* While NQF #0753 is a single harmonized measure containing SSI data for both colon and abdominal hysterectomies, the data are reported specific to each surgery on the PPS-Exempt Cancer Hospital Report; therefore, it has two PCH numbers, PCH-6 (SSI-colon) and PCH-7 (SSI-hysterectomy).

§ Quarters 2–4 apply to the Fiscal Year.

[†] Measure finalized for removal from the PCHQR Program in the FY 2020 IPPS/LTCH PPS Final Rule, beginning FY 2022 Program Year and subsequent years.

† Only Quarter 1 applies to Fiscal Year 2016.

‡ Only Quarters 2 and 3 apply to this Fiscal Year.

[‡] While PCH-30 and PCH-31 are part of a single measure, Admissions and Emergency Department (ED) Visits for Patients Receiving Outpatient Chemotherapy, there are two rates reported. PCH-30 is the risk-standardized admission rate (RSAR), and PCH-31 is the risk-standardized ED visit rate (RSEDR).
