Purpose

This event will provide an overview of the hospital-specific reports (HSRs) for select claims-based measures that will be publicly reported in July 2022, including a summary of national results, steps to access and navigate the HSR, and an overview of measure calculations.

Objectives

Participants will be able to:

- Understand ways to determine performance categories.
- Access and preview the HSR.
- Submit questions during the preview period.

Included Measures and Important Notes

HSR Overview

- **Purpose of Report:** HSRs are provided for claims-based measures (CBMs) that will be publicly reported in July 2022, so hospitals may preview their measure results prior to the public reporting of the results.

Included Measures (1 of 2)

- 30-Day Risk-Standardized Readmission Rate (RSRR) following:
 - Acute Myocardial Infarction (AMI) Hospitalizations
 - Chronic Obstructive Pulmonary Disease (COPD) Hospitalizations
 - Heart Failure (HF) Hospitalizations
 - Coronary Artery Bypass Graft (CABG)
 - Elective Primary Total Hip Arthroplasty and/or Total Knee Arthroplasty (THA/TKA)

Included Measures (2 of 2)

- 30-Day Hospital-Wide, All-Cause Unplanned Readmission Measure (HWR)
- 30-Day Risk-Standardized Mortality Rate (RSMR) following AMI, COPD, HF, Stroke hospitalizations, and CABG
- 90-Day Risk-Standardized Complication Rate (RSCR) following THA/TKA
- Risk-Standardized Payment Measures Associated with a 30-Day Episode of Care for AMI, HF and PN
- Risk-Standardized Payment Measures Associated with a 90-Day Episode of Care for THA/TKA
- 30-Day Risk-Standardized Excess Days in Acute Care (EDAC) measures for AMI, HF, and PN

Updates for July 2022

Public Reporting

CMS made the following changes to the Public Reporting, outcome, payment, and CMS PSI measures for July 2022:

- CMS will delay reporting of the Pneumonia readmission and mortality measure results to allow for additional time to update the measure to account for COVID-19. As a result, the two measures are not included in this year's Publicly Reported Readmission and Mortality HSRs.
- CMS will delay reporting of the dual eligibility disparity methods for the readmission measure results to a later date. As a result, the two disparity tabs for Within Hospital and Across Hospital results are not included in this July 2022 Publicly Reported Readmission HSR. In addition, CMS will report dual eligibility disparity methods for the HWR measure, along with the Condition- and Procedure-Specific Readmission Measures results.
- CMS will not report the CMS PSI measure results to hospitals, nor will the results be refreshed on Care Compare as part of the IQR/PR July 2022 public reporting refresh.
- CMS updated the Planned Readmission Algorithm Version 4.0 2022 to incorporate new ICD-10-CM and ICD-10-PCS codes applicable to the 2022 measurement period.
- CMS updated the readmission, mortality, complication, payment, and EDAC measure risk models to account for whether any clinical patient risk factors were present on admission (POA) during the patient's index stay.
- Note: FY 2023 IPPS/LTCH PPS Proposed Rule: <https://public-inspection.federalregister.gov/2022-08268.pdf>

Updated Discharge Periods

- In response to the COVID-19 public health emergency CMS is not using claims data reflecting services provided January 1, 2020–June 30, 2020 (Q1 and Q2 2020) in its calculations for the Medicare quality reporting programs.
- Hospitals do **not** need to request an Extraordinary Circumstances Exception (ECE) for measures and submissions covered under the COVID-19 exception for Q1 and Q2 2020.
- The reporting periods for all Public Reporting measures apart from HWR have been updated to reflect this policy:

Measures	Updated Reporting Period*
AMI, COPD, HF, CABG, and THA/TKA readmission measures	July 1, 2018, through December 1, 2019, and July 1, 2020, through June 30, 2021
AMI, COPD, HF, stroke, and CABG mortality measures	
AMI, HF, and pneumonia payment measures	
AMI, HF, and pneumonia EDAC measures	
HWR measure	July 1, 2020, through June 30, 2021
THA/TKA complication and payment measures	April 1, 2018, through October 2, 2019, and July 1, 2020, through March 31, 2021

- The readmission, mortality, payment, and EDAC measures include a 30-day window after each index stay to identify outcomes, and the THA/TKA measure includes a 90-day window after each index stay to identify outcomes. Therefore, the performance periods for these measures end 30 days and 90 days, respectively, before January 1, 2020, so that no data from Q1 and Q2 2020 are used in the measure calculations.

Important Dates

- July 2022 Public Reporting HSRs were delivered **May 16, 2022**.
- The July 2022 Public Reporting preview period is **May 17–June 15, 2022**.

Coming Soon: Medicare Spending per Beneficiary (MSPB) HSRs

- CMS anticipates the MSPB HSRs will be delivered to hospitals in May/June 2022.
- CMS will provide notification of HSR delivery through the **HIQR Notify: Hospital Inpatient Quality Reporting (IQR) Program Notifications** and the **HVBP Notify: Hospital Inpatient Value-Based Purchasing (HVBP) Program Notifications** Program Notification Listserv groups.
 - Sign up for those Listserv groups on QualityNet: <https://qualitynet.cms.gov/listserv-signup>

Contacts for Questions

- Questions regarding the measures and the HSRs can be submitted through the Questions and Answers tool on QualityNet:
https://cmsqualitysupport.servicenowservices.com/qnet_qa?id=ask_a_question.
- When submitting the request, select:
 - **Program:** Inpatient Claims-Based Measures
 - **Topic:** Select relevant topic (Example: Excess Days in Acute Care)
 - Please include your hospital's CMS Certification Number (CCN).
- If you experience issues accessing your HSR from Managed File Transfer (MFT) or requesting and reviewing your HCQIS Access Roles and Profile (HARP) permissions, contact the QualityNet Service Center at qnetsupport@hcqis.org or by phone at (866) 288-8912.
- Do **not** email HSR files or their contents. HSRs contain discharge-level data protected by The Health Insurance Portability and Accountability Act of 1996 (HIPAA). Any disclosure of protected health information (PHI) should only be in accordance with, and to the extent permitted by, the HIPAA Privacy and Security Rules and other applicable law. Use the ID number found within the HSR when referring to the contents of that report.

Receiving the HSRs and User Guide

How to Receive Your HSR

How will I know my report is available?

- A Listserve communication was sent via email to those who are registered for the **Hospital IQR and Improvement** and the **Hospital Inpatient VBP and Improvement** Program Notification Listserve groups on QualityNet.
- An Auto Route File Delivery Notification will be sent to your e-mail once your hospital's HSR has been delivered to your account. Only hospital users with the appropriate roles will receive a report and the notification.

How to Receive Your HSR

- HSRs are provided to users with a hospital that have approved **Auto-Route (IQR)** and **Managed File Transfer** permissions associated with their Hospital Quality Reporting (HQR) Profile.
 - If you are not a Security Administrator/Official (SA/O) for your hospital or you have not recently taken action to request these permissions on your account, you **will not** have the permissions on your profile required to receive an HSR.
- Reference the *Important: [Request Access to Managed File Transfer \(MFT\) & Auto-Route Now to Ensure You Receive Your Reports](#)* notification for instructions to request these permissions or to confirm these permissions are active on your profile.
 - Link to notification:
<https://www.qualityreportingcenter.com/globalassets/2021/03/iqr/mft-permissions-announcement508.pdf>

Accessing Your HSR

When your hospital's report is delivered to your MFT mailbox, a notification is sent to the email address associated with your HARP account. HSRs will be available in your MFT mailbox for a 30-day period after delivery. Upon receipt of this notification, follow these steps to access your HSR in your MFT mailbox:

1. Navigate to the CMS Managed File Transfer page at:
<https://qnetmft.cms.gov/mft-signin/login>.
 2. Enter your HARP User ID and Password. Select the **I agree to the Terms and Conditions** checkbox. Then, select **Sign In**.
 3. You will be directed to the Two-Factor Authorization page. A preview of the device or email that will be sent a code will be displayed. Select **Send Code**. After selection, the Send Code button will update to **Sent**.
 4. After receipt of the code via your device or email, enter the code. Then, select **Verify**.
 5. Upon successful login, you will be directed to the MFT dashboard. Select **Mail** on the left-navigation pane to expand the mailbox.
 6. Select **Inbox** under the expanded **Mail** options.
 7. HSR will have a subject of AutoRoute – Package 999999_JULY2022_PR_HSR with your hospital's CCN replacing 999999. Click on that line to open the message with the HSR.
 8. Download the HSR by selecting the file in the **Attachments** section of the message.
- HSRs will be available in your MFT mailbox for a thirty (30) day period after delivery.

What if I didn't receive my HSR?

- If after May 16, you have not received an email notifying you of the report delivery and you believe your profile has the appropriate permissions, follow the instructions for accessing your HSR to check if the report was delivered.
- If the report was not delivered, confirm that your profile has the permissions required to receive the report, as detailed above.

- If your profile did not have active Auto-Route (IQR) and MFT permissions prior to May 16, you may request these permissions now using the instructions in this notification:

<https://www.qualityreportingcenter.com/globalassets/2021/03/iqr/mft-permissions-announcement508.pdf>.

Your hospital's SA/O will review your requested permissions. Once you have been granted the proper permissions you will have access to any future report deliveries via MFT; however, this report will not be available unless a request to resend the report is submitted.

- If your profile did have active Auto-Route (IQR) and MFT permissions prior to May 16, and you did not receive your report, please contact the QualityNet Service Center for further assistance at qnetsupport@hcqis.org.

How do I submit a request to resend my HSR?

- Requests to resend the HSR can be submitted through the Questions and Answers tool on QualityNet:

https://cmsqualitysupport.servicenowservices.com/qnet_ga?id=ask_a_question

- When submitting the request, select **Inpatient Claims-Based Measures** from the Program drop-down menu and select **Request for HVBP hospital-specific reports** from the HVBP Mortality & Complication topic drop-down menu. In the subject line, type **Request to Resend FY 2023 Hospital VBP Program Mortality and Complication Measures HSR**.
 - In the *please describe your question* text box, include your hospital's CCN.
- Do not email HSR files or their contents. HSRs contain discharge-level data protected by HIPAA. Any disclosure of PHI should only be in accordance with, and to the extent permitted by, the HIPAA Privacy and Security Rules and other applicable law.

Summer 2022 Public Reporting Outcome and Payment Claims-Based Measures (CBM) Methodology Updates and Results

2022 Measure Updates to CBMs: Cohort

Exclude index admissions with either:

- Principal diagnosis of COVID-19 (ICD-10-CM code U07.1)

OR

- Secondary diagnosis code of COVID-19 coded as Present on Admission (POA) on the index admission claim

2022 Measure Updates to CBMs: Outcome

Measures	Outcome
Mortality Measures	No change. Patients who died from COVID-19 are not excluded from the outcome since cause of death is unknown
Readmission Measures	Remove readmissions with a principal or with a secondary diagnosis of COVID-19 coded as Present on Admission (POA)
Hip/Knee Complications	<p>Remove admissions with a principal or with a secondary diagnosis of COVID-19 coded as POA for the medical readmission outcomes only:</p> <ul style="list-style-type: none"> • AMI • Pneumonia or other acute respiratory complication • Sepsis/septicemia/shock • Pulmonary Embolism <p>Patients with principal or secondary diagnosis of COVID-19 and the following complications will remain in the outcome: mortality, mechanical and wound complication, or surgical site bleeding</p>
EDAC Measures	Remove Emergency Department/Observation or readmissions with a principal or with a secondary diagnosis of COVID-19 coded as POA
Payment Measures	Remove any payments associated with a principal or with a secondary diagnosis of COVID-19 coded as POA (applies to inpatient and Skilled Nursing Facility claims only).

2022 Measure Updates to CBMs:

Risk Adjustment

Risk adjust for a history of COVID-19 defined as either:

- ICD-10-CM code U07.1 as principal or secondary diagnosis on a historical claim

OR

- ICD-10-CM code Z86.16, personal history of COVID-19, as a secondary diagnosis on the index or historical claim

Revised Stroke Mortality Measure

- Starting this year, the Stroke Mortality measure will be risk adjusted for stroke severity using the National Institutes of Health (NIH) Stroke Scale.
 - NIH Stroke Scale is a 11-item neurologic exam used to evaluate stroke-related deficits experienced by patients. Hospitals submit NIH Stroke Scale scores on their administrative claims.
- CMS provided hospitals with confidential results in August 2021.
- More details can be found on *QualityNet*.

Changes to the Public Reporting and IQR Program Bundles and HSRs

- Disparity Stratification will not be reported in the Readmission HSRs distributed in May.
- History of COVID-19 risk factor was added to all 6 PR HSRs.
- COVID-19 exclusions have been added to all the PR HSRs.
- PSI HSRs will not be included.
- PN Results will not be included in the Mortality and Readmission HSRs. Payment will not have PN Value of Care.

HSR Content

Each of the *Public Reporting* HSRs use the same basic structure for consistency and have tabs providing the following information:

- Your hospital's measure results
- Distribution of state and national performance categories
- Discharge-level data used to calculate your hospital's measure results
- Case mix comparison of the risk factors used for risk adjusting the measures

[b] The outcome timeframe of 30 days begins with the CABG procedure date for the CABG mortality measure, and is shown for that measure only.

[c] If a CABG patient was transferred, the discharge date may be different from the discharge date associated with the index hospital stay.

[d] NIHSS scores are available as secondary diagnosis codes in claims on or after October 1, 2016. NIHSS scores are being used in risk-adjustment to calculate stroke mortality rates for July 2022 public reporting. The "0" indicates CMS will assign a NIHSS score of 0 to patients without a NIHSS score. The "*" indicates the NIHSS score displayed was randomly selected because there were multiple NIHSS scores and no associated Present on Admission (POA) code. Note: the randomly selected value receiving an "*" could also be 0.

Notes:

1. N/A = Case information is not applicable for this discharge.

2. Hospitals with zero discharges for fee-for-service patients aged 65 and older for these measures do not have discharge-level data in this worksheet.

3. AMI = acute myocardial infarction; COPD = chronic obstructive pulmonary disease; HF = heart failure; CABG = coronary artery bypass graft

4. Refer to the Public Reporting User Guide for the HSRs for a list of inclusion/exclusion indicator values.

5. A patient may be listed more than once if they had multiple eligible discharges for a given measure(s) during the discharge period.
