Subject: **April 2026 published in May 2026 Hospital Quality Initiative Public Reporting Data Refresh for Hospitals**

The Centers for Medicare & Medicaid Services (CMS) [Care Compare tool on Medicare.gov](#) website provides consumers with information on over 100 quality measures for over 4,000 hospitals nationwide, including Veterans Administration (VA) medical centers and Department of Defense (DoD) military hospitals.

The Overall Hospital Quality Star Rating summarizes data from existing publicly reported measures for each hospital to allow users to easily compare hospitals. Patients and caregivers can also compare hospitals' performance for many common conditions.

With the [Provider Data Catalog](#), users can explore and download hospital data, as well as data on ambulatory surgical centers, inpatient psychiatric facilities, and some cancer hospitals. Publicly displaying quality information encourages hospitals and other healthcare facilities to make continued improvements in care.

CMS updates the data on the Care Compare tool on Medicare.gov and the Provider Data Catalog websites quarterly, though not all data are updated each quarter.
