Hospital Readmissions Reductions Program (HRRP) Lead Hospital Quality Reporting Program Support (HQRPS) Contractor

December 16, 2016

Purpose

This event will provide an overview of the publicly reported data and information available for the Centers for Medicare & Medicaid Services (CMS) inpatient hospital pay-forperformance programs, including the Hospital VBP Program, the HAC Reduction Program, and the HRRP.

Objectives

At the conclusion of this presentation, participants will be able to:

- Recall the location of the publicly reported data for the CMS inpatient hospital pay-for-performance programs
- Identify publicly reported data from previous years
- Obtain comma-separated-value (CSV) files of the publicly reported data

Bethany Bunch, MSHA

Hospital VBP Program Support Contract Lead

Hospital Inpatient VIQR Outreach and Education Support Contractor

HOSPITAL VBP PROGRAM

Background

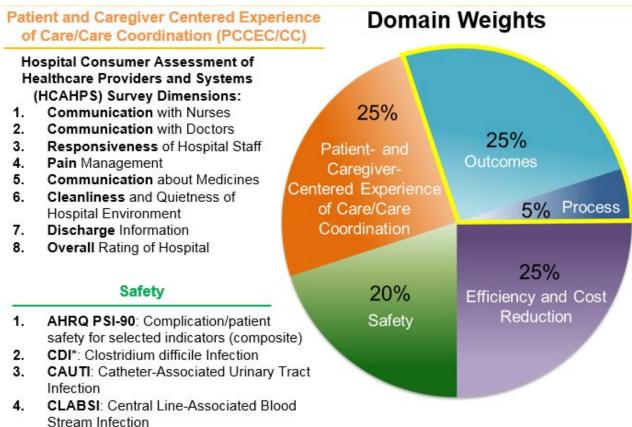

Hospital VBP is a quality incentive program:

- Required by provisions in the Affordable Care Act (ACA) and further defined in Section 1886(o) of the Social Security Act
- Built on the Hospital Inpatient Quality Reporting (IQR) measure reporting infrastructure
- Based on the quality of care, not just the quantity of inpatient acute care services provided
- Funded by a 2.00% reduction from participating hospitals' base operating Diagnosis-Related Group (DRG) payments for Fiscal Year (FY) 2017

Payments withheld

Hospital Compare December 2016 Release: FY 2017 Hospital VBP

- MRSA*: Methicillin-Resistant Staphylococcus aureus Bacteremia
- SSI: Surgical Site Infection Colon Surgery and Abdominal Hysterectomy

An asterisk (*) indicates a newly adopted measure for the Hospital VBP Program.

Clinical Care: Outcomes

- MORT-30-AMI: Acute Myocardial Infarction (AMI) 30-Day Mortality Rate
- MORT-30-HF: Heart Failure (HF) 30-Day Mortality Rate
- 3. MORT-30-PN: Pneumonia (PN) 30-Day Mortality Rate

Clinical Care: Process

- AMI-7a: Fibrinolytic Therapy Received Within 30 Minutes of Hospital Arrival
- PC-01*: Elective Delivery Prior to 39 Completed Weeks Gestation
- 3. IMM-2: Influenza Immunization

Efficiency and Cost Reduction

 MSPB-1: Medicare Spending per Beneficiary (MSPB)

FY 2017 Data Periods

Domain	Subdomain/ Measure	Baseline Period	Performance Period		
Clinical Care	Process	1/1/2013 – 12/31/2013	1/1/2015 – 12/31/2015		
Clinical Care	Outcomes	10/1/2010 — 6/30/2012	10/1/2013 – 6/30/2015		
PCCEC/CC	HCAHPS Survey	1/1/2013 – 12/31/2013	1/1/2015 – 12/31/2015		
	Agency for Healthcare Research and Quality (AHRQ) PSI-90 Composite	10/1/2010 – 6/30/2012	10/1/2013 – 6/30/2015		
Safety	Centers for Disease Control and Prevention (CDC) Healthcare-Associated Infection (HAI) Measures	1/1/2013 – 12/31/2013	1/1/2015 – 12/31/2015		
Efficiency and Cost Reduction	MSPB	1/1/2013 – 12/31/2013	1/1/2015 – 12/31/2015		

Hospital VBP vs Hospital IQR

The FY 2017 Hospital VBP Program uses measures that are included in the Hospital IQR Program; however, you may notice slightly different results between the two programs, for example:

- HCAHPS survey
- 30-Day Mortality Measures
- AHRQ PSI-90 Composite
- Healthcare-Associated Infection (HAI) measures: CLABSI, CAUTI, SSI, MRSA, and CDI
- Data Periods

Overall Hospital Rating & Hospital VBP Program

The Overall Hospital Rating is a summary of a hospital's reported Hospital Inpatient Quality Reporting and Outpatient Quality Reporting Programs on Hospital Compare. Please note that Hospital VBP Program results are not used in the calculation of the Overall Hospital Rating results.

HAC Reduction Program Lead HQRPS Contractor

HAC REDUCTION PROGRAM

Background

- The HAC Reduction Program is a CMS Medicare pay-forperformance program established under Section 3008 of the Affordable Care Act.
- Adjusts payments for hospitals that rank in the worst-performing 25% of all subsection (d) hospitals on key quality measures.
- Payment adjustments started with FY 2015 discharges (i.e., beginning on October 1, 2014). These hospitals will have payments reduced to 99 percent of what would be paid for such discharges.
- Section 1886(p)(6)(B) of the ACA requires the Secretary to ensure that an eligible hospital has the opportunity to review, and submit corrections for, the HAC-related data before public reporting.

Hospital Compare December 2016 Release

On December 19, 2016, CMS will update the data on the Hospital Compare website to include the following FY 2017 HAC Reduction Program information:

- AHRQ Patient Safety Indicator (PSI) 90 Composite measure score
- CDC National Healthcare Safety Network (NHSN) CLABSI, CAUTI, SSI, MRSA bacteremia, and CDI measure scores
- Domain 1 and Domain 2 scores
- Total HAC Score

FY 2017 Performance Periods

The calculations for the FY 2017 HAC Reduction Program are based on a 2-year period.

- Domain 1: The PSI 90 Composite is calculated using hospitals' Medicare Fee-for-Service claims data from July 1, 2013 through June 30, 2015.
- Domain 2: The CLABSI, CAUTI, SSI, MRSA bacteremia, and CDI measures are calculated from hospitals' chart-abstracted surveillance data from January 1, 2014 through December 31, 2015.

HAC Reduction Program vs IQR, Hospital VBP Program

- The FY 2017 HAC Reduction Program uses the same PSI 90 Composite and CLABSI, CAUTI, SSI, MRSA bacteremia, and CDI measures as the FY 2017 Hospital IQR and Hospital VBP Programs.
- Your hospital's FY 2017 HAC Reduction Program results will likely differ from your hospital's FY 2017 Hospital VBP Program performance period results due to differences in the applicable hospitals and performance periods used for these programs.
- There will also be differences in PSI 90 Composite results between programs due to the version of the AHRQ PSI software used in each program.

Overall Hospital Rating and HACRP

The Overall Hospital Rating is a summary of a hospital's reported Hospital Inpatient Quality Reporting and Outpatient Quality Reporting Programs on Hospital Compare. Please note that HAC Reduction Program results are not used in the calculation of the Overall Hospital Rating results.

Hospital-Acquired Condition Reduction Program

In October 2014, CMS began reducing Medicare payments for subsection (d) hospitals that rank in the worst performing quartile of subsection (d) hospitals with respect to hospital-acquired conditions (HACs). For the FY 2017 HAC Reduction Program, the worst performing quartile is identified by calculating a Total HAC Score based on hospitals' performance on 6 quality measures: the Agency for Healthcare Research and Quality (AHRQ) Patient Safety Indicators (PSI) 90 Composite, and the Centers for Disease Control and Prevention (CDC) National Healthcare Safety Network (NHSN) Central Line-Associated Bloodstream Infection (CLABSI), Catheter-Associated Urinary Tract Infection (CAUTI), Surgical Site Infection (SSI) (Colon Surgery and Abdominal Hysterectomy), Methicillin-resistant Staphylococcus aureus (MRSA) bacteremia, and Clostridium difficile Infection (CDI) measures. Hospitals with a Total HAC Score above the 75th percentile of the Total HAC Score distribution will be subject to payment reduction.

To learn more about the measures and scoring methodology for the HAC Reduction Program, please visit the QualityNet Website 🗹.

Casey Thompson MSN, RN-BC HRRP Lead HQRPS Contractor

HOSPITAL READMISSIONS REDUCTION PROGRAM

Background

- Section 3025 of the ACA added a new section, 1886(q), to the Social Security Act, establishing the HRRP.
- Payment adjustments began with discharges on October 1, 2012.

Purpose

- An important part of the continued efforts of CMS to link payment to the quality of hospital care
- A strong financial incentive for hospitals to improve communication and care coordination efforts, and to better engage patients and caregivers in post-discharge planning

Hospital Compare December 2016 Release

For eligible hospitals with at least 25 discharges, CMS reports the following data elements for each of the six HRRP readmission measures on Hospital Compare:

- Number of eligible discharges
- Number of readmissions (if the hospital has 11 or more readmissions)
- Predicted readmissions (i.e., the adjusted actual readmissions)
- Expected readmissions
- Excess readmission ratio

The FY 2017 HRRP measure results will be updated on CMS's *Hospital Compare* website on December 19, 2016.

Formula for Calculating Aggregate Payments for Excess Readmissions

Aggregate payments for excess readmissions = [sum of base operating DRG payments for AMI x (Excess Readmissions Ratio for AMI-1)] + [sum of base operating DRG payments for HF x (Excess Readmissions Ratio for HF-1)] + [sum of base operating DRG payments for PN x (Excess Readmissions Ratio for PN-1)] + [sum of base operating DRG payments for COPD) x (Excess Readmissions Ratio for COPD-1)] + [sum of base operating DRG payments for THA/TKA x (Excess Readmissions Ratio for THA/TKA-1)] + [sum of base operating DRG payments for CABG x (Excess Readmissions Ratio for CABG-1)].

*We note that if a hospital's excess readmissions ratio for a condition is less than/equal to 1, there are no aggregate payments for excess readmissions for that condition included in this calculation.

Aggregate payments for all discharges = sum of base operating DRG payments for all discharges.

Ratio = 1- (Aggregate payments for excess readmissions/Aggregate payments for all discharges).

Proposed Readmissions Adjustment Factor for FY 2017 is the higher of the ratio or 0.9700.

^{12/16/2016} *Based on claims data from July 1, 2012 to June 30, 2015 for FY 2017.

Supplemental Data File

Hospital FY 2017 HRRP payment adjustment factor information, based on data available as of the close of the Review and Corrections period, was made available to the public in August 2016. CMS posted the information with the final rule data files on the FY 2017 IPPS Hospital Inpatient Prospective Payment System Final Rule Home Page on

https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/FY2017-IPPS-Final-Rule-Home-Page.html.

IQR vs. HRRP

- IQR and HRRP both use the same measure methodology and discharge time period; however, they use different sets of hospitals.
- HRRP uses subsection (d) hospitals and Maryland hospitals participating in the all-payer model.
- IQR includes a more expansive group of hospitals, including critical access hospitals, cancer hospitals, and hospitals located in U.S. territories that are not subsection (d) hospitals.
- Most hospitals have similar results, or possibly a lower number of readmissions (or unadjusted readmission rate), in the Hospital Readmissions Reduction Program as compared to the Hospital IQR Program.
- Some hospitals may have a slightly higher number of readmissions, or unadjusted readmission rates, due to the difference described above.

Overall Hospital Rating and HRRP

The Overall Hospital Rating is a summary of a hospital's reported Hospital Inpatient Quality Reporting Program and Outpatient Quality Reporting Program on *Hospital Compare*. Please note that HRRP results are not used in the calculation of the Overall Hospital Rating results.

The Official U.S. Government Site for Medicare

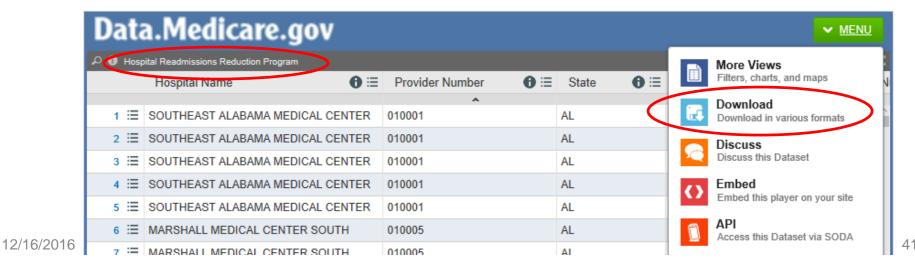

Hospital Readmissions Reduction Program

In October 2012, CMS began reducing Medicare payments for Inpatient Prospective Payment System (IPPS) hospitals with excess readmissions. Excess readmissions are measured by a ratio, by dividing a hospital's number of "predicted" 30-day readmissions for heart attack, heart failure, pneumonia, COPD, hip/knee replacement, and coronary artery bypass graft surgery by the number that would be "expected," based on an average hospital with similar patients. A ratio greater than 1.0000 indicates excess readmissions.

More information on how payments are adjusted.

More on the calculations.

Fiscal Year 2017 HAC Reduction Program, Hospital VBP Program, and HRRP: *Hospital Compare* Data Update

CONTINUING EDUCATION

Continuing Education Approval

This program has been approved for 1.5 continuing education (CE) unit for the following professional boards:

- Florida Board of Clinical Social Work, Marriage and Family Therapy and Mental Health Counseling
- Florida Board of Nursing Home Administrators
- Florida Council of Dietetics
- Florida Board of Pharmacy
- Board of Registered Nursing (Provider #16578)
 - It is your responsibility to submit this form to your accrediting body for credit.

CE Credit Process

- Complete the ReadyTalk[®] survey that will pop up after the webinar, or wait for the survey that will be sent to all registrants within the next 48 hours.
- After completion of the survey, click "Done" at the bottom of the screen.
- Another page will open that asks you to register in HSAG's Learning Management Center.
 - This is a separate registration from ReadyTalk[®].
 - Please use your PERSONAL email so you can receive your certificate.
 - Healthcare facilities have firewalls up that block our certificates.

CE Certificate Problems?

- If you do not <u>immediately</u> receive a response to the email that you signed up with in the Learning Management Center, you have a firewall up that is blocking the link that is sent out.
- Please go back to the **New User** link and register your personal email account.
 - Personal emails do not have firewalls.

CE Credit Process: Survey

 Very satisfied Somewhat satisfied Neutral Somewhat dissatisfied Very dissatisfied If you answered "very dissatisfied", please explain 	Please provide any additional comments	
 Very satisfied Somewhat satisfied Very dissatisfied fyou answered "very dissatisfied", please explain 1. What topics would be of interest to you for future presentations? 2. If you have questions or concerns, please feel free to leave your name and phone number or email address and we will contact you. 	^
