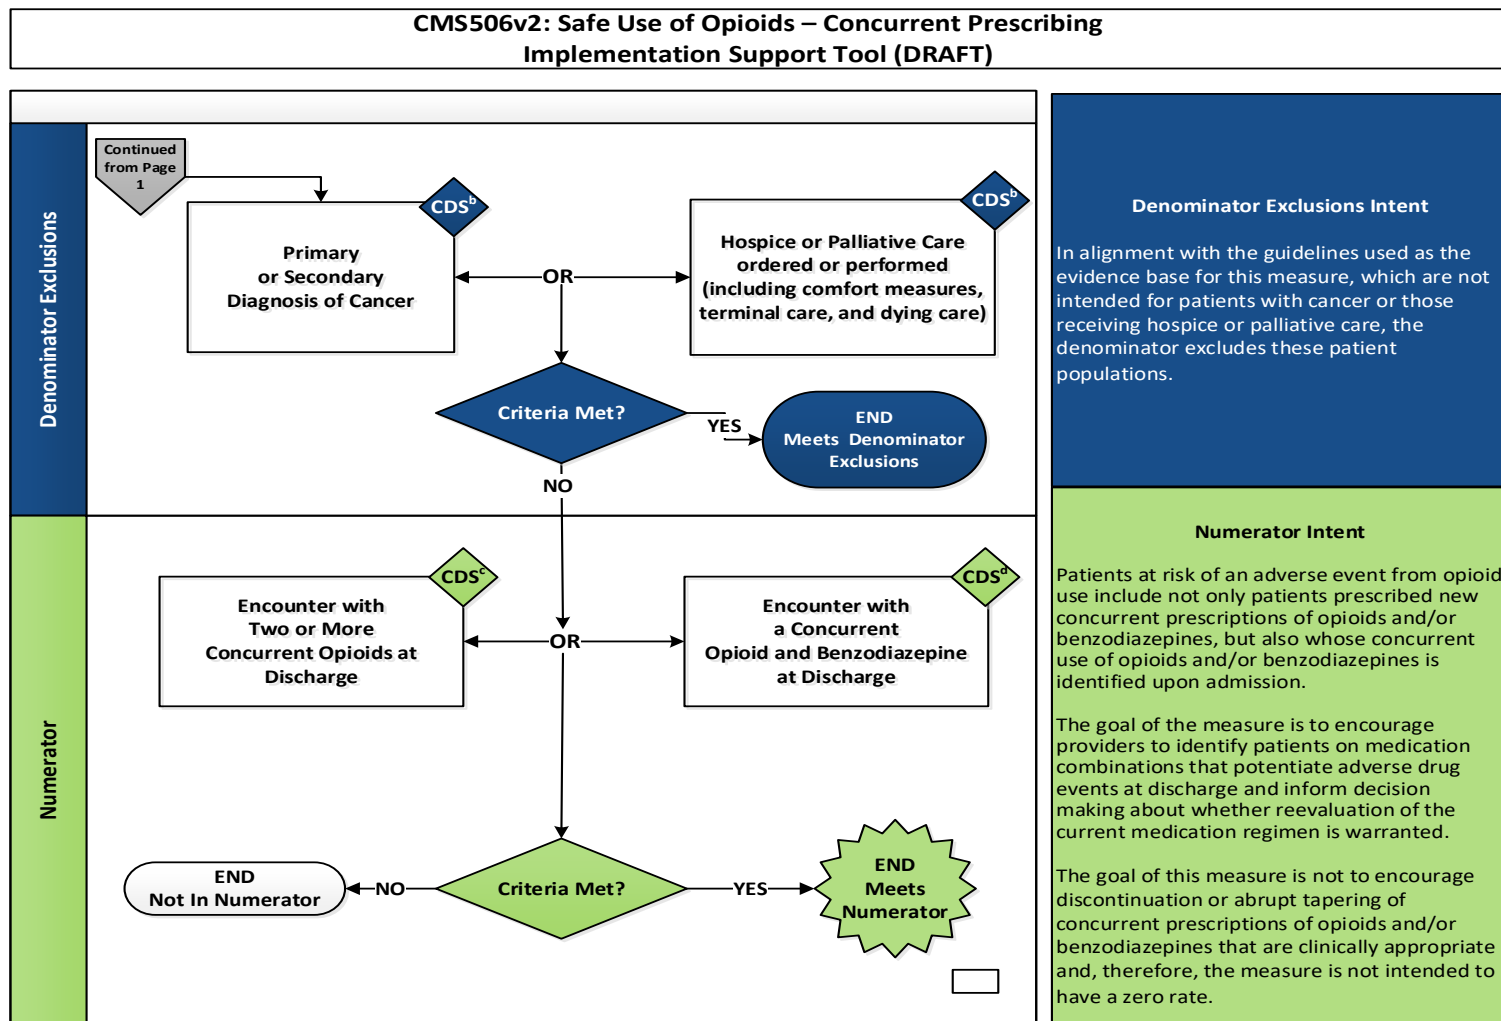

### Implementation Diagram

### Initial Population/ Denominator Intent:

In addition to the 2016 CDC Guideline for Prescribing Opioids for Chronic Pain, opioid prescribing guidelines issued by various state agencies and professional societies for various settings agree with the recommendation to avoid concurrently prescribing opioids and opioids and benzodiazepines whenever possible, as the combination of these medications may potentiate opioid-induced respiratory depression.

# CMS506v2: Safe Use of Opioids

# CMS506v2: Safe Use of Opioids

## CMS506v2: Safe Use of Opioids – Concurrent Prescribing Implementation Support Tool (DRAFT)

*Clinical Decision Support (CDS): Examples for suggested use*

CDS<sup>a</sup>

Duplicate order checking:  
on admission, provider  
alerted if patient is on  
concurrent medications

Use of preferred order  
sets: on admission,  
provider prompted to  
prescribe opioid from list of  
preferred medications that  
are indicated for safer use  
or have lower abuse  
potential

CDS<sup>b</sup>

Care team prompted to  
enter any indication of  
hospice or palliative care

Entry of indication of  
active cancer: care team  
prompted to enter if  
patient has a diagnosis of  
cancer or is receiving  
treatment for cancer

CDS<sup>c,d</sup>

Duplicate order checking:  
popup alert for clinician if  
more than one opioid  
prescribed

Pop-up alert:  
Clinician is alerted if two or  
more opioids  
or an opioid and a  
benzodiazepine are  
prescribed

# New eCQM Clinical Workflow Measure Detail

## Hospital Harm – Acute Kidney Injury

IMPAQ International, LLC • maggielohnes • Published • Last Updated: 2/25/2020

263 Views

0 Comments

2 Subscribers

[Receive updates on this topic](#)

### Description

The proportion of hospitalized patients age 18 years and older, who during their hospitalization suffer the harm of a substantial increase in serum creatinine, defined as greater than or equal to 1.5 times baseline, OR the initiation of renal dialysis (hemodialysis or peritoneal dialysis), during the measurement period.

### Initial Population

Patients age 18 years and older at the start of the measurement period with a discharged inpatient hospital encounter during the measurement period. Measure includes inpatient admissions who were initially seen in the emergency department or in observational status and who become an inpatient.

### Rationale

This measure focuses on acute kidney injury as an outcome in the hospital inpatient setting. Acute kidney injury affects up to 10% of hospitalized patients (Wilson et al., 2015)(Chertow 2005), comparable to the rates of severe sepsis (Hoste, Schurgers, 2008) and acute lung injury (Wilson et al., 2015)(Goldstein et al., 2016)(McCoy et al., 2010). Less severe acute kidney injury and acute kidney injury requiring dialysis affects approximately 2,000 to 3,000 and 200 to 300 per million population per year, respectively. Up to two thirds of intensive care patients will develop acute kidney injury. Acute kidney injury may result in the need for dialysis, and is associated with an increased risk of mortality (Wilson et al., 2013).

# New eCQM Clinical Workflow – Download Workflow Files

## Clinical Workflow

### Workflow Description

Please see attached data flow and comment on feasibility or impact to clinical workflow.

### Follow the below instruction to provide feedback on the workflow file:

1. Download the .pdf of the workflow.
2. Open the file in Adobe Reader.
3. Click on "Comment" and choose to add sticky notes or text boxes directly on the workflow sections you have feedback on.
4. Save the file.
5. To upload the feedback to the MC Workspace for measure developer review, navigate to the MC Workspace -> New eCQM Clinical Workflow module, and open the eCQM of interest. (If you are not already logged in, you will need to login to the eCQI Resource Center)
6. Scroll down to the Feedback Submission Form.
7. In the file upload section, click on "Browse", locate your saved file, click on "Submit" to upload the file.

### Workflow Site Information
