Section 1: CMS Inpatient Psychiatric Facility Quality Reporting Program

Overview

The Inpatient Psychiatric Facility Quality Reporting (IPFQR) Program was developed as mandated by section 1886(s)(4) of the Social Security Act, and amended by Sections 3401(f) and 10322(a) of the Affordable Care Act (Pub.L.111-148). It was implemented on October 1, 2012 as a Centers for Medicare & Medicaid Services (CMS) pay-for-reporting program.

The IPFQR pay-for-reporting program is intended to equip consumers with quality of care information to make more informed decisions about healthcare options. It is also intended to encourage psychiatric facilities and clinicians to improve the quality of inpatient care provided to patients by ensuring that providers are aware of and reporting on best practices for their respective facilities and type of care. To meet the IPFQR Program requirements, Inpatient Psychiatric Facilities (IPFs) are required to collect and submit all quality measures in the form, manner, and time as specified by the Secretary, to CMS, which began with the Fiscal Year (FY) 2014 annual payment update (APU) and continues in subsequent fiscal years.

This Program Manual is intended for use as a quick reference to assist in the implementation of the program. Links to the websites that display the measure specifications are provided, as this manual does not contain the specifications for the individual measures. Each section of the manual provides detailed instructions for completing the steps necessary for successful implementation of the IPFQR Program:

- QualityNet registration;
- Vendor authorization;
- Notice of Participation completion;
- Location of measure specifications;
- Data Accuracy and Completeness Acknowledgement;
- Report review and public reporting; and
- Additional resources.

QualityNet

Established by CMS, QualityNet provides healthcare quality improvement news, resources, and data reporting tools and applications used by healthcare providers and others. QualityNet is the only CMS-approved website for secure communications and healthcare quality data exchange between: quality improvement organizations (QIOs), hospitals, physician offices, nursing homes, end-stage renal disease (ESRD) networks and facilities, and data vendors.

Eligibility

All IPFs paid under the Inpatient Psychiatric Facilities Prospective Payment System (IPF PPS) are subject to the IPFQR Program requirements. The IPF PPS applies to inpatient psychiatric services furnished by Medicare participating entities in the United States that are classified as psychiatric hospitals or psychiatric units in acute care or critical access hospitals (CAHs). This
includes the 50 States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, and the Northern Mariana Islands.

**Additional Program Information**

Additional information about the IPFQR Program can be found on *QualityNet* by selecting the Inpatient Psychiatric Facilities tab (direct link): http://www.QualityNet.org/dcs/ContentServer?c=Page&pageName=QnetPublic%2FPage%2FQualityNet&cid=1228772862944.

National Provider Webinars are provided by CMS and by the IPFQR Support Contractor on a routine basis. The slides from each of the education sessions are published to the *QualityNet* website and are available for review under the Inpatient Psychiatric Facilities tab, by selecting the Webinars/Calls link from the drop-down menu.

**Glossary of Terms**

**Acute Care Hospital (ACH)** – A hospital providing inpatient medical care and other related services for surgery, acute medical conditions, or injuries (usually for a short-term illness or condition).

**Aggregate (data)** – Aggregate data elements derived for a specific hospital from the results of each measures algorithm over a given period of time period (e.g. quarterly).

**Algorithm** – An ordered sequence of data element retrieval and aggregation through which numerators and denominators are identified.

**Calendar Year** – Time period between January 1 and December 31 of a given year.

**Critical Access Hospital (CAH)** – A small facility that gives limited outpatient and inpatient services to people in rural areas.

**Data Accuracy and Completeness Acknowledgement (DACA)** – A requirement for IPFQR Program participating facilities, the DACA is an electronic acknowledgement indicating that the data provided to meet the APU data submission requirements are accurate and complete to the best of the facility's knowledge at the time of data submission.

**Data Collection** – The act or process of capturing raw or primary data from a single or number of sources, also called “data gathering.”

**Denominator** – The lower part of a fraction used to calculate a rate, proportion, or ratio.

**Excluded Populations** – Detailed information describing the populations that should not be included in the indicator. For example, specific age groups, ICD-9 or -10 procedure or diagnostic codes, or certain time periods could be excluded from the general population drawn upon by the indicator.

**Initial Patient Populations** – Detailed information describing the population(s) that the indicator intends to measure. Details could include such information as specific age groups,
diagnoses, ICD-9 or -10 diagnostic and procedure codes, CPT codes, revenue codes, enrollment periods, insurance and health plan groups, etc.

**Format** – Specifies the character length of a specific data element; the type of information the data element contains: numeric, decimal, number, date, time, character, or alphanumeric; and the frequency with which the data element occurs.

**Hospital Based Inpatient Psychiatric Services (HBIPS) Core Measure Set** – A specific set of measures developed and maintained by The Joint Commission for the inpatient psychiatric population, some of which are used by CMS in the IPFQR Program. In 2007, The Joint Commission, the National Association of Psychiatric Health Systems (NAPHS), the National Association of State Mental Health Program Directors (NASMHPD), and the NASMHPD Research Institute, Inc. (NRI) collaborated on the development of performance measures specific to hospital-based inpatient psychiatric services.

**Inpatient Psychiatric Facility Prospective Payment System (IPF PPS)** – A payment system for specialty hospitals and units established according to Section 1886(b) of the Social Security Act, as amended by Section 101 of the Tax Equity and Fiscal Responsibility Act (TEFRA) of 1982. Facilities are paid on the basis of Medicare reasonable costs per case, limited by a hospital specific target amount per discharge. The base year target amount is adjusted annually by an update factor and published in the IPF PPS Rule. Facilities paid under this system are required to report under the CMS IPFQR Program.

**Measure Information Form** – This tool provides specific clinical and technical information on a measure. The information contained includes: measure set, performance measure name, description, rationale, type of measure, improvement noted as, numerator/denominator/continuous variable statements, included populations, excluded populations, data elements, risk adjustment, data collection approach, data accuracy, measure analysis suggestions, sampling, data reported as, and selected references.

**Medical Record (Data Source)** – Data obtained from the records or documentation maintained on a patient in any healthcare setting (for example, hospital, home care, long-term care, practitioner’s office); includes automated and paper medical record systems.

**Notice of Participation (NOP)** – A requirement for IPFQR Program participating facilities, the NOP indicates a facility’s agreement to participate in the program and to allow public reporting of its measure rates. The NOP has three options: agree to participate, do not agree to participate, and request to be withdrawn from participation.

**Numerator** – The upper portion of a fraction used to calculate a rate, proportion, or ratio.

**Patient Level Data** – Collection of data elements that depict the healthcare services provided to an individual (patient). Patient-level data are aggregated to generate data at the setting level (e.g., hospital) and/or comparison group data.

**Process** – An interrelated series of events, activities, actions, mechanisms, or steps that transform inputs into outputs.

**Reporting Period** – The defined time period for medical record review.
**Sampling Method** – Describes the process used to select a sample. Sampling approaches for the IPFQR Program are simple random sampling and systematic random sampling. Refer to the “Sampling Approaches” discussion in the Population and Sampling Specifications section of the respective manuals for further information.

**Sampling Size** – The number of individuals or particular patients included.

**Simple Random Sample** – A process in which a sample is selected from the total population in such a way that every case has a similar chance of being selected.

**Specifications Manual for Joint Commission National Quality Core Measures** – A manual that contains the specifications for The Joint Commission measures used in the IPFQR Program. This manual includes detailed information about the HBIPS measures, with a data dictionary and Measurement Information Forms.

**Specifications Manual for National Hospital Inpatient Quality Measures** – A manual that includes detailed information for the SUB, TOB, and IMM measures, with a data dictionary and Measurement Information Forms.

**Strata** – See stratified measure.

**Stratified Measure** – A measure that is classified into a number of categories to assist in analysis and interpretation. The overall or un-stratified measure evaluates all of the strata together. A stratified measure, or each stratum, consists of a subset of the overall measure. For example, the HBIPS measures are stratified by age group.

**Systematic Random Sampling** – A process in which the starting case is selected randomly and the next cases are selected according to a fixed interval based upon the number of cases in the population. Refer to the “Sampling Approaches” discussion in the Population and Sampling Specifications section of the respective manuals for further information.
Proposed Rule and Final Rule Publication Site

Every year, CMS publishes proposed program and policy changes to the IPFQR Program in April. The proposed changes are published to the Federal Register and are open to the public for review and comment for 60 days. CMS also provides notices through the QualityNet website to ensure broad awareness. Following the comment period, CMS summarizes the comments and responds to them in the final rule. The final rule is published in August.

IPFQR Program Requirements

IPFQR Program requirements are listed below. Click on the hyperlink imbedded within the text to be directed to detailed instructions for each step, as necessary.

**FY 2018**

1. Complete the *QualityNet Registration*.
   - This step must be accomplished for each *QualityNet Security Administrator (SA)* and user who will access the *QualityNet Secure Portal*.
   - Once registered, it is important that the SA(s) and user(s) maintain an active account by periodically logging into the system. CMS recommends that each IPF have at least two SAs, so that one can serve as a backup.

2. Complete the IPFQR Program *Notice of Participation* (NOP), indicating participation status.
   - Newly eligible facilities have 180 days from the Medicare Accept date to submit an NOP for the IPFQR Program.
   - An IPF NOP status of “Participating” must be on file in the *QualityNet Secure Portal* by the annual August 15 deadline in order to meet the NOP requirement. Once a participation status is selected, the status automatically carries over year after year.
   - Any eligible IPF that chooses not to participate in the program should contact the IPFQR Program VIQR Project Lead by emailing IPFQualityReporting@hcqis.org.

3. Collect measure data during the measure reporting period.
   - Newly participating facilities must start collecting measure data at the beginning of the first quarter following submission of the NOP.
   - The measure reporting period is January 1, 2016 through December 31, 2016 (1Q 2016 through 4Q 2016) for the nine chart-abstracted IPF quality measures.
   - IPFs are to report the status of the facility for the two structural measures as of December 31, 2016.
   - For the IMM-2 and the Influenza Vaccination Coverage Among Healthcare Personnel measures, the reporting period is October 1, 2016, through March 31, 2017.

4. Submit measure data before the annual data submission deadlines.
   - The Influenza Vaccination Coverage Among Healthcare Personnel measure data is due to the National Healthcare Safety Network (NHSN) by May 15, 2017.
   - The chart-abstracted IPF quality measures and two structural measures are due July 1, 2017, through August 15, 2017.

   **NOTE**: The claims-based measure will be calculated by CMS using Medicare fee-for-service Parts A and B claims data; therefore, no action is required by IPFs for this measure.

5. Complete the Data Accuracy and Completeness Acknowledgement (DACA) by the August 15, 2017, submission deadline.
FY 2019

1. Complete the *QualityNet Registration*.
   - This step must be accomplished for each *QualityNet Security Administrator (SA)* and user who will access the *QualityNet Secure Portal*.
   - Once registered, it is important that the SA(s) and user(s) maintain an active account by periodically logging into the system. CMS recommends that each IPF have at least two SAs, so that one can serve as a backup.

2. Complete the IPFQR Program *Notice of Participation* (NOP), indicating participation status.
   - Newly eligible facilities have 180 days from the Medicare Accept date to submit an NOP for the IPFQR Program.
   - An IPF NOP status of “Participating” must be on file in the *QualityNet Secure Portal* by the annual August 15 deadline in order to meet the NOP requirement. Once a participation status is selected, the status automatically carries over year after year.
   - Any eligible IPF that chooses not to participate in the program should contact the IPFQR Program VIQR Project Lead by emailing IPFQualityReporting@hcqis.org.

3. Collect measure data during the measure reporting period.
   - Newly participating facilities must start collecting measure data at the beginning of the first quarter following submission of the NOP.
   - The measure reporting period is January 1, 2017 through December 31, 2017 (1Q 2017 through 4Q 2017) for the 13 chart-abstracted IPF quality measures.
   - IPFs are to report the status of the facility for the two structural measures as of December 31, 2017.
   - For the IMM-2 and the Influenza Vaccination Coverage Among Healthcare Personnel measures, the reporting period is October 1, 2017, through March 31, 2018.

4. Submit measure data before the annual data submission deadlines.
   - The Influenza Vaccination Coverage Among Healthcare Personnel measure data is due to the National Healthcare Safety Network (NHSN) by May 15, 2018.
   - The chart-abstracted IPF quality measures and two structural measures are due July 1, 2018, through August 15, 2018.

   **NOTE:** The claims-based measures will be calculated by CMS using Medicare fee-for-service Parts A and B claims data; therefore, no action is required by IPFs for these measures.

5. Complete the Data Accuracy and Completeness Acknowledgement (DACA) by the August 15, 2018, submission deadline.
Section 2: Measure Specifications

Information for this program manual was developed for use by facilities participating in the CMS IPFQR Program. Measures adopted by CMS for the IPFQR Program are from a variety of sources, and unless otherwise indicated, the specifications are generally the same as those of the original measure steward. They are not intended to provide direction for reporting to The Joint Commission, the National Committee for Quality Assurance (NCQA), or NHSN. For detailed measure specifications, please refer to: The Specifications Manual for Joint Commission National Quality Core Measures, The Specifications Manual for National Hospital Inpatient Quality Measures, the Healthcare Effectiveness Data and Information Set (HEDIS®) Measures Technical Specifications, and the NHSN specifications.

The measure specifications are periodically updated by the measure stewards. IPFs and vendors must update their documentation and software when applicable, based on the published manuals.

Vendors supporting the IPFQR Program must be aware that the reporting and submission requirements for CMS may differ from those of The Joint Commission. Generally, measure specifications are released on a bi-annual basis, spanning two calendar quarters, in January and July of each year. When abstracting data for a particular quarter, it is important for the facility to use the specifications applicable to that quarter. For example, for IPFQR reporting applicable to the FY 2017 annual payment update, the quarters being collected are first quarter 2015 through fourth quarter 2015. This requires the facility to reference one HIQR Specifications Manual for collection of the first three quarters of 2015 and a different version of the HIQR Specifications Manual for the fourth quarter of 2015.

CMS requires the submission of aggregate numerator and denominator data. There are no patient-level data reported to CMS for the IPFQR Program.
Inpatient Psychiatric Facility Quality Measures

**FY 2018**

Effective for FY 2018 payment determination and subsequent years, CMS added two new measures to the IPFQR Program. Both are chart-abstracted measures:

- Tobacco Use Treatment Provided or Offered at Discharge (TOB-3) and the subset Tobacco Use Treatment at Discharge (TOB-3a)
- Alcohol Use Brief Intervention Provided or Offered (SUB-2) and the subset Alcohol Use Brief Intervention (SUB-2a)

CMS removed two measures from the IPFQR Program for the FY 2018 payment determination and subsequent years: Post Discharge Continuing Care Plan Created (HBIPS-6) and Post Discharge Continuing Care Plan Transmitted to Next Level of Care at Discharge (HBIPS-7).

**NOTE:** Data collection for the new measures begins with discharges in the first quarter of 2016. The measures are shown in the table below:

**Table 2: FY 2018 Measures**

* New quality measures for the FY 2018 payment determination and subsequent years.

In the FY 2016 IPF PPS Final Rule, CMS added the following three chart-abstracted measures:

- Transition Record with Specified Elements Received by Discharged Patients
- Timely Transmission of Transition Record
- Screening for Metabolic Disorders

IPFs will collect CY 2017 data for these three measures to submit to CMS in CY 2018 for FY 2019 payment determination.
Effective for FY 2019 payment determination and subsequent years, CMS will collect five new measures for the IPFQR Program.

Four are chart-abstracted measures:

- Transition Record with Specified Elements Received by Discharged Patients
- Timely Transmission of Transition Record
- Screening for Metabolic Disorders
- Alcohol and Other Drug Use Disorder Treatment Provided or Offered at Discharge (SUB-3) and the subset measure Alcohol and Other Drug Use Disorder Treatment at Discharge (SUB-3a)

One is a claims-based measure: 30-Day All-Cause Unplanned Readmission Following Psychiatric Hospitalization in an Inpatient Psychiatric Facility (IPF).

NOTE: Data collection for the new chart-abstracted measures begins with discharges in the first quarter of 2017. IPFs will not collect or report data for the new claims-based measure as CMS will complete the calculation. The measures are shown in the table below:

* New quality measures for the FY 2019 payment determination and subsequent years.
Identifying the IPFQR Patient Population

The initial selection of cases (i.e., patient medical records) intended for data abstraction under the IPFQR Program must be Medicare and non-Medicare patients receiving care in a psychiatric hospital or psychiatric unit paid under IPF PPS.

Identifying the Initial Patient Population

For details regarding the Initial Patient Population (IPP), please refer to each measure’s specifications:

- Hospital Based Inpatient Psychiatric Services (HBIPS) measure IPP details are found in the Specifications Manual for Joint Commission National Quality Measures.
- Substance Use (SUB), Tobacco Use (TOB), and Immunization (IMM) measure IPP details are found in the Specifications Manual for National Hospital Inpatient Quality Measures (Section 2 – Measure Information, Section 2.10 – Prevention).
- Transition Record with Specified Elements Received by Discharged Patients and Timely Transmission of Transition Record measures will use the entire population (all IPF discharges) and the IPP algorithm located in Appendix C of this Program Manual.
- Screening for Metabolic Disorders measure will use the entire population (all IPF discharges) as the Initial Patient Population.

HBIPS Population

The HBIPS measure set is unique in that there are two distinct Initial Patient Populations within the measure set, one for the event measures (HBIPS-2 and HBIPS-3) and one for the discharge measure (HBIPS-5).

Event Measures (HBIPS-2 and HBIPS-3)

All patients within an IPF or an acute care hospital/critical access hospital’s psychiatric unit reimbursed under IPF PPS during the reporting quarter are included in the initial patient population for events.

Facilities must use the entire Initial Patient Population for reporting, including all payer sources (Medicare and non-Medicare). The Event Measures (HBIPS-2 and HBIPS-3) are not eligible for sampling.

Discharge Measure (HBIPS-5)

The discharge measure HBIPS-5 can be sampled. For specific details regarding the Initial Patient Population and sampling, refer to the guidelines published within the HBIPS-5 section of the Specifications Manual for Joint Commission National Quality Measures.
**SUB, TOB, IMM, Transition and Metabolic Screening Measures**

**Population**

Data for the following measures are collected from patients within IPF or acute care hospital / critical access hospital psychiatric units that are reimbursed under IPF PPS during the reporting period: SUB-1, SUB-2/-2a, TOB-1, TOB-2/-2a, TOB-3/-3a, IMM-2, Transition, and Metabolic Screening

**NOTE:** The initial patient population for the SUB, TOB, IMM, Transition, and Metabolic Screening measure sets differs for CMS IPF reporting as compared to The Joint Commission.

**Sampling**

IPFs are **not** required to sample. IPFs submit data for either a complete population of cases or a random sample for each of the measure sets covered by the quality measures. Per the FY 2016 IPF PPS Final Rule, IPFs are no longer required to report measure data by quarter and age strata. If the initial patient population size does not exceed the minimum number of cases per year for the measure set, the facility must submit 100% of the initial patient population.

**NOTE:** Sampling is not allowed for HBIPS-2, HBIPS-3, and the Influenza Vaccination Coverage Among Healthcare Personnel measures.
**FY 2018/FY 2019 Payment Determination and Subsequent Years**

Data collected by IPFs during the 2016 calendar year will be reported to CMS in 2017 and impact the FY 2018 payment determination. Data collected by IPFs during the 2017 calendar year will be reported to CMS in 2018 and impact the FY 2019 payment determination. IPFs will have two options from which to choose with respect to sampling of measure data.

**Option 1:** IPFs may choose to continue referencing the sampling guidelines described in the following manuals:
- *Specifications Manual for Joint Commission National Quality Measures* HBIPS-5 measure only
- *Specifications Manual for National Hospital Inpatient Quality Measures* SUB and TOB measures, IMM-2, Transition Record with Specified Elements Received by Discharged Patients; Timely Transmission of Transition Record; and Screening for Metabolic Disorders measures.

**NOTE:** As stated in Table 3: FY 2019 Measures, IPFs will begin reporting data for the Transition Record with Specified Elements Received by Discharged Patients, Timely Transmission of Transition Record, and Screening for Metabolic Disorders measures with the FY 2019 payment determination year. IPFs can use the sampling guidelines in the Specifications Manual for National Hospital Inpatient Quality Measures for the Transition Record with Specified Elements Received by Discharged Patients, Timely Transmission of Transition Record, and Screening for Metabolic Disorders measures, *after* determining each measure’s Initial Patient Population, even though the new measures are not listed in that manual.

**Option 2:** IPFs may choose to use the sampling guidelines described in the table below. This option was adopted in the FY 2016 IPF PPS Final Rule and goes into effect for the FY 2018 payment determination year. The guidelines listed in the “IPFQR Global Population and Sampling” table can be applied to the following measures: HBIPS-5, the SUB and TOB measures, IMM-2, Transition Record with Specified Elements Received by Discharged Patients; Timely Transmission of Transition Record; and Screening for Metabolic Disorders.

Chart Abstraction

The facility may elect to use a vendor to electronically enter their data and obtain the aggregate data to be manually entered in the CMS web-based measure tool via the QualityNet Secure Portal. The facility may authorize the vendor to enter the data on its behalf; however, the facility is responsible for the data. For facilities that do not have a vendor tool, a paper-based data collection tool is available for manual collection of the data elements for each case. The tool is arranged to follow the measure process flow, or algorithm, to assist in determining whether the case is included or excluded for the measure population and determining the measure outcome. The facility must also have access to the data definitions from the associated Specifications Manual to ensure the collection of valid and reliable data. Refer to the Resources section of the manual for more information about the paper-based data collection tools.

Chart-Based Measures: HBIPS-2, -3, and -5

The HBIPS measure set was developed by The Joint Commission as part of a group of global measure sets. Although CMS is collecting the aggregate numerators and denominators for each HBIPS measure, it is necessary to collect the patient level data for each measure as defined in the applicable Specifications Manual. The data dictionary provides important details about each of the data elements needed to determine the numerators and denominators of each measure.

HBIPS-2: Hours of Physical Restraint Use
The use of physical restraints increases a patient’s risk of physical and psychological harm. This intervention is intended for use only if a patient is in imminent danger to him/herself or others and if less restrictive interventions have failed. It is not intended to address staff shortages or to be used as a form of discipline or coercion. This measure evaluates the total number of hours that all patients admitted to the IPF were maintained in physical restraints.

The numerator is defined as the total number of hours that all psychiatric inpatients were maintained in physical restraint. The denominator is defined as the number of psychiatric inpatient hours overall. Total leave days are excluded from the denominator.

HBIPS-3: Hours of Seclusion Use
The use of seclusion increases a patient’s risk of physical and psychological harm. This intervention is intended for use only if a patient is in imminent danger to him/herself or others and if less restrictive interventions have failed. It is not intended to address staff shortages or to be used as a form of discipline or coercion. This measure is reported as the total number of hours of seclusion use for all patients admitted to an IPF.

The numerator is defined as the total number of hours all psychiatric inpatients were held in seclusion. The denominator is defined as the number of psychiatric inpatient hours overall. Total leave days are excluded from the denominator.
**HBIPS-5: Patients Discharged on Multiple Antipsychotic Medications with Appropriate Justification**

This measure is collected on those patients discharged on multiple antipsychotics and is reported as the rate of patients discharged on multiple antipsychotics with appropriate justification. The Joint Commission has identified the following justifications as appropriate reasons for discharging a patient on multiple antipsychotics:

- The medical record contains a documented minimum of three failed trials with monotherapy.
- The medical record contains documentation of either a plan that tapers to monotherapy or one that decreases the dosage of one or more antipsychotic medications while increasing the dosage of another to a level that manages the patient’s symptoms with one antipsychotic medication (i.e., cross-tapering).
- The medical record contains documentation of augmentation of Clozapine.

Higher rates on HBIPS-5 indicate higher quality of care because documenting the reasons for assigning two or more antipsychotics suggests that careful consideration of the benefits of this course of treatment were weighed against the potential patient side effects.

The **numerator** statement is defined as psychiatric inpatients discharged on two or more routinely scheduled antipsychotic medications with appropriate justification. The **denominator** is defined as psychiatric inpatients discharged on two or more routinely scheduled antipsychotic medications, with or without justification. The measure excludes patients who died, patients with an unplanned departure resulting in discharge due to elopement, patients with an unplanned departure resulting in discharge due to failing to return from leave, and patients with a length of stay less than or equal to three days.

For detailed HBIPS measure information, including specific data element definitions, please refer to the **Specifications Manual for Joint Commission National Quality Measures** at [https://manual.jointcommission.org/](https://manual.jointcommission.org/). The measure information is contained in Section 1 under the Measure Information Forms Section. The HBIPS data elements are located under Section 2 – Data Dictionary.
**Chart-Based Measures: SUB, TOB, IMM-2, Transition Record, and Screening for Metabolic Disorders**

As with the HBIPS measures, it is necessary to collect patient-level data, as defined in the applicable Specifications Manual. Facilities are required to submit aggregate data (one numerator and one denominator) for the entire reporting period.

**SUB-1: Alcohol Use Screening**

Individuals with mental health conditions experience substance use disorders (SUDs) at a much higher rate than the general population. Individuals with the most serious mental illnesses have the highest rates of such disorders. Co-occurring SUDs often go undiagnosed and, without treatment, contribute to a longer persistence of disorders, poorer treatment outcomes, lower rates of medication adherence, and greater impairments to functioning. This measure is intended to assess efforts by IPFs to screen for the most common type of such disorder, alcohol abuse.

The **numerator** is defined as the number of patients who were screened for alcohol use using a validated screening questionnaire within the first day of admission. The **denominator** is defined as the number of psychiatric inpatients 18 years of age and older. The measure excludes patients who are less than 18 years of age, are cognitively impaired, or have Comfort Measures Only documented. Exclusions based on length of stay (LOS) are determined using the current Specifications Manual.

**SUB-2 (Alcohol Use Brief Intervention Provided or Offered) and the subset SUB-2a (Alcohol Use Brief Intervention)**

Clinical trials have demonstrated that brief interventions, especially prior to the onset of addiction, significantly improve health and reduce costs, and that similar benefits occur in those with addictive disorders who are referred to treatment.

The **SUB-2 numerator** is defined as the number of patients who screened positive for unhealthy alcohol use who received or refused a brief intervention during the hospital stay. The **SUB-2a numerator** is defined as the number of patients who received a brief intervention. The **denominator** for both measures is the number of patients 18 years of age and older who screen positive for unhealthy alcohol use or an alcohol use disorder (alcohol abuse or alcohol dependence). The measure excludes patients who are less than 18 years of age, are cognitively impaired, patients who refused or were not screened for alcohol use during the hospital stay, or have Comfort Measures Only documented. Exclusions based on length of stay (LOS) are determined using the current Specifications Manual.

**SUB-3: Alcohol and Other Drug Use Disorder Treatment Provided or Offered at Discharge) and the subset SUB-3a: Alcohol and Other Drug Use Disorder Treatment at Discharge**

Currently, less than one in twenty patients with an addiction are referred for treatment. Hospitalization provides a prime opportunity to address the entire spectrum of substance use problems within the health care system. Approximately 8% of general hospital inpatients and 40 to 60 percent of traumatically-injured inpatients and psychiatric inpatients have substance use disorders.
The SUB-3 numerator is defined as the number of patients who received or refused at discharge a prescription for medication for treatment of alcohol or drug use disorder OR received or refused a referral for addictions treatment. The SUB-3a numerator is defined as the number of patients who received a prescription at discharge for medication for treatment of alcohol or drug use disorder OR a referral for addictions treatment. The denominator for both measures is the number of hospitalized inpatients 18 years of age and older identified with an alcohol or drug use disorder. The measure excludes patients who are less than 18 years of age, are cognitively impaired, do not meet criteria for an alcohol use disorder, have Comfort Measures Only documented, or do not reside in the United States. Exclusions based on length of stay (LOS) are determined using the current Specifications Manual.

For SUB-1, SUB-2/-2a and SUB-3/-3a measure information, please refer to the Specifications Manual for National Hospital Inpatient Quality Measures.

**TOB-1: Tobacco Use Screening**

Tobacco use is currently the single greatest cause of disease in the U.S., accounting for more than 435,000 deaths annually. Smoking is a known cause of multiple cancers, heart disease, stroke, complications of pregnancy, chronic obstructive pulmonary disease, other respiratory problems, poorer wound healing, and many other diseases. This health issue is especially important for persons with mental illness and substance use disorders.

The TOB-1 chart-abstracted measure assesses hospitalized patients who are screened for tobacco use (cigarettes, smokeless tobacco, pipe, and cigar) within the previous 30 days. The numerator includes the number of patients who were screened for tobacco use within the first day of admission. The denominator includes the number of hospitalized patients 18 years of age and older. The measure excludes patients who are less than 18 years of age, are cognitively impaired or have Comfort Measures Only documented. Exclusions based on length of stay (LOS) are determined using the current Specifications Manual.

**TOB-2 (Tobacco Use Treatment Provided or Offered) and TOB-2a (Tobacco Use Treatment)**

The Tobacco Use Treatment Provided or Offered (TOB-2) chart-abstracted measure is reported as an overall rate that includes all patients to whom tobacco use treatment was provided or offered and refused. A second rate (Tobacco Use Treatment TOB-2a), a subset of the first, includes only those patients who received tobacco use treatment.

The overall rate, TOB-2, assesses patients identified as tobacco product users within the past 30 days who receive or refuse practical counseling to quit and receive or refuse Food and Drug Administration (FDA)-approved cessation medications. The numerator includes the number of patients who received or refused practical counseling to quit and received or refused FDA-approved cessation medications or had a reason for not receiving the medication.

The second rate, TOB-2a, assesses patients who received counseling and medication, as well as those who received counseling and had a reason for not receiving the medication. The numerator includes the number of patients who received practical counseling to quit and received FDA-approved cessation medications or had a reason for not receiving the medication.
The **denominator** for both TOB-2 and TOB-2a includes the number of hospitalized patients 18 years of age and older identified as current tobacco users. The measure excludes patients who are less than 18 years of age, are cognitively impaired, are not current tobacco users, refused or were not screened for tobacco use during the hospital stay or have Comfort Measures Only documented. Exclusions based on LOS are determined using the current *Specifications Manual*.

**TOB-3 (Tobacco Use Treatment Provided or Offered at Discharge) and TOB-3a (Tobacco Use Treatment at Discharge)**

The overall rate, TOB-3, assesses patients identified as tobacco product users within the past 30 days who were referred to or refused evidence-based outpatient counseling AND received or refused a prescription for FDA-approved cessation medication upon discharge. The **numerator** includes patients who were referred to or refused evidence-based outpatient counseling AND received or refused a prescription for FDA-approved cessation medication at discharge.

The second rate, TOB-3a, assesses patients who were referred to evidence-based outpatient counseling AND received a prescription for FDA-approved cessation medication upon discharge as well as those who were referred to outpatient counseling and had a reason for not receiving a prescription for medication. The **numerator** includes patients who were referred to evidence-based outpatient counseling AND received a prescription for FDA-approved cessation medication at discharge.

The **denominator** for both TOB-3 and TOB-3a includes the number of hospitalized patients 18 years of age and older identified as current tobacco users. The measure excludes patients who are less than 18 years of age, are cognitively impaired, are not current tobacco users, refused or were not screened for tobacco use during the hospital stay, have Comfort Measures Only documented, patients who expired, patients who left against medical advice, patients discharged to another hospital, patients discharged to another health care facility, patients discharged to home for hospice care, or patients who do not reside in the United States. Exclusions based on LOS are determined using the current *Specifications Manual*.

For TOB measure information, please refer to the *Specifications Manual for National Hospital Inpatient Quality Measures*.

**IMM-2: Influenza Immunization**

Increasing influenza (flu) vaccination can reduce unnecessary hospitalizations and secondary complications, particularly among high risk populations such as the elderly. Each year, approximately 226,000 people in the U.S. are hospitalized with complications from influenza, and between 3,000 and 49,000 die from the disease and its complications. Vaccination is the most effective method for preventing influenza virus infection and its potentially severe complications, and vaccination is associated with reductions in influenza among all age groups.

This prevention measure addresses hospitalized inpatients age 6 months and older who were screened for seasonal influenza immunization status and were vaccinated prior to discharge if indicated. The **numerator** captures two activities: screening and the intervention of vaccine administration when indicated. As a result, patients who had documented contraindications to the vaccine, patients who were offered and declined the vaccine, and patients who received the vaccine during the current year’s influenza season (but prior to the current hospitalization) are
captured as numerator events. The **denominator** is the number of inpatients age 6 months and older discharged during October, November, December, January, February or March.

For IMM-2 measure information, including a list of exclusions, please refer to the *Specifications Manual for National Hospital Inpatient Quality Measures*.

**Transition Record with Specified Elements Received by Discharged Patients**

Providing detailed discharge information enhances the preparation of patients to self-manage post-discharge care and comply with treatment plans. Additionally, randomized trials have shown that many hospital readmissions can be prevented by patient education, pre-discharge assessment, and domiciliary aftercare. One recent study found that patients participating in a hospital program providing detailed, personalized instructions at discharge, including a review of medication routines and assistance with arranging follow-up appointments, had 30% fewer subsequent emergency visits and hospital readmissions than patients who received usual care at discharge.

The Transition Record with Specified Elements Received by Discharged Patients measure assesses the percentage of patients, regardless of age, discharged from an IPF to home or any other site of care, or their caregiver(s), who received a transition record (and with whom a review of all included information was documented) at the time of discharge including, at a minimum, all of the specified elements.

The **numerator** is comprised of patients or their caregiver(s) who received a transition record (and with whom a review of all included information was documented) at the time of discharge including, at a minimum, all of the following elements:

**Inpatient Care**
- Reason for inpatient admission, AND
- Major procedures and tests performed during inpatient stay and summary of results, AND
- Principal diagnosis at discharge

**Post-Discharge/ Patient Self-Management**
- Current medication list, AND
- Studies pending at discharge (e.g., laboratory, radiological), AND
- Patient instructions

**Advance Care Plan**
- Advance directives or surrogate decision maker documented OR documented reason for not providing advance care plan

**Contact Information/Plan for Follow-up Care**
- 24-hour/7-day contact information including physician for emergencies related to inpatient stay, AND
- Contact information for obtaining results of studies pending at discharge, AND
- Plan for follow-up care, AND
- Primary physician, other health care professional, or site designated for follow-up care
All eleven elements must be captured to satisfy the measure numerator. Please refer to the definitions following this section for additional guidance pertaining to the required elements for this measure.

The denominator includes all patients, regardless of age, discharged from the inpatient facility to home/self-care or any other site of care. The measure excludes patients who died or left against medical advice (AMA) or discontinued care.

**Timely Transmission of Transition Record**

The availability of the patient’s discharge information at the first post-discharge physician visit improves the continuity of care and may be associated with a decreased risk of re-hospitalization.

The measure assesses the percentage of patients, regardless of age, discharged from an inpatient facility (e.g., hospital inpatient or observation, skilled nursing facility, or rehabilitation facility) to home or any other site of care for whom a transition record was transmitted to the facility or primary physician or other health care professional designated for follow-up care within 24 hours of discharge.

The numerator includes patients for whom a transition record was transmitted to the facility or primary physician or other health care professional designated for follow-up care within 24 hours of discharge. All eleven elements must be captured and transmitted within 24 hours to satisfy the measure numerator.

The denominator includes all patients, regardless of age, discharged from an IPF to home/self-care or any other site of care. The measure excludes patients who died or left against medical advice (AMA) or discontinued care.

Please refer to the definitions following this section for additional guidance pertaining to the required elements for this measure.
Definitions for Transition Record Measures

The following is a list of data elements and their definitions as they pertain to the Transition Record with Specified Elements Received by Discharged Patients and Timely Transmission of Transition Record measures.

24-hour/7-day contact information including physician for emergencies related to inpatient stay – Physician, health care team member, or other health care personnel who have access to medical records and other information concerning the inpatient stay and who could be contacted regarding emergencies related to the stay. 800 numbers, crisis lines, or other general emergency contact numbers do not meet this requirement unless personnel have access to the medical records and other information concerning the inpatient stay.

Advance Directive – A written, signed statement that details the patient’s preferences for treatment should the patient be unable to make such decisions for him/herself, whether that incapacitation is due to psychiatric or non-psychiatric (medical) reasons. The statement informs others about what treatment the patient would or would not want to receive from psychiatrists and/or other health professionals concerning both psychiatric and non-psychiatric care.

Advance Directives must be compliant with the state laws for the state in which the patient receives care. More information on advance directives for non-psychiatric care can be found at: http://www.caringinfo.org/i4a/pages/index.cfm?pageid=3289. Information on psychiatric advance directives can be found at: http://www.nrc-pad.org/.

The federal law regarding advance directives, the Patient Self-Determination Act of 1990, requires health care providers to advise individuals of their right to accept or reject medical treatment and their right to make advance directives or written instructions about their treatment in case they should become incapacitated. Decisions to accept or reject life-sustaining treatments must be made voluntarily by a competent and informed patient, or, if the patient is incapacitated, by another appropriately informed individual acting on the patient’s behalf. Information on the Patient Self-Determination Act (PSDA) (http://www.nrc-pad.org/images/stories/PDFs/fedaddirectives2a.pdf), the components of a Psychiatric Advance Directive (PAD) (http://www.samhsa.gov/section-223/governance-oversight/directives-behavioral-health) and a sample PAD are in an appendix of the IPFQR Program Manual at http://www.qualityreportingcenter.com/inpatient/ipt/tools/.

Advance directives or surrogate decision maker documented OR documented reason for not providing advance care plan - This element can be met if one of the following is documented:

a. The patient has an appointed surrogate decision maker.

c. If (a) or (b) was not met, the patient was offered information about designating a surrogate decision maker or completing Advance Directives, and if the criteria for (a) or (b) still were not met, a reason was documented.
This element does not require that all patients have advanced directives. However, if a patient does not have advance directives or a surrogate decision maker, a reason must be documented. IPFs are expected to provide patients the opportunity to complete both types of advance directives prior to discharge to the extent allowable by law in the state in which the IPF resides. Copies of the non-psychiatric and psychiatric advance directives do not need to be transmitted to the follow-up provider and the patient need not create any advance directives to satisfy this element. Advance Directives must be compliant with the state laws for the state in which the patient receives care. Additional information can be found in the definition of the term “Advance Directive.”

**Contact information for obtaining results of studies pending at discharge** - Healthcare professional or facility contact number at which patient can receive information on studies that were not concluded at discharge. Patient preference should be considered in sharing results of studies, including whether results should be provided on paper. If there is documentation in the transition record indicating that no tests are pending at discharge, then this will satisfy the element.

**Contact information / plan for follow-up care** – For patients discharged to home, all 11 elements are to be shared with the patient and/or caregiver. For patients discharged to an inpatient facility, the following four elements are to be discussed between the discharging and the receiving facilities.
- 24-hour/7-day contact information, including physician for emergencies related to inpatient stay, AND
- Contact information for obtaining results of studies pending at discharge, AND
- Plan for follow-up care, AND
- Primary physician, other health care professional, or site designated for follow-up care

**Current medication list** – The current medication list should include prescription medications, over-the-counter medications, and herbal products in the following categories:

- **Medications to be TAKEN by patient**: Medications prescribed prior to IPF stay to be continued after discharge AND new medications started during the IPF stay to be continued after discharge AND newly prescribed or recommended medications to be taken after discharge. Prescribed or recommended dosage, special instructions/considerations, and intended duration must be included for each continued and new medication listed. A generalized statement regarding intended duration, such as a blanket statement indicating that the patient should continue the medications until told to stop, would be acceptable for routine medications.

- **Medications NOT to be taken by patient**: Medications (prescription, over-the-counter and herbal products) taken by the patient before the inpatient stay that should be discontinued or withheld after discharge.

**Discontinued care** – This definition includes elopement and failure to return from leave, as defined below.

- **Elopement**: The National Quality Forum (NQF) defines elopement as any situation in which an admitted patient leaves the healthcare facility without staff’s knowledge. In these cases, effective discharge planning cannot be performed.
Failure to return from leave: This occurs when a patient does not return at the previously agreed upon date and time for continued care. If the patient fails to return from leave, then the patient has left care without staff’s knowledge. In these cases, effective discharge planning cannot be accomplished.

**Documented reason for not providing advance care plan** – Documentation that advance directive or surrogate decision maker was discussed but patient did not wish or was not able to name a surrogate decision maker or provide an advance directive; OR, documentation as appropriate that the patient's cultural and/or spiritual beliefs preclude a discussion of advance care planning or a surrogate decision maker, as it would be viewed as harmful to the patient's beliefs and thus harmful to the physician-patient relationship.

**Inpatient facility** – Site of care delivery to include hospital inpatient or observation, skilled nursing facility, rehabilitation facility, or inpatient psychiatric facility (IPF).

**Major procedures and tests performed during inpatient stay and summary of results** – All procedures and tests noteworthy in supporting patients’ diagnosis, treatment, or discharge plan as determined by provider or facility. Examples may include: complete blood count and metabolic panel, urinalysis, or radiological imaging. If there is documentation in the transition record indicating that no major procedures or tests were performed, then this will satisfy the element.

**Patient instructions** – Directions for patient and/or caregiver to follow upon discharge from the facility. Examples include: medication information, dietary or activity restrictions, warning signs and symptoms associated with the condition, information regarding what to do if the patient is experiencing a relapse of symptoms, etc. Patient instructions should be appropriate for the patient, including the use of language services as appropriate.

**Plan for follow-up care** – A plan for follow-up care that describes treatment and other supportive services to maintain or optimize patient health. The plan should include post-discharge therapy needed, any durable medical equipment needed, family/psychosocial/outpatient resources available for patient support, self-care instructions, etc. The plan may also include other information, such as appointment with outpatient clinician (if available), follow-up for medical issues, social work and benefits follow-up, pending legal issues, peer support (i.e. Alcoholics Anonymous, Narcotics Anonymous), and home-based services. The plan should be developed with consideration of the patient’s goals of care and treatment preferences.

**Primary physician, other health care professional, or site designated for follow-up care** – The primary care physician (PCP), medical specialist, psychiatrist or psychologist, or other physician or health care professional who will be responsible for appointments after inpatient visit. A site of care may include a group practice specific to psychiatric care. A hotline or general contact does not suffice for follow-up care.

**Principal Diagnosis at Discharge** – The final principal diagnosis at the time of discharge.

**Reason for IPF Admission** – The events the patient experienced prior to this hospitalization; the reason for hospitalization may be a short synopsis describing or listing the triggering or precipitating event. A diagnosis alone is not sufficient.

**Studies pending at discharge** – Medical tests not concluded at discharge. Examples include: complete blood count and metabolic panel, urinalysis, radiological imaging. If there is
documentation in the transition record indicating that no tests are pending at discharge, then this will satisfy the element.

**Surrogate decision maker** – Health care proxy who acts as the patient’s advocate when he/she is legally incapacitated and unable to make decisions for him/herself about personal health care. A surrogate decision maker must be designated by the patient in a way that complies with the state’s laws for the state in which the patient receives care.

**Transition record** – A core, standardized set of data elements related to patient’s demographics, diagnosis, treatment, and care plan that is discussed with and provided to the patient in a printed or electronic format at each transition of care and transmitted to the facility/physician/other health care professional providing follow-up care. The transition record may only be provided in electronic format if acceptable to the patient and only after all components have been discussed with the patient.

**Transmitted** – A transition record may be transmitted to the facility or physician or other health care professional designated for follow-up care via mail, fax, and secure email. If the follow-up healthcare professional has access to the electronic health record (EHR), this must be documented as the transmission method. It is also acceptable to provide a hard copy of the transition record to the personnel transporting the patient to the receiving facility. The time and method of transmission must be documented.

**Within 24 hours of discharge** – Calculated as 24 consecutive hours from the time the facility ordinarily records the patient discharge.

For measure information, please refer to the measure specifications for the NQF #0647 (Transition Record of Specified Data Elements for Discharged Patients) and #0648 (Timely Transmission of Transition Record) measures, which can be downloaded from the NQF website: [http://www.qualityforum.org/ProjectMeasures.aspx?projectID=83375](http://www.qualityforum.org/ProjectMeasures.aspx?projectID=83375).
Screening for Metabolic Disorders

Studies show that both second generation antipsychotics (SGAs) and antipsychotics increase the risk of metabolic syndrome. Metabolic syndrome is a cluster of conditions that occur together, including excess body fat around the waist, high blood sugar, high cholesterol, and high blood pressure, and increases the risk of coronary artery disease, stroke, and type 2 diabetes.

In 2004, a consensus statement was released by the American Diabetes Association (ADA), the American Psychiatric Association (APA), the American Association of Clinical Endocrinologists, and the North American Association for the Study of Obesity regarding an association between the use of specific SGAs and diabetes and obesity. This group recommended that providers obtain baseline screening for metabolic syndrome prior to or immediately after the initiation of antipsychotics to reduce the risk of preventable adverse events and improve the physical health status of the patient.

The Screening for Metabolic Disorders measure was developed to assess the percentage of patients discharged from an IPF for which a structured metabolic screening for four elements was completed in the past year. Additional information regarding the clinical support for this measure may be found in the FY 2016 IPPS Final Rule at http://www.gpo.gov/fdsys/pkg/FR-2015-08-05/pdf/2015-18903.pdf.

The numerator is the total number of patients who received a metabolic screening either prior to, or during, the index IPF stay. The screening must contain four tests: (1) BMI; (2) blood pressure; (3) glucose or HbA1c; and (4) a lipid panel – which includes total cholesterol (TC), triglycerides (TG), high-density lipoprotein (HDL), and low-density lipoprotein cholesterol (LDL-C) levels. The screening must have been completed at least once in the 12 months prior to the patient’s date of discharge. Screenings can be conducted either at the reporting facility or another facility for which records are available to the reporting facility.

The denominator includes IPF patients discharged with one or more routinely scheduled antipsychotic medications during the measurement period. The measure excludes patients for whom a screening could not be completed within the stay due to the patient’s enduring unstable medical or psychological condition and patients with a length of stay equal to or greater than 365 days or equal to or less than 3 days.

Additional details about the Screening for Metabolic Disorders measure, including a data dictionary and algorithm, are located in Appendix D of this Program Manual.
Claims Based Measure: Follow-Up After Hospitalization for Mental Illness (FUH)

This measure assesses the percentage of inpatient psychiatric facility (IPF) hospitalizations for treatment of select mental health disorders that were followed by an outpatient mental health care encounter. Two rates are reported:

- The percentage of discharges for which the patient received follow-up within 7 days of discharge
- The percentage of discharges for which the patient received follow-up within 30 days of discharge

The performance period used to identify cases in the denominator includes the first 11 months of the measurement year. The measurement year begins on July 1. Data from July 1 through June 30 are used to identify whether each case meets the numerator criteria.

As this is a claims-based measure there is no action required by facilities to collect and submit data for this measure. CMS will calculate the measure outcome using Part A and Part B claims data that are received by Medicare for payment purposes. CMS will calculate this measure by linking Medicare fee-for-service (FFS) claims submitted by IPFs and subsequent outpatient providers for Medicare FFS IPF discharges. This approach requires no additional data collection or reporting by IPFs. Completion of this measure does not affect an IPF’s payment determination.

Refer to Section 9: Resources > Claims-Based Measure Specifications of this program manual for information on where to find a claims-based measure specifications document on the QualityNet and Quality Reporting Center websites.

Claims Based Measure: 30-Day All-Cause Unplanned Readmission Following Psychiatric Hospitalization in an Inpatient Psychiatric Facility (IPF) – Version 1.0

Readmission to acute care settings following discharge from inpatient psychiatric facilities (IPF) is both costly to Medicare and undesirable for patients. Readmission is an undesirable outcome because it represents deterioration in a patient’s mental and/or physical health status severe enough to require a return to an acute level of care. Additionally, another hospitalization exposes patients to risks of healthcare-acquired complications. While not all readmissions are preventable, there is evidence that improvements to the quality of care for patients in the IPF setting can reduce readmission rates, which, in turn, would reduce costs to Medicare and the burden to patients and their caregivers.

The 30-Day All-Cause Unplanned Readmission Following Psychiatric Hospitalization in an IPF measure estimates an unplanned, 30-day, risk-standardized readmission rate for adult Medicare fee-for-service (FFS) patients with a principal discharge diagnosis of a psychiatric disorder or dementia/Alzheimer’s disease. This measure reflects the quality of care provided to patients at IPFs by providing a reliable comparison between an individual IPF risk-standardized readmission rate and a national readmission rate. This incentive for quality improvement could lead to a reduction in the national rates and a reduction in the variation in rates across facilities.
As this is a claims-based measure, CMS will calculate the measure outcome using information from the following three sources: Medicare Denominator file, Medicare FFS Part A records, and Medicare FFS Part B records. The Medicare Denominator file contains patient demographic, enrollment, and vital status information for all beneficiaries enrolled during the calendar year. Part A data contain final action claims submitted by institutional providers for reimbursement of inpatient and outpatient services provided to beneficiaries. Institutional providers include acute care and critical access hospitals, inpatient psychiatric facilities, home health agencies, and skilled nursing facilities. Part B data contain final action claims submitted by non-institutional providers including physicians, physician assistants, clinical social workers, nurse practitioners, and other providers, such as clinical laboratories and ambulance providers.

This approach requires no additional data collection or reporting by IPFs. Completion of this measure does not affect an IPF’s payment determination.

**NOTE:** This measure is collected by CMS through claims data. There is no action required by facilities to collect and submit data for this measure.

The **eligible population** includes any eligible admission to an inpatient psychiatric facility during the measurement period to which 30-day unplanned admissions are attributed. Index admissions define the measure denominator.

The **denominator** includes admissions to IPFs for patients:
- Age 18 or older at admission
- Discharged alive
- Enrolled in Medicare FFS Parts A and B during the 12 months before the admission date, month of admission, and at least one month after the month of discharge from the index admission
- Discharged with a principal diagnosis of psychiatric illness included in one of the Agency for Healthcare Research and Quality (AHRQ) Clinical Classification Software (CCS) ICD groupings.

The **denominator** excludes admissions for patients:
- Discharged against medical advice (AMA) because the IPF may have limited opportunity to complete treatment and prepare for discharge.
- With unreliable demographic and vital status data defined as:
  - Age greater than 115 years
  - Missing gender
  - Discharge status of “dead” but with subsequent admissions
  - Death date prior to admission date
  - Death date within the admission and discharge dates but the discharge status was not “dead”
- With admissions that end in a transfer:
  - Transfers are defined as admission to another IPF or acute care facility on the same day or day following discharge
  - The hospital that discharges the patient to home or a non-acute care setting is accountable for subsequent readmissions.
- With interrupted stays:
  - Interrupted stays are defined as admission to the IPF within two days of discharge
Readmissions to the same IPF within two days of discharge are combined into the same claims as the index admission and do not appear as readmissions due to the interrupted stay billing policy.

The numerator is defined as an admission to an inpatient psychiatric or acute care hospital, including critical access hospitals, within 30-days of discharge from an eligible inpatient psychiatric admission (index admission). The numerator excludes readmissions that are considered planned by the CMS 30-Day HWR Planned Readmission Algorithm, Version 3.0.

The measure is risk adjusted using hierarchical logistic regression model. Four types of risk factors are included in the model:
1. Demographics
2. Principal discharge diagnosis of the IPF index admission
3. Comorbidities
4. Other variables from the literature that were identified as predictors of readmission in the psychiatric patient population

Refer to Section 9: Resources > Claims-Based Measure Specifications of this program manual for information on where to find a claims-based measure specifications document on the QualityNet and Quality Reporting Center websites.
Attestations

Assessment of Patient Experience of Care

Improvement of experience of care for patients, families, and caregivers is one of the objectives within the CMS Quality Strategy and is not currently addressed in the IPFQR Program. Surveys of individuals about their experience in all healthcare settings provide important information as to whether or not high-quality, person-centered care is actually provided and address elements of service delivery that matter most to recipients of care.

The measure asks IPFs whether they routinely assess patient experience of care using a standardized collection protocol and a structured instrument. The attestation should be based on the hospital’s activities on December 31.

NOTE: This is a measure that does not depend on systems for collecting and abstracting individual patient information and only requires simple attestation.

Use of Electronic Health Record

A measure of the degree of EHR implementation provides important information about an element of healthcare service delivery shown to be associated with the delivery of quality care. It provides useful information to consumers and others in choosing among different facilities. A key issue in EHR adoption and implementation is the use of this technology to support health information exchange. The Office of the National Coordinator for Health Information Technology (ONC) and CMS work to promote the adoption of health information technology. The use of certified EHRs by IPFs can effectively and efficiently help providers improve internal care delivery practices, support the exchange of important information across care partners and during transitions of care, and could enable the reporting of electronically specified clinical quality measures (eCQMs).

The measure will assess the degree to which facilities employ EHR systems in their service program and use such systems to support health information exchange at times of transitions in care. It is a structural measure that only requires the facility to attest to one of three statements that best describes the facility’s highest level typical use of an EHR system (excluding the billing system) during the reporting period, and whether this use includes the exchange of interoperable health information with a health information service provider. The three statements are as follows:

- The facility most commonly used paper documents or other forms of information exchange (for example, email) not involving the transfer of health information using EHR technology at times of transitions in care.
- The facility most commonly exchanged health information using non-certified EHR technology (that is, not certified under the ONC HIT Certification Program) at times of transitions in care.
- The facility most commonly exchanged health information using certified EHR technology (certified under the ONC HIT Certification Program) at times of transitions in care.

The attestation should be based on the hospital’s activities on December 31.
After selecting the appropriate statement regarding the facility’s typical use of an EHR system, an IPF must then respond to the following question with a Yes or No answer:

Did the transfers of health information at times of transitions in care include the exchange of interoperable health information with a health information service provider (HISP)?

A HISP manages security and transport of health information exchange among health care entities or individuals using the Direct standard for transport. HISP functions can be performed by existing organizations (such as EHR vendors or hospitals or HIE organizations) or by standalone organizations specializing in security and transport of health information.

NOTE: This is a measure that does not depend on systems for collecting and abstracting individual patient information and only requires simple attestation.

**NHSN-Collected Measure: Influenza Vaccination Coverage Among Healthcare Personnel (HCP)**

The HCP measure assesses the percentage of HCP who receive the influenza vaccination. The measure is designed to ensure that reported HCP influenza vaccination percentages are consistent over time within a single healthcare facility, as well as comparable across facilities.

The denominator includes the number of HCP working in the healthcare facility for at least one working day between October 1 and March 31 of the following year, regardless of clinical responsibility or patient contact, and is calculated separately for employees, licensed independent practitioners, and adult students/trainees and volunteers. The measure has no exclusions.

The numerator includes the HCP from the denominator population who met the following criteria between October 1 (or when the vaccine became available) and March 31 of the subsequent year:

- Received an influenza vaccination administered at the healthcare facility, reported in writing (paper or electronic), or provided documentation that influenza vaccination was received elsewhere
- Had a medical contraindication/condition of severe allergic reaction to eggs or to other component(s) of the vaccine, or has a history of Guillain-Barre Syndrome within six weeks after a previous influenza vaccination
- Declined influenza vaccination
- Had an unknown vaccination status or did not otherwise fall under any of the above mentioned numerator categories

NOTE: IPFs will use the Centers for Disease Control and Prevention (CDC) National Healthcare Safety Network (NHSN) infrastructure and protocol to report the measure for IPFQR Program purposes. Step by step instructions on the NHSN enrollment and HCP measure data submission processes are available at the following websites:

- IPF NHSN Enrollment/Location Mapping
  - [Detailed Checklist for IPFs](#)
  - Free-standing IPFs: Complete the [NHSN Enrollment](#) process
  - IPFs within Acute Care and Critical Access Hospitals
- Ensure that the main hospital has completed the NHSN Enrollment process
- Complete NHSN Location Mapping for IPFs within Hospitals

- HCP Measure Data Submission
  - Training Slides for IPFs
  - Training, Protocols, Data Collection forms, CMS Supporting Materials, FAQs

For further information, refer to http://www.cdc.gov/nhsn.
# Data Submission

\(^1\) Each new entry overwrites previous entry

**NOTE:** The reporting period for the IMM-2 and Influenza Vaccination Coverage Among Healthcare Personnel measures crosses over two calendar years, from October 1, 2016 through March 31, 2017 for the FY 2018 payment determination and from October 1, 2017 through March 31, 2018 for the FY 2019 payment determination. While the annual data submission timeframe for IMM-2 aligns with the other measures (July 1 through August 15), IPFs will submit the Influenza Vaccination Coverage Among Healthcare Personnel data from October 1, 2016 through May 15, 2017 for the FY 2018 payment determination and October 1, 2017 through May 15, 2018 for the FY 2019 payment determination.
Submission of Non-Measure Data

Beginning with the FY 2017 payment determination and subsequent years, CMS no longer requires non-measure data by quarter, but as an aggregate, yearly count. It is vital for IPFs to accurately determine and submit general population data for CMS to assess data reporting completeness for their total population, both Medicare and non-Medicare. This information is expected to improve CMS’ ability to interpret measure results and assess the relevance and impact of potential future measures. Understanding that the size of subgroups of patients addressed by a particular measure varies over time could be helpful in assessing the stability of reported measure values and in subsequent decision-making concerning measure retention. Similarly, better understanding of the size of particular subgroups in the overall population will assist CMS in making choices among potential future measures specific to a particular subgroup (e.g., patients with depression). Refer to Section 9: Resources > Paper Tools of this program manual to find links to an optional Non-Measure Data Collection Paper Tool and other helpful resources on the QualityNet and Quality Reporting Center websites.

Submission Information

IPFs submit measure and non-measure data submissions as well as complete the Data Accuracy and Correctness Acknowledgement (DACA) form via the web-based data collection tool (WBDCT) located on the QualityNet Secure Portal. The only measure data not submitted via the WBDCT are the Influenza Vaccination Coverage Among HCP (submitted to the CDC), the Follow-Up after Hospitalization for Mental Illness, and the 30-Day All-Cause Unplanned Readmission Following Psychiatric Hospitalization in an Inpatient Psychiatric Facility (IPF) measures (claims-based, calculated by CMS).

To begin the data submission process:

1. Log into the QualityNet Secure Portal, select Quality Programs then the Hospital Quality Reporting: IQR, OQR, ASCQR, IPFQR, PCHQR option from the drop-down menu.

2. From the Quality Reporting Systems: My Tasks page, select View/Edit Structural/Web-Based Measures/Data Acknowledgement (DACA) under Manage Measures.
3. On the next screen you may have the option to choose from several quality reporting programs, depending on user access settings. Select **Inpatient Psychiatric Facilities Web-Based Measures/DACA**

![Select a Program]

4. Select the appropriate Payment Year from the drop-down menu (i.e., for data collected in CY 2016 to be entered in 2017, select Payment Year 2018 and for data collected in CY 2017 to be entered in 2018, select Payment Year 2019)

![Payment Year]

On the landing page of the WBDCT are hyperlinks to the data submission pages and the DACA form. The submission status will remain “Incomplete” until data is entered and saved for each submission page. The screenshot below illustrates the hyperlinks to the submission pages, which will appear in a single row across the screen:

<table>

HBIPS-2: Hours of Physical Restraint Use

**Numerator**
- The total number of hours that all psychiatric inpatients were maintained in physical restraint

**Denominator**
- Number of psychiatric inpatient days

HBIPS-3: Hours of Seclusion Use

**Numerator**
- The total number of hours that all psychiatric inpatients were held in seclusion

**Denominator**
- Number of psychiatric inpatient days

HBIPS-5: Patients Discharged on Multiple Antipsychotic Medications with Appropriate Justification

**Numerator**
- Psychiatric inpatients discharged on two or more routinely scheduled antipsychotic medications with appropriate justification

**Denominator**
- Psychiatric inpatients discharged on two or more routinely scheduled antipsychotic medications
NOTE: The data entry screens for Payment Year (PY) 2018 WBDCT were developed prior to the CMS decision to delay data collection for the following measures:

- Screening for Metabolic Disorders
- Transition Record with Specified Elements for Discharged Patients
- Timely Transmission of Transition Record

Therefore, IPFs must not enter any data in the data entry fields for these measures. IPFs will not be penalized for leaving these three data entry pages “Incomplete” in the WBDCT for the PY 2018 APU determination. However, IPFs must complete the submission process for all other data entry pages to be considered for full APU.

### Screening for Metabolic Disorders

**Numerator**

- Total number of patients who received a metabolic screening either prior to, or during, the index IPF stay.

**Denominator**

- Number of patients discharged with one or more routinely scheduled antipsychotic medications during the measurement period.

### Transition Record with Specified Elements Received by Discharged Patients (Discharges from an Inpatient Facility to Home/Self Care or Any Other Site of Care)

**Numerator**

- Number of patients, regardless of age, discharged from your facility to home or other site of care, or their caregiver(s), who received a transition record (and with whom a review of all included information was documented) at the time of discharge.

**Denominator**

- Number of patients, regardless of age, discharged from your facility to home or other site of care, or their caregiver(s).

### Timely Transmission of Transition Record (Discharges from an Inpatient Facility to Home/Self Care or Any Other Site of Care)

**Numerator**

- Number of patients, regardless of age, discharged from an inpatient facility to home or any other site of care for whom a transition record was transmitted to the facility or primary physician or other health care professional designated for follow-up care within 24 hours of discharge.

**Denominator**

- Number of patients, regardless of age, discharged from your facility to home or other site of care, or their caregiver(s).
Assessment of Patient Experience of Care

Note, if “Yes” is selected in response to the question “Did your facility routinely assess patient experience of care using a standardized collection protocol and a structured instrument?”, then a data entry field will appear. Enter the name of the survey administered by the facility in the blank field.

* Did your facility routinely assess patient experience of care using a standardized collection protocol and a structured instrument?
  
  ○ Yes
  ○ No

* Please indicate the name of the survey that your facility administers:

Use of an Electronic Health Record

Please select which of the following statements best describes your facility's highest level typical use of an EHR System (excluding the billing system) during the reporting period:

○ The facility most commonly used paper documents or other forms of information exchange (for example, email) not involving the transfer of health information using EHR technology at times of transitions in care.

○ The facility most commonly exchanged health information using non-certified EHR technology (that is, not certified under the ONC HIT Certification Program) at times of transitions in care.

○ The facility most commonly exchanged health information using certified EHR technology (certified under the ONC HIT certification Program) at times of transitions in care.

Did the transfers of health information at times of transitions in care include the exchange of interoperable health information with a health information service provider (HISP)?

○ Yes
○ No

SUB-1: Alcohol Use Screening

Numerator

* Number of patients who were screened for alcohol use using a validated screening questionnaire for unhealthy drinking

Denominator

* Number of hospitalized patients 18 years of age or older
**SUB-2/-2a: Alcohol Use Brief Intervention Provided or Offered/Alcohol Use Brief Intervention**

**Numerator 1**
- Number of patients who screened positive for unhealthy alcohol use who received or refused a brief intervention during the hospital stay.

**Numerator 2**
- Number of patients who received the brief intervention during the hospital stay.

**Denominator**
- Number of hospitalized patients 18 years of age and older who screened positive for unhealthy alcohol use or an alcohol use disorder (alcohol abuse or alcohol dependence).

**TOB-1: Tobacco Use Screening**

**Numerator**
- Number of patients who were screened for tobacco use status within the first three days of admission.

**Denominator**
- Number of hospitalized inpatients 18 years of age and older.

**TOB-2/-2a Tobacco Use Treatment Provided or Offered**

**TOB-2/-2a: Tobacco Use Treatment Provided or Offered**

**Numerator 1**
- Number of patients who received or refused practical counseling to quit AND received or refused FDA-approved cessation medications or had a reason for not receiving the medication during the first three days after admission.

**Numerator 2**
- Number of patients who received practical counseling to quit AND received FDA-approved cessation medication or had a reason for not receiving the medication during the first three days after admission.

**Denominator**
- Number of hospitalized patients 18 years of age and older identified as current tobacco users.
**TOB-3/-3a Tobacco Use Treatment Provided or Offered at Discharge/Tobacco Use Treatment at Discharge**

**Numerator 1**
- Number of patients who were referred to or refused evidence-based outpatient counseling AND received or refused a prescription for FDA approved cessation medication upon discharge.

**Numerator 2**
- Number of patients who were referred to evidence-based outpatient counseling AND received a prescription for FDA approved cessation medication upon discharge as well as those who were referred to outpatient counseling and had reason for not receiving a prescription for medication.

**Denominator**
- Number of discharged patients 18 years of age and older who have used tobacco products within 30 days of admission.

**IMM-2: Influenza Immunization Information**

**Numerator**
- Inpatient discharges who were screened for influenza vaccine status and were vaccinated prior to discharge if indicated.

**Denominator**
- Inpatients age 6 months and older discharged during the months of October, November, December, January, February or March.

A **Calculate** button will appear at the bottom of the data entry pages for the following measures: HBIPS-2, -3, -5; SUB-1, -2/-2a, -3/-3a; TOB-1, -2/-2a, -3/-3a; IMM-2. Data must be entered in all required fields before the **Calculate** button is selected. After the **Calculate** button is selected, click the **Submit** button in order to save the measure data.

The bottom of each data entry page includes the options to **Return to Summary**, **Submit** the entered data, or **Print** the data entry page.
DACA

See instructions about completing the DACA form in Section 6: Data Accuracy and Completeness Acknowledgement.
Section 3: QualityNet Registration

To participate and submit data for reporting in the IPFQR Program, facilities must obtain a QualityNet user account and register with the QualityNet Secure Portal. All users requesting access to the QualityNet Secure Portal must be individually approved and verified at the facility level and submitted to QualityNet. This mandatory registration process is used to maintain the confidentiality and security of healthcare information and data transmitted via the QualityNet Secure Portal. These are CMS-approved sites for secure healthcare quality data exchange for facility reporting.

To begin QualityNet Registration:

1. Access the internet, and then navigate to the QualityNet website located at http://www.qualitynet.org.

2. Select the Inpatient Psychiatric Hospitals link located under QualityNet Registration.
The Inpatient *QualityNet* Registration page appears.

The *QualityNet* Registration page contains an overview of the registration process and helpful links for getting started with *QualityNet*.

3. Review the **System Requirements** and test the system to ensure compatibility.

4. Select the **Security Administrator** link.

The *QualityNet* Security Administrator Registration page appears.

5. Select the **QualityNet Security Administrator Registration Packet** link and follow the instructions in the packet for completing and submitting the registration and authorization forms.
**QualityNet Security Administrator**

The IPFQR Program requires the facility to have at least one active QualityNet Security Administrator.

**Best Practice:** We recommend facilities designate a minimum of two QualityNet Security Administrators (SA) – one to serve as the primary QualityNet SA and the other to serve as the alternate SA. To keep the facility’s account active, your SA should sign in at least once a month. If it becomes necessary to reactivate your account, call the QualityNet Help Desk at 866.288.8912.

**Security Administrator Responsibilities**

The security administrator has the following responsibilities:

- Creating, approving, editing, and/or terminating QualityNet user accounts within the IPF
- Assigning user roles for basic users within the IPF in order to access the secure web-based applications
- Monitoring QualityNet usage at the IPF to ensure security and confidentiality is maintained
- Serving as a point of contact for information regarding QualityNet

**Non-Administrative User**

Any user not designated as a QualityNet Security Administrator or a QualityNet Security Designate is considered a Non-Administrative User (or Basic user). Various roles to fit job needs can be assigned to the Non-Administrative User.

If assigned the appropriate roles, the user may perform one or more of the following tasks:

- Access reports
- Authorize vendors to submit data
- Manage measures
- Manage security
- Manage Notice of Participation
- View/edit online forms
Completing the *QualityNet* Registration Form

When completing the *QualityNet* Registration form, print the information legibly and completely in each of the applicable fields. For the “Specify Setting” section, check the Inpatient Psychiatric Facility box.

![QualityNet Security Administrator Registration Form](image)

Sign and date the *QualityNet Security Administrator Form* in the presence of a Notary Public, obtaining the Notary’s stamp and seal on the form. Even though not all states require the stamp or seal of the notary, it is a requirement for *QualityNet*.

Have the highest-level executive at your location complete and sign the *QualityNet Security Administrator Authorization Form*. Depending on the facility, this may be the Chief Executive Officer, Administrator, Medical Director, or other similar position.

Refer to the information below for mailing instructions of the original, completed *QualityNet Security Administrator Registration Form* and the *QualityNet Security Administrator Authorization Form*. Photocopies or faxes of the forms will not be accepted. The facility should retain a copy of all forms for their records.

**Mail the original completed form (not a copy) to the *QualityNet* Help Desk at the following address:**

*QualityNet* Help Desk  
1401 50th St., Suite 200  
West Des Moines, IA 50266

For questions regarding the *QualityNet* Registration Form, contact:  
*QualityNet* Help Desk  
Monday through Friday  
7:00 a.m. to 7:00 p.m. Central Time  
E-mail: qnetsupport@hcqis.org  
Phone: 866.288.8912  
TTY: 877.715.6222
Activating the Security Administrator Account

Once the QualityNet Registration Forms are processed by QualityNet, the approved security administrator(s) will receive an email notification with the individual assigned username and a temporary password.

To begin account activation:

1. Go to the QualityNet.org website.

2. Select the Log In button or Login link.

3. Enter the individual assigned username and a temporary password provided via the email notification.

4. Follow the instructions to establish a new password.

   NOTE: After the password is established, the user must complete the enrollment to obtain access to the QualityNet Secure Portal. This establishes access to the web-based Notice of Participation (NOP), Web-Based Measures, Data Accuracy and Completeness Acknowledgement (DACA) applications, and IPFQR Program reports.
QualityNet Secure Portal Access

Before logging in to QualityNet Secure Portal for the first time, a user must complete the New User Enrollment Process. The prerequisites for this process are:

- A completed QualityNet Registration
- Receipt of the applicable user roles assigned by your facility security administrator
- A Symantec VIP multifactor credential application in order to obtain VeriSign, an authentication service that enables secure access to networks and applications.

To download the multifactor authentication application to a PC or tablet:

1. Go to the QualityNet.org website.

2. Select the Download Symantec ID link.
   The VeriSign ID Protection Center page will appear.

3. Select the download option that is appropriate to the device being used, either for Windows® or Mac®.
NOTE: It may be necessary to consult with your IT department before downloading the VeriSign ID to the PC due to system firewalls or other restrictions.

Once the Symantec multifactor authentication application download is on the computer, users are ready to access the QualityNet Secure Portal.

5. Select the Log In button or Login link.

The Log In to QualityNet window appears.

Each IPFQR user must complete the authenticating (proofing), required by the Federal Information Security Management Act (FISMA), for accessing government systems.

6. Select the link Start/Complete New User Enrollment on the login page to begin the enrollment process.
The QualityNet Starting and Completing New User Enrollment page appears.

7. Enter your User ID and Password and select Submit.

8. Follow the instructions for the enrollment process described in the following sections.
**Verifying Identity**

To verify a user’s identity:

1. Access the *QualityNet Starting and Completing New User Enrollment* page and Log In. The Verify Identity page appears.

2. Enter the required information within each field on the screen.

A Social Security number is required for users residing within the United States. A Social Security number is considered the most available source of identification that can be verified, as not all users have a driver’s license or passport. When a user enters a Social Security number, the screen displays hash marks instead of numbers to protect privacy.

**NOTE**: You must enter your personal street address, NOT your associated facility’s address.

CMS is aware of the privacy concerns regarding disclosure of personal data, including social security numbers. CMS is collecting the Personally Identifiable Information (PII) on this screen and on the identity question screen to verify identity only. Verifying a user’s identity meets the National Institute of Standards and Technology (NIST) and the Federal Information Security Management Act (FISMA) requirements.

FISMA was passed as Title III of the E-Government Act (Public Law 107-347) in December 2002. FISMA requires each federal agency to develop, document, and
implement an agency-wide program to provide information security for the information and information systems that support the operations and assets of the agency, including those provided or managed by another agency, contractor, or other source. This Act assigned NIST the responsibility to develop standards to be used by Federal agencies to categorize information and information systems based on the objectives of providing appropriate levels of information security according to a range of risk levels.

CMS is complying with the NIST standards by verifying a user’s identity using Experian’s Precise ID platform (an external authentication service provider). To maintain the privacy of users, Social Security numbers will be masked and encrypted during this transaction to ensure it is secure. Other than a name, none of the PII data collected in this process is retained by CMS.

3. Once the required fields have been entered, check the privacy statement, and click Submit.

   The screen will display a message stating that the information has been sent to Experian and will instruct the user to wait as the information is being processed.
A set of questions will appear that will need to be answered.

Example questions may be downloaded from the User Guide located on QualityNet. Typical Types of Identity Proofing Questions include:

- Verification of where you have lived (street address, city, and state)
- Verification of the type of car you own or have leased (color, make, license plate number)
- Verification of banking institutes that you may have used for banking or various types of loans
- Verification of phone numbers (home and cell)
- Verification of education completed
- Verification of where you have been employed
- Verification of dates associated with any of the above activities

4. Answer the identity challenge questions, and then select Submit.
Once a user has completed the identity proofing questions correctly, the verification will display on the computer screen indicating successful completion of the CMS identity proofing.

If the questions are not answered accurately or if there is an alert on the credit report due to identity theft, the user will be prompted to call Experian to complete telephone verification.

A phone number will appear on the screen. If unsuccessful during the telephone verification, the user will be referred to the facility’s Security Administrator to complete a face-to-face verification.

**NOTE:** An individual user must have attempted both the online and telephone verification before a face-to-face verification can be done.
**Enrolling the Credentials**

To enroll credentials, access the *QualityNet Starting and Completing New User Enrollment* page. After, entering identity questions, the penultimate step is *Enroll Credentials*.

Steps for enrolling the credentials are as follows:

1. Access the previously downloaded Symantec VIP Application from your desktop. The Symantec VIP window appears.

2. Enter the credential ID number in the first field.

3. Enter a security code within the 30-second freshness period.

   **NOTE:** A counter will display a countdown of the seconds from 30 until the next code displays. The security code may be typed in the field or copied and pasted into the Security Code field.

4. Select **Submit**.

   The New User Enrollment Process information is contained in Section 4 of the guide.
**Logging In to the QualityNet Secure Portal**

After completing all necessary paperwork and the New User Enrollment, user will have access to the QualityNet Secure Portal.

To access the *QualityNet Secure Portal*:

1. Go to the *QualityNet.org* website.

2. Select the **Log In** button or **Login** link.

   The **Log In to QualityNet** screen appears.

3. Open the previously downloaded Symantec VIP application for the time sensitive Security Code.

4. Enter the **User ID**, **Password**, and **Security Code**.

5. Select **Submit**.
The security screen will be displayed, indicating the user has accessed a U.S. Government Information system.

6. Accept the terms to be granted access to the QualityNet Secure Portal.

7. To access the IPFQR Program, select Quality Program (1.) then the Hospital Quality Reporting: IQR, OQR, ASC, IPFQR, PCHQR option (2.) from the drop-down menu.

After selecting the Quality Program, the My Tasks page is displayed on the next screen. The content of the My Tasks page is dependent upon the user roles assigned to the individual. If assigned the appropriate roles, the user may perform one or more of the following tasks:
- Access reports
- Authorize vendors to submit data
- Manage measures
- Manage security
- Manage Notice of Participation
- View/edit online forms

**User Roles**

For the IPFQR Program, there are two types of user roles that may be assigned. Those roles are the “Read Only” role and the “Update” role. The “Update” role allows the user to edit information within the application, whereas the “read only” role allows the user to read the information only. For more information regarding roles, refer to the earlier sections of this part of the manual, *Section 3 QualityNet Registration*.

Below is a list of roles that must be assigned to a user.

**IPFQR Notice of Participation**
- IPFQR Notice of Participation Read
- IPFQR Notice of Participation Update

**IPFQR Web-Based Measure/DACA Application**
- IPFQR Web-Based MSR DACA Read
- IPFQR Web-Based MSR DACA Update

**IPFQR Reports**
- IPFQR Reports Read
- IPFQR Reports Update

**IPFQR Vendor Authorization**
- IPF Vendor Authorization
- Hospital Reporting Feedback - IPFQR

**Online Forms**
- Online Forms View - Inpatient Psych
- Online Forms - Upload - Inpatient Psych

**File Exchange**
- File Search and Exchange
Below is an example of the Quality Reporting System: My Tasks page.
Section 4: Vendor Authorization

Facilities may elect to use a vendor to collect and submit data on their behalf. A vendor must have an assigned vendor ID and be authorized to submit data, prior to the IPF authorizing them to submit data or to have access to their facility’s data and/or reports.

To receive the vendor registration information, the vendor may submit an email request to one of the following email addresses: vendorreg@hcqis.org or qnetsupport@hcqis.org.

NOTE: IPFs may authorize a vendor to submit data on behalf of the facility. However, CMS maintains that an IPF is responsible for ALL data submission, even when contracting with a vendor.

Vendors must be authorized to submit data on behalf of providers. The Authorize Vendors to Submit Data option enables providers to authorize vendors to submit web-based measure information. It also enables providers to update existing authorizations.

IPFs must have the IPF Vendor Authorization role to access the Vendor Authorization link.

1. From the Quality Programs tab on the QualityNet Secure Portal Landing page, select the Quality Programs: Hospital Quality Reporting: IQR, OQR, ASCQR, IPFQR, PCHQR link.

   The Quality Reporting System: My Tasks page appears:

   ![Vendor Authorization Link](image)

2. Choose the Vendor Authorization link.

   The Vendor Authorization screen appears:

   ![Vendor Authorization Screen](image)
3. Select the IPF Vendor Authorization role from the drop-down box and click **Submit**.

The **Authorize Vendor to Submit** screen appears.

4. Select either the **Add New Vendor Authorization** or the **Update Vendor Authorization** tab.

All vendors that have been allowed to submit clinical data on the institution’s behalf are automatically authorized to submit web-based measures for the data submission period beginning July 1.

The Authorized Vendors to Submit Data page appears.

5. Select a vendor from the list and verify the correct vendor is displayed.

**NOTE:** Use the **Cancel** button to return to the previous page to make a vendor change, if necessary.

6. Scroll to the measure.

7. Select the **Calendar** icon to choose a Discharge/Encounter Date>Start and Data Transmission Date>Start for the measures.

Both start dates are required but end dates are not. Discharge/Encounter Date>Start Date must be the first day of a quarter. The Data Transmission Date>Start Date must be equal to or greater than the current date.

**Recommendations**

Do not enter end dates unless it is known that a specific vendor will not submit data after the specified end dates or if you are converting from one CCN to a new CCN. The Discharge/Encounter Date>End Date must be the last day of a quarter.

If you are terminating a vendor relationship at the end of a submission period, it is recommended that you do not enter the submission deadline date as the Data Transmission Date>End Date, due to the possibility of a submission date extension. It is recommended that you enter the Data Transmission Date>End Date when all data have been transmitted.

If more than one vendor is authorized for the same topic and timeframe, a message indicating there is more than one vendor authorized to submit data for the same measure set and time period will display. You will be able to proceed but will need to verify that the dates entered are correct.
8. Decide if the vendor selections are as desired.
   - Select **Cancel** to return to the vendor’s currently authorized page without saving.
   - Select **Continue** to proceed.

The Approve New or Changed Vendor Authorization page appears.

9. Verify that the vendor information and authorized dates are correct.
   - Select **Submit** if the information is as desired
   - Select **Edit** to return to the previous page to make any date changes.

**NOTE:** Once an authorization has been submitted, the only dates that can be modified are future dates. If incorrect dates were entered and need to be modified, please send an email to qnetsupport@hcqis.org or call 866.288.8912.

The Vendor Authorization Complete page will display and summarize the submitted Vendor Authorization.

10. Select **Print** for a printer-friendly copy of the authorization.
NOTE: Additional information is available in the Using the QualityNet Secure Portal Applications User Guide, available at the following link:
Section 5: Notice of Participation

To participate in the IPFQR Program, each facility must complete a Notice of Participation (NOP). During the first year of the program, facilities had the option of submitting a paper NOP or completing the NOP online. Once completed, the NOP remains in effect until an IPF decides to withdraw from the program or there is a change in their eligibility status.

Facilities that completed an NOP and plan to continue to participate in the IPFQR Program do not need to complete an NOP for the following year. The system will automatically update their NOP and populate the screen with the next fiscal year and annually thereafter. To verify the NOP was updated, it is recommended that the facility log in to the NOP application. It is also recommended that facilities log in to the NOP application to update their facility contacts, since this information was not available if a facility completed the paper NOP form.

Eligible facilities that did not participate in the IPFQR Program previously may complete an online NOP at any time; however, new facilities must complete the NOP no more than 180 days from the Medicare Accept Date. All IPFs that are eligible to receive full APU for a given fiscal year must have an IPFQR Program NOP status of Participating by the annual August deadline (which is typically August 15). For example, IPFs must ensure that the NOP status is “Participating” by August 15, 2017 in order to meet the NOP requirement for the FY 2018 payment determination.

**NOTE:** Once an IPF has submitted an NOP status of “Participating”, the IPF is considered an active IPFQR Program participant and is subject to the IPFQR Program requirements in order to obtain full APU until the IPF submits a withdrawal of participation or until there is a change in the eligibility status of the IPF.
Accessing the Online Notice of Participation Application

To access the NOP application:

1. Ensure the IPFQR NOP Read or IPFQR NOP Update (to add or edit) Role has been assigned by the Security Administrator.

   Users that are affiliated with only one facility will see their facility’s 6-digit CMS Certification Number (CCN) after selecting the Manage Notice of Participation link under the My Tasks screen.

   Users that are affiliated with more than one facility will be prompted to enter the 6-digit CCN as shown below.

3. Select the action to be completed.

   View, Add, or Update the Notice of Participation, Facility Contacts, or Additional Campus information.

   Additional campus information may not apply to all IPFs. It is applicable for facilities that have more than one physical location but are licensed and reimbursed under the same CCN.

   Quality data is reported and published under the same CCN regardless of the number of physical locations associated with a CCN.
4. Enter the contact information, if this is the first time the NOP is being added.

5. Select Contacts from the list.

6. Enter at least two facility contacts within the contact screen.

   The contact information is used for sending email alert notifications if edits are made within the NOP application.
If the facility completed a paper NOP, then there will not be any contact information entered in the application. It is recommended that the facility log in and update the contact information.

7. Select the desired pledge option and the acknowledgement check box.
   Upon initial completion of the NOP, two pledge options are available: Participate or Do not agree to participate.

8. Following the pledge selection select the Save button.
A confirmation screen appears asking the user to confirm the selection in order to save the document.

Once a facility has agreed to participate, they remain a program participant until they log in and select the option to not participate or withdraw.

Detailed information about the NOP application is accessible on the QualityNet Home page by logging in through the QualityNet Secure Portal. Here is the direct link: http://www.QualityNet.org/dcs/ContentServer?c=Page&pagename=QnetPublic%2FPage%2FQnetHomepage&cid=1120143435363.
Section 6: Data Accuracy and Completeness Acknowledgement

IPFQR Program participants enter NOP and measure data using the web-based applications on QualityNet. Following the submission of the measure data, each IPF must attest to the accuracy and completeness of the entered data via a Data Accuracy and Completeness Acknowledgement (DACA) statement. The DACA must be completed annually by the August 15 submission deadline, prior to the respective payment determination year.

After submitting data select the Return to the Summary button to return to the summary screen and continue submitting data for each measure.

As you complete data submission on each data entry page, the status will change from “Incomplete” to “Completed,” indicated by #1 below.

When you have completed submitting data for all measures select the DACA link to complete your “Data Accuracy and Completeness Acknowledgement,” denoted by #2 below.
1. Select the **Yes, I Acknowledge** radio button.
2. Enter your position or title.
3. Select the **Submit** button.
Section 7: Accessing and Reviewing Reports

Report(s) described in this section are helpful in monitoring IPF status as it relates to the IPFQR Program. The reports should be used as a reference tool and do not guarantee a facility will receive its full APU.

Facility, State, and National Report

The Facility, State and National Report will be available in the future. This report provides information about the data that is submitted to the clinical warehouse, following entry into the web-based application. The facility rate is specific to the facility accessing the report.

The state and national rates are calculated approximately 30 days following the end of the submission period. This information is used for an individual facility to compare its facility-specific rates with state and national averages for each measure.

To run a Hospital Reporting-Inpatient Psychiatric Facility, State, and National Report:

1. Select Run Reports from the My Reports drop-down menu in the yellow tool bar near the top of the summary screen.
2. Select the Run Report(s) tab.
5. Enter your desired report parameters and the Payment Year.
7. Select the Search Reports tab.
8. Select the new report and open it.

Provider Participation Report

The Provider Participation Report will be available in the future. This report provides the facility with a summary of the requirements for participation in the IPFQR Program. The report assists IPFs in determining their facility’s status towards meeting the program requirements. However, the information provided does not guarantee the hospital will receive the full APU.

To run a Hospital Reporting-Inpatient Psychiatric Facility Participation Report:

1. Select Run Reports from the My Reports drop-down menu in the yellow tool bar near the top of the summary screen.
2. Select the Run Report(s) tab.
3. Select **IPFQR** for Report Program and **Hospital Reporting Feedback – IPFQR** for Report Category. Then, select the **VIEW REPORTS** button.

4. Select **Hospital Reporting – Inpatient Psychiatric Facility Participation Report**.

5. Enter your desired report parameters and the Payment Year.

6. Select the **Run Report** button.

7. Select the **Search Reports** tab.

8. Select the new report and open it.
Section 8: Public Reporting of IPFQR Data

Background
Section 1886(s)(4)(E) of the Social Security Act requires the Secretary of Health and Human Services to establish procedures for making the data submitted under the IPFQR Program available to the public.

The Department of Health & Human Services (HHS) hosts the Hospital Compare website, http://www.hospitalcompare.hhs.gov/, which publicly reports hospital performance on numerous measures. Quality performance information is collected from more than 4,000 participating hospitals. Hospital Compare is designed to make meaningful, relevant and easily understood information about hospital performance accessible to the public and to inform and encourage efforts to improve care quality. Accessibility and use of performance information spurs positive changes in healthcare delivery.

Effective April 17, 2014, the IPFQR Program data are located at the following link: http://medicare.gov/hospitalcompare/search.html.

Public Display Timeline
The IPFQR Program will have quality of care data publicly displayed on an annual basis.

Preview
Prior to the public release of data on CMS website, facilities are given the opportunity to preview data for 30 days. Preview reports will be accessible for download by the facility, via the QualityNet Secure Portal, beginning with the April 2015 preview. Providers will be notified via list serve when the reports are available.

Preview Report Content
The Hospital Compare Preview Report Help Guide: Inpatient Psychiatric Facility Quality Reporting Program is a tool that provides detailed information about the Hospital Compare Preview Report. Some of the highlights include:

- An overview of Hospital Compare website
- Instructions on how to access preview reports
- Details about the IPFQR preview report

In addition, a one-page quick reference guide is also available to provide an overview of the Hospital Compare Preview Report content.

These are optional, informal tools that are currently available online on the following websites:

- QualityNet on the IPFQR Program Landing page in the News section
- Quality Reporting Center on the IPFQR Program Resources and Tools page
Medicare.gov Website
Direct Link: http://medicare.gov/hospitalcompare/search.html

Medicare.gov Home Page
The IPFQR announcement is located under the Spotlight section on the lower left portion of the page.

NOTE: The “Find a hospital” function does not provide access to the quality measures submitted by IPFs.

Select the link for inpatient psychiatric facility data to navigate to the IPFQR Program’s information page.
The IPFQR Program page includes a brief description of the program and the measures. It includes public access to performance measure data provided by IPFs; however, it does not generate a report equivalent to the Facility, State, and National report available to a facility through the secure portal. The data is in an aggregate annualized format of the quarters for the reporting period. This data may be calculated from the Facility, State, and National report.

The Inpatient Psychiatric Facility Quality Reporting Program measures allow consumers to find and compare the quality of care given at psychiatric facilities where patients are admitted as inpatients. Inpatient psychiatric facilities are required to report data on these measures. Facilities that are eligible for this program may have their Medicare payments reduced if they do not report.

Data for the following measures are displayed in the tables below:

- Hours of physical restraint use (HBIPS 2) – lower numbers are better
- Hours of seclusion use (HBIPS 3) – lower numbers are better
- Patients discharged on multiple antipsychotic medications (HBIPS 4) – lower numbers are better
- Patients discharged on multiple antipsychotic medications with appropriate justification (HBIPS 5) – higher numbers are better
- Post discharge continuing care plan created (HBIPS 6) – higher numbers are better
- Post discharge continuing care plan transmitted to next level of care provider upon discharge (HBIPS 7) – higher numbers are better
- Percent of patients screened for alcohol use using a validated screening questionnaire (SUB-1) – higher numbers are better
- Attestation of patient experience of care (PEoC) routinely assessed using standardized collection protocol
- Attestation of facility’s highest level typical use of an electronic health record system (EHR) and exchange of interoperable health information with a health information service provider (HISP) at times of transitions in care

CMS has suppressed data for the following measure results for the April 2016 display:

- Percent of patients receiving follow-up care within 30 days (FUH-30) or within 7 days (FUH-7) after hospitalization for mental illness

Get more details about these measures.

Scroll down the page to see the next section, Data by Facility.
The upper left corner of the data table is labeled as Data.Medicare.gov. This is where the data resides. A drop down “Menu” with options to sort and filter data is located in the top right corner.

After selecting the menu list, you may access the download option.
Once the download is complete, filtering and other types of data manipulation are available depending on the file format selected.

Continue to scroll down the IPFQR Program page to locate the next section, Data by State. The menu list provides access to the download function.

Continue to scroll down the IPFQR Program page to locate the final section, Data by Nation. The menu list provides access to the download function. Hospital Compare Archives are available for historical data.

An alternate method to access the data is to access the Data.Medicare.gov website at the direct link: http://data.medicare.gov
Section 9: Resources

The following information contains additional resources available for IPFs participating in the CMS IPFQR Program.

National Provider Webinars are provided by CMS and by the IPFQR Support Contractor on a routine basis. The slides from each of the education sessions are published to the QualityNet website and are available for review under the Inpatient Psychiatric Facilities tab by selecting the Webinars/Calls link from the drop down menu.

For resources and tools from the IPFQR Support Contractor, users can access the website http://www.QualityReportingCenter.com. Data collection tools, timelines, and calendars, as well as other valuable resources, can be located on this website. In the dropdown menu for the Inpatient tab, select the IPFQR Program.

**IPFQR ListServe**

To receive important IPFQR Program updates and notifications, please subscribe to the ListServe on the QualityNet website. On the left side of the page, navigate to the “Join ListServes” box and select the “Notifications and Discussions” link. Check the box next to Inpatient Psychiatric Facility Quality Reporting Program, enter your User Information, and click Submit.

**Questions & Answers**

The CMS Q&A tool is also a good resource for program information. The tool is intended to help users quickly find program answers when they are needed. The Q&A tool can be accessed from QualityNet by selecting the “Inpatient Psychiatric Facilities” link from the Questions & Answers section on the right side of the page and then choosing the “Inpatient Psychiatric Facility Quality Reporting” link (direct link): https://cms-ip.custhelp.com/app/home/session/L3RpbWUvMTQ2NDE5NTMwOC9zaWQvRGM3WXBvUm0%3D.

If needed information is not in the Q&A Tool, select the “Ask a Question” link to submit a question to the IPFQR Support Contractor.

Toll-Free Telephone: 866.288.8912
Email: qnetsupport@hcqis.org
Hours of Operation: 7:00 a.m. – 7:00 p.m. Central Time
QualityNet Website
The IPFQR Program uses QualityNet to publish information including requirements, announcements about educational offerings, and news stories. The IPFQR Program home page is located at the following link:

The QualityNet home page (www.QualityNet.org) offers a User Guide for the Secure Portal and User Guide for the Secure Portal Reports. Links are located on the right side of the webpage just below the “Log in to QualityNet Secure Portal” at the following link:

Paper Tools
Measure abstraction and non-measure data collection paper tools have been developed for IPFs to use as an optional mechanism to aid in the collection of measure data for the CMS IPFQR Program. The paper tools are available at the following websites:

- QualityNet > Inpatient Psychiatric Facilities > Resources
- Quality Reporting Center > Inpatient > IPFQR Program > Resources and Tools

Specification Manuals
To access this manual for specific detailed information for the HBIPS measures, use the following link:

Specifications Manual for National Hospital Inpatient Quality Measures
To access this manual for specific detailed information for the SUB, TOB, and IMM measures, use the following link:

Claims-Based Measures’ Specifications Tool
Specifications concerning the Follow-Up After Hospitalization for Mental Illness and the 30-Day All-Cause Readmission After Discharge from and IPF measures are available at the following websites:

- QualityNet > Inpatient Psychiatric Facilities > Resources
- Quality Reporting Center > Inpatient > IPFQR Program > Resources and Tools

National Committee for Quality Assurance (NCQA)
The National Committee for Quality Assurance is a private, 501(c)(3) not-for-profit organization dedicated to improving health care quality (http://www.ncqa.org/).
Other Resources

National Institute on Alcohol Abuse and Alcoholism (NIAAA)
The National Institute on Alcohol Abuse and Alcoholism (NIAAA) is one of the 27 institutes and centers that comprise the National Institutes of Health (NIH). NIAAA supports and conducts research on the impact of alcohol use on human health and well-being. It is the largest funder of alcohol research in the world. The NIAAA has published a list of validated screening tools that may be used by facilities in conducting their Alcohol Screening for the SUB measures (http://www.niaaa.nih.gov/).

Table of Contents – The Table of Contents provides a list of all of the documents contained within the respective manual with corresponding page numbers. The electronic online version of the manual is bookmarked and contains hyperlinks to easily navigate through documents.

Introduction – The Introduction contains a history of the CMS/Joint Commission Measure alignment and activities.

Using the Manual – This document provides a brief description of the content in each section of the manual and the appendices.

Data Dictionary Section – The Data Dictionary is provided to define data elements and provide guidance for abstraction of data. To ensure standardized and comparable data across all hospitals, it is of primary importance that all hospitals using the National Quality Core Measures (HBIPS) and the National Quality Inpatient Measures (SUB-1) gather and use the data elements as defined in the Data Dictionary.

  Introduction to the Data Dictionary – The Introduction to the Data Dictionary describes the data elements required to calculate the measures. It contains general abstraction guidelines; however, the instructions under each data element take precedence over general guidelines.

  Data Element List – The Data Element List contains an alphabetical list of all the data elements that are collected for the measures/measure sets included in the Specification Manual.

  Alphabetical Data Dictionary – The Alphabetical Data Dictionary is the largest of all of the documents contained within the manual. It is extremely important for the abstractor to have the correct version of the document based on the discharge period as abstraction instructions can change from period to period.

  A comprehensive list of each of the data elements is provided along with the page number and a list of specific measures in which the data element is used. Many data elements are used for more than one measure or measure set.

  Data Element Sections – Each data element is described in detail following the comprehensive list. There are multiple sections within the data element information.

    • **Data Element Name** – A short phrase identifying the data to be collected. For ease of identification, the data element name is italicized.

    • **Collected For** – Identifies the measures and the organization for which the element is collected: CMS, The Joint Commission, both, or neither organization.

    • **Definition** – A detailed explanation of the data element.

    • **Suggested Data Collection Question** – Provided as an example of wording for a data element question that may be found in a data abstraction tool.
Data Element Sections (continued)

- **Format** – Identifies the criteria (length, type, occurs) of data that is being collected for transmission purposes.
  - Length – Number of characters or digits allowed for the element.
  - Type – Identifies the allowed data value: numeric, alphanumeric, date or time.
  - Occurs – Number of times the data element occurs in a single episode of care record.

- **Allowable Value** – A list of acceptable responses for the element. In some data elements, the response may be limited to one while others may allow for multiple values.

- **Notes for Abstraction** – Provided to assist the abstractor in the selection of the correct Appropriate Value for the data element. The Notes section may include examples of documentation encountered in the medical record.

- **Suggested Data Sources** – Provides a list of source documents from which data can be identified, such as an administrative or medical record. The sources are usually listed alphabetically for guidance locating the information within records. The information listed is for suggested sources only; however, other sources may be used, unless otherwise noted.

- **Guideline for Abstraction** – Designed to assist abstractors in determining how a data element should be answered. The instructions can reference inclusions abstracted as a positive finding. Unless specified within the data element, the inclusions listed are not considered all inclusive. The data element can contain specific exclusions or unacceptable terms abstracted as negative findings. Also, the instructions can reference an appendix in the Specifications Manual, such as a medication table. Element specific notes and guidelines take precedence over the “General Abstraction Guidelines” found in the “Introduction to the Data Dictionary.”

**Measure Information Form (MIF)** – The measure information section in the Specifications Manual for National Hospital Inpatient Quality Measures and the Specifications Manual for Joint Commission National Quality Core Measures is divided by measure sets. There is a list of measures comprising each set, including the set measure identification number (alphanumeric number to identify a measure within a set) and the measure short name. For example, in the Hospital Based Inpatient Psychiatric Services (HBIPS) measure set, the measure that addresses Hours of Physical Restraint Use is listed as: HBIPS-2a and measure short name: Physical Restraint-Overall Rate. This is followed by a data element list for the measure set, including the general data elements, algorithm output data elements, and the specific measure set data elements. Next is a document that describes the Initial Patient Population and the sample size requirements for each measure set. Also included are subsections for each specific measure. These contain a MIF and the Measure Algorithm.
The MIF has an identification section which includes name and identification code information. As with other documents within the manual, the notation in the top right corner indicates when the document was last revised. Each measure has a notation indicating whether it is endorsed by the National Quality Forum (NQF).

Measure numerator and denominator information is provided with included and excluded populations specified.

**Numerator Statement** – Represents the portion of the denominator satisfying the conditions of the performance measure. When the measure is reported as a rate (proportion or ratio), the Numerator and Denominator Statement are completed.

- **Included Populations** – Describes the population(s) comprising the numerator, not contained in the numerator statement, or not applicable.
- **Excluded Populations** – Describes the population(s) not included in the numerator or none.
- **Data Elements** – Data elements necessary or required to determine (or establish) the numerator.

**Denominator Statement** – Represents the population evaluated by the performance measure. When the measure is reported as a rate (proportion or ratio), the Numerator and Denominator Statement are completed.

- **Included Populations** – Describes the population(s) comprising the denominator, not contained in the denominator statement, or not applicable.
- **Excluded Populations** – Describes the population(s) not included in the denominator or none.
- **Data Elements** – Data elements required to determine (or establish) the denominator.

**Measure Information Algorithms** – Algorithms illustrate the calculation steps needed for a measure. Each algorithm provides the logical steps, data element evaluation, arithmetic calculations and data manipulation information required to calculate a measure. The algorithms are used by vendors to design software applications and are helpful as a visual aid. For example, “Appendix E” of the manual provides more details and the definition of each field contained within the MIF. Data elements used in the calculation of the measure are italicized within the algorithm.

A narrative description of the algorithm immediately follows the algorithm diagram. The information is supplemental and explains the flow in less technical terms. It is not intended to be used for programming purposes; however, the narrative steps may be of assistance for abstractors in understanding how the algorithm functions.
Appendix B: Psychiatric Advance Directives (PAD)

General Information

The Patient Self Determination Act of 1990 amends titles XVIII (Medicare) and XIX (Medicaid) of the Social Security Act to require hospitals, skilled nursing facilities, home health agencies, hospice programs, and health maintenance organizations to: (1) inform patients of their rights under State law to make decisions concerning their medical care; (2) periodically inquire as to whether a patient executed an advanced directive and document the patient's wishes regarding their medical care; (3) not discriminate against persons who have executed an advance directive; (4) ensure that legally valid advance directives and documented medical care wishes are implemented to the extent permitted by State law; and (5) provide educational programs for staff, patients, and the community on ethical issues concerning patient self-determination and advance directives. More information can be found at this link [https://www.congress.gov/bill/101st-congress/house-bill/4449](https://www.congress.gov/bill/101st-congress/house-bill/4449).

Medical facilities that receive Medicaid and Medicare funds must have procedures in place for handling patients' advance directives, and to tell patients upon admission about their rights under state law to use advance directives. The PSDA does not set standards for what advance directives must say; it does not require facilities to provide advance directive forms; and it does not require people to have advance directives. Rather, the PSDA's purpose is to make people aware of their rights.

For the purposes of the Transition measures, details regarding advance directives (including those for mental health purposes) should be included in the transition record. Review Section 4 for additional information and definitions. Listed below are common components of a Psychiatric Advance Directive, followed by a sample PAD that can be used by IPFs in creating documents used in the facility.

Common Components of a Psychiatric Advance Directive

- **Part 1:** A statement of one’s intent in creating an advance directive for behavioral healthcare decision-making

- **Part 2:** The designation of another person to make decisions for an individual, if he or she is determined to be legally incompetent to make choices. Generally, this designation also includes provisions for who should be appointed as guardian, if a court decides to name one.

- **Part 3:** Specific instructions about preferences for hospitalization and alternatives to hospitalization, medications, electroconvulsive therapy, and emergency interventions, including seclusion, restraint, medication, and participation in experimental studies or drug trials

- **Part 4:** Instructions about who should be notified immediately if and when the person is admitted to a psychiatric facility. Instructions should also include who should be prohibited from visiting and who should have temporary custody of minor children or pets.

- **Part 5:** Personal rights to suspend or terminate an advance directive while incapacitated, if allowed by the law in the state

- **Part 6:** A signature page with two witnesses and a notary who sign the advance directive
Example: Psychiatric Advance Directive

DISCLAIMER: THE FOLLOWING DOCUMENT IS AN EXAMPLE FOR INFORMATIONAL USE ONLY AND SHOULD NOT BE USED UNLESS MODIFIED BY THE IPF. THIS DOCUMENT IS NOT MEANT TO SUBSTITUTE FOR AN EXISTING ADVANCE DIRECTIVE.

PART 1: Statement of Intent to Appoint an Agent

I, ___________________________________, being of sound mind, authorize a health care agent to make certain decisions on my behalf regarding my mental health treatment when I am determined to be legally incompetent to do so. I intend that those decisions should be made in accordance with my expressed wishes as set forth in this document. If I have not expressed a choice in this document, I authorize my agent to make the decision that my agent determines is the decision I would make if I were competent to do so.

PART 2: Designation of Mental Health Care Agent

I hereby designate and appoint the following person as my agent to make mental health care decisions for me as authorized in this document. This person is to be notified immediately of my admission to a psychiatric facility.

Name: ________________________________________________________________________
Address:
____________________________________________________________________________
____________________________________________________________________________

Phone Number ____________________

If the person named above is unavailable or unable to serve as my agent, I hereby appoint and desire immediate notification of my alternate agent as follows:

Name: ________________________________________________________________________
Address: ______________________________________________________________________
____________________________________________________________________________

Phone Number ____________________

1. Authority Granted to My Agent (Initial if you agree with a statement; leave blank if you do not.)

A. ______ If I become incapable of giving consent to mental health care treatment, I hereby grant to my agent full power and authority to make mental health care decisions for me, including the right to consent, refuse consent, or withdraw consent to any mental health care, treatment, service or procedure, consistent with any instructions and/or limitations I have set forth in this advance directive. If I have not expressed a choice in this advance directive, I authorize my agent to make the decision that my agent determines is the decision I would make if I were competent to do so.

B. ______ Having named an agent to act on my behalf, I do, however, wish to be able to discharge or change the person who is to be my agent if that agent is instrumental in the process of initiating or extending any period of psychiatric treatment against my will. My ability to revoke or change agents in this circumstance shall be in effect even while I am incompetent or
incapacitated, if allowed by law. Even if I choose to discharge or replace my agent, all other provisions of this advance directive shall remain in effect and shall only be revocable or changeable by me at a time when I am considered competent and capable of making informed health care decisions.

2. My Preference as to a Court-Appointed Guardian In the event a court decides to appoint a guardian who will make decisions regarding my mental health treatment, I desire the following person to be appointed:

   Name: __________________________________________
   Relationship: ____________________________________
   Address: _______________________________________
   City, State, Zip Code: ______________________________
   Day phone: ___________________________ Evening Phone: __________________________

PART 3: Specific Instructions, Special Provisions and Limitations Regarding My Mental Health Treatment and Care

1. My preferences regarding alternatives to hospitalization and choice of treatment facilities in the event 24-Hour Care is deemed medically necessary

   A. _____ In the event my psychiatric condition is serious enough to require 24-hour care and I have no physical conditions that require immediate access to emergency medical care, I would prefer to receive this care in programs/facilities designed as alternatives to psychiatric hospitalizations.

   ______________________________________________
   ______________________________________________
   ______________________________________________

   B. _____ In the event I am to be admitted to a hospital for 24-hour care, I would prefer to receive care at the following hospitals:

   ______________________________________________
   ______________________________________________
   ______________________________________________
   ______________________________________________

   C. _____ I do not wish to be committed to the following hospitals or programs/facilities for psychiatric care for the reasons I have listed:

   Facility’s Name: ________________________________
   Reason: ________________________________________
2. My preferences regarding emergency interventions

If, during an admission or commitment to a mental health treatment facility, it is determined that I am engaging in behavior that requires an emergency intervention (e.g., seclusion and/or physical restraint and/or medication), my wishes regarding which form of emergency interventions should be made are as follows in order of preference:

Fill in numbers, giving 1 to your first choice, 2 to your second, and so on until each has a number. If an intervention you prefer is not listed, write it in after "other" and give it a number as well.

_____ Seclusion
_____ Physical restraints
_____ Seclusion and physical restraint (combined)
_____ Medication by injection
_____ Medication in pill form
_____ Liquid medication
_____ Other: _____________________________

Initial the paragraph below if you agree; leave blank if you do not agree.

__________ In the event that my attending physician decides to use medication for rapid tranquilization in response to an emergency situation after due consideration of my preferences for emergency treatments stated above, I expect the choice of medication to reflect any preferences I have expressed in this section and in Section 4. The preferences I express in this section regarding medication in emergency situations do not constitute consent to use of the medication for non-emergency treatment.

3. My preferences for physicians who will treat me if I am hospitalized

Put your initials after the letter and complete if you wish either or both paragraphs to apply.

A. My choice of treating physician is:

Dr. ____________________________________ Phone number
____________________________________

OR
Dr. _____________________________ Phone number __________________________

OR
Dr. _____________________________ Phone number __________________________

B. ________ I do not wish to be treated by the following, for the reasons stated:

Dr. _____________________________
Reason: ____________________________

Dr. _____________________________
Reason: ____________________________

4. My preferences regarding medications for psychiatric treatment

In this section, you may choose any of the paragraphs A-G that you wish to apply. Be sure to initial those you choose.

If it is determined that I am not legally competent to consent to or to refuse medications relating to my mental health treatment, my wishes are as follows:

A. ______ I consent to the medications agreed to by my agent, after consultation with my treating physician and any other individuals my agent may think appropriate, with the reservations, if any, described in (D) below.

B. ______ I consent to and authorize my agent to consent to the administration of:

<table>
<thead>
<tr>
<th>Medication Name</th>
<th>Not to exceed the following dosage:</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
</tbody>
</table>

OR

In such dosage(s) as determined by

Dr. _____________________________
Dr. _____________________________
Dr. _____________________________
Dr. _____________________________
C. _____ I consent to the medications deemed appropriate by
Dr._________________________________________, whose address and phone number are:
______________________________________________________________________________
______________________________________________________________________________

D. _____ I specifically do not consent and I do not authorize my agent to consent to the
administration of the following medications or their respective brand-name, trade-name or
generic equivalents:

<table>
<thead>
<tr>
<th>Name of Drug</th>
<th>Reason for Refusal</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
</tbody>
</table>

E. _____ I am willing to take the medications excluded in (D) above, if my only reason for
excluding them is their side effects and the dosage can be adjusted to eliminate those side effects.

F. _____ I am concerned about the side effects of medications and do not consent or authorize my
agent to consent to any medication that has any of the side effects I have checked below at a 1%
or greater level of incidence (check all that apply).

_____ Tardive dyskinesia
_____ Tremors
_____ Loss of sensation
_____ Nausea/vomiting
_____ Motor restlessness
_____ Neuroleptic Malignant Syndrome
_____ Seizures
_____ Other _____________________

_____ Muscle/skeletal rigidity

G. _____ I have the following other preferences about psychiatric medications:
______________________________________________________________________________
______________________________________________________________________________

5. My preferences regarding electroconvulsive therapy (ECT or Shock Treatment)

If it is determined that I am not legally capable of consenting to or refusing electroconvulsive
therapy, my wishes regarding electroconvulsive therapy are as follows:
Initial A or B. If you check B, you must also initial B1, B2 or B3:

A. _____ I do not consent to administration of electroconvulsive therapy.

B. _____ I consent, and authorize my agent to consent, to the administration of electroconvulsive therapy, but only:
   
   B1. _____ with the number of treatments that the attending psychiatrist deems appropriate;
   
   OR
   
   B2. _____ with the number of treatments that Dr. __________________________ deems appropriate. Phone number and address of doctor: _________________________________ _________________________________
   
   OR
   
   B3. _____ for no more than the following number of ECT treatments: _________

C. _____ Other instructions and wishes regarding the administration of electroconvulsive therapy:

______________________________________________________________________________
______________________________________________________________________________

6. Consent for experimental studies or drug trials

Initial one of the following paragraphs:

A. _____ I do not wish to participate in experimental drug studies or drug trials.

B. _____ I hereby consent to my participation in experimental drug studies or drug trials.

C. _____ I authorize my agent to consent to my participation in experimental drug studies if my agent, after consultation with my treating physician and any other individuals my agent may think appropriate, determines that the potential benefits to me outweigh the possible risks of my participation and that other, non-experimental interventions are not likely to provide effective treatment.

PART 4: Statement of My Preferences Regarding Notification of Others, Visitors, and Custody of My Child(ren)

1. The following individuals should be notified immediately of my admission to a psychiatric facility

Name: ___________________________ Relationship: ___________________________

Address: ________________________________________________________________

Phone (Day):_________________________ Phone (Eve.): __________________________

Mobile phone: __________________________

It is also my desire that this person be permitted to visit me: Yes_____ No _____

Name: ___________________________ Relationship: ___________________________
Address: ______________________________________________________________
Phone (Day):________________________________________ Phone (Eve.): __________________________________
Mobile phone: ____________________________
It is also my desire that this person be permitted to visit me: Yes____ No _____
Name: ______________________________________________ Relationship: _______________________________
Address: ______________________________________________________________
Phone (Day):________________________________________ Phone (Eve.): __________________________________
Mobile phone: ____________________________
It is also my desire that this person be permitted to visit me: Yes____ No _____
Name: ______________________________________________ Relationship: _______________________________
Address: ______________________________________________________________
Phone (Day):________________________________________ Phone (Eve.): __________________________________
Mobile phone: ____________________________
It is also my desire that this person be permitted to visit me: Yes____ No _____

2. The following individuals are prohibited from visiting me:

<table>
<thead>
<tr>
<th>Name</th>
<th>Relationship</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
</tr>
</tbody>
</table>

3. My preferences for care and temporary custody of my children

In the event that I am unable to care for my child(ren), I want the following person as my first choice to care for and have temporary custody of my child(ren):

Name: ______________________________________ Relationship: ______________________________
Address: _____________________________________________________________________________
City, State, Zip: _____________________________________________________________________
Phone: (Day) ___________________ Phone (Eve.)________________________
Mobile Phone: ______________________

In the event that the person named above is unable to care for and have temporary custody of my child(ren), I desire one of the following people to serve in that capacity.

My Second Choice
Name: ______________________________________ Relationship: ______________________________
PART 5: Statement of My Preferences Regarding Revocation or Termination of This Advance Directive

Initial all paragraphs that you wish to apply to you.

1. Revocation of My Psychiatric Advance Directive

_________My wish is that this mental health directive may be revoked, suspended or terminated by me at any time, if state law so permits.

2. Revocation of My Psychiatric Advance Directive During a Period of Incapacity

_________ My wish is that this mental health care directive may be revoked, suspended or terminated by me only at times that I have the capacity and competence to do so. I understand that I may be choosing to give up the right to change my mind at any time. I expressly give up this right to ensure compliance with my advance directive. My decision not to be able to change this advance directive while I am incompetent or incapacitated is made to ensure that my previous, carefully considered thoughts about how I want to be treated will remain in effect during the time I am incompetent or incapacitated.

2A. _________ Notwithstanding the above, it is my wish that my agent or other decision maker specifically ask me about my preferences before making a decision regarding mental health care, and take the preferences I express here into account when making such a decision, even while I am incompetent or incapacitated.

3. Other Instructions about Mental Health Care

(Use this space to add any other instructions that you wish to have followed. If you need to, add pages, numbering them as part of this section.)
4. Duration of Mental Health Care Directive Initial A or B.

A.____ It is my intention that this advance directive will remain in effect for an indefinite period of time.

OR

B.____ It is my intention that this advance directive will automatically expire two years from the date it was executed.

If my choice above is not valid under state law, then it is my intention that this advance directive remain in effect for as long as the law permits.

PART 6: Signature Page

By signing here I indicate that I understand the purpose and effect of this document.

_________________________________________________________ __________________________
Your Signature Date

The directive above was signed and declared by the "Declarant," (your name) __________________________________________, to be his/her mental health care advance directive, in our presence who, at his/her request, have signed names below as witness. We declare that, at the time of the execution of this instrument, the Declarant, according to our best knowledge and belief, was of sound mind and under no constraint or undue influence. We further declare that none of us is: 1) a physician; 2) the Declarant's physician or an employee of the Declarant's physician; 3) an employee or a patient of any residential health care facility in which the Declarant is a patient; 4) designated as agent or alternate under this document; or 5) a beneficiary or creditor of the estate of the Declarant.

Dated at ________________________________ (county, state),
this __________________ day of __________________, 20___.

Witness Signatures

Witness 1:
_________________________________________________________ Signature of Witness 1
_________________________________________________________ Name of Witness 1 (printed)
_________________________________________________________ Home address of Witness 1
_________________________________________________________ City, State, Zip Code of Witness 1

Witness 2:
_________________________________________________________ Signature of Witness 2
_________________________________________________________ Name of Witness 2 (printed)
_________________________________________________________ Home address of Witness 2
_________________________________________________________ City, State, Zip Code of Witness 2
Go to the notary form if your state requires it.

(for use by the notary): State of ________________________, County of ___________________________
Subscribed and sworn to or affirmed before me by the Declarant, ________________________________,

and (names of witnesses) ______________________________________________________

witnesses, as the voluntary act and deed of the Declarant,
this _______________ day of ________________, ______________.

My commission expires:
________________________________________________________

__________________________

Notary Public Seal:
Appendix C: Initial Patient Population (IPP) for the Transition Record Measures

The initial selection of cases (i.e., patient medical records) intended for data abstraction under the IPFQR Program must meet the following criteria. The cases must be all patients (i.e., both Medicare and non-Medicare) receiving care in a psychiatric hospital or psychiatric unit paid under the Inpatient Psychiatric Facility Prospective Payment System (IPF PPS).

If the facility bills Medicare for inpatient psychiatric services under the IPF PPS, it is considered to be an IPF eligible to participate in the IPFQR Program and thereby all patient discharges from that facility would be identified as patients discharged from an IPF. This applies to inpatient psychiatric services furnished by Medicare-participating entities in the United States and Puerto Rico that are classified as free-standing psychiatric hospitals or psychiatric units within acute care or critical access hospitals.

To use the following IPP algorithm, the facility must initially sort the cases as discharges from the IPF. After identifying the cases discharged from the IPF, the codes listed in the algorithm below would be used to determine the IPP for the transition record measures.
Start Initial Patient Population logic

Identify patients discharged from IPF

UB-04 Type of Bill
Form locator 04

≠ 0111, 0114, 0121, 0124, 0211, 0214, 0221, 0224, 0281, 0284

UB-04 Discharge Status
Form locator 17

≠ 01, 02, 03, 04, 05, 06, 43, 50, 51, 61, 62, 63, 64, 65, 66 or 70

Patient NOT in the Initial Patient Population; Patient not eligible to be sampled

= 01, 02, 03, 04, 05, 06, 43, 50, 51, 61, 62, 63, 64, 65, 66, 70

Patient is in the Initial Patient Population; Patient is eligible to be sampled.
Appendix D: Screening For Metabolic Disorders

Measure Information Form

New Measure: January 2017

Performance Measure Name: Screening for Metabolic Disorders Version 1.0

Description: Percentage of discharges from an IPF for which a structured metabolic screening for four elements was completed in the 12 months prior to discharge.

Rationale: Studies show that both second generation antipsychotics (SGAs) and antipsychotics increase the risk of metabolic syndrome. Metabolic syndrome is a cluster of conditions that occur together, including excess body fat around the waist, high blood sugar, high cholesterol, and high blood pressure, and increases the risk of coronary artery disease, stroke, and type 2 diabetes.

In 2004, a consensus statement was released by the American Diabetes Association (ADA), the American Psychiatric Association (APA), the American Association of Clinical Endocrinologists, and the North American Association for the Study of Obesity regarding an association between the use of specific SGAs and diabetes and obesity. This group recommended that providers obtain baseline screening for metabolic syndrome prior to or immediately after the initiation of antipsychotics to reduce the risk of preventable adverse events and improve the physical health status of the patient.

The Screening for Metabolic Disorders measure was developed to assess the percentage of patients discharged from an IPF for which a structured metabolic screening for four elements was completed in the past year. Additional information regarding the clinical support for this measure may be found in the FY 2016 IPPS Final Rule at http://www.gpo.gov/fdsys/pkg/FR-2015-08-05/pdf/2015-18903.pdf.

Type of Measure: Process

Improvement Noted As: Increase in the rate.

Numerator Statement: The total number of patients who received a metabolic screening in the 12 months prior to discharge - either prior to or during the index IPF stay.

Data Elements:
- Body Mass Index (BMI)
- Blood Pressure
- Blood Glucose
- Discharge Disposition
- Lipid Panel
- Reason for Incomplete Metabolic Screening

Denominator Statement: Discharges from an IPF with one or more routinely scheduled antipsychotic medications during the measurement period.
**Included Populations:** All patients discharged from IPFs with one or more routinely scheduled antipsychotic medications during the measurement period.

**Excluded Populations:**
- Patients for whom a screening could not be completed due to the patient’s enduring unstable medical or psychological condition.
- Patients with a length of stay equal to or greater than 365 days, or equal to or less than three days.
- Patients who expired during the admission (Discharge Disposition = 6)

**Data Elements:**
- Admission Date
- Discharge Date
- Number of Antipsychotic Medications Prescribed at Discharge

PRN (“as needed”) antipsychotic medications or short-acting intramuscular antipsychotic medications do not count towards the denominator of this measure. For the list of the short-acting intramuscular antipsychotic medications, refer to the Specifications Manual for Joint Commission National Quality Core Measures, Appendix C, Table Number 10.1: Short-Acting Intramuscular Antipsychotic Medications, available at: [https://manual.jointcommission.org/releases/TJC2016A/AppendixCTJC.html](https://manual.jointcommission.org/releases/TJC2016A/AppendixCTJC.html).

Please note that the Joint Commission may update these lists of medications up to two times per year to ensure that they are in line with current clinical guidelines. Refer back to these lists on a quarterly basis for the most up-to-date specifications.

**Risk Adjustment:** No

**Data Collection Approach:** Retrospective data sources for required data elements include administrative data and medical record documents. Some hospitals may prefer to gather data concurrently by identifying patients in the population of interest. This approach provides opportunities for improvement at the point of care/service.

**Screening Elements**
- The medical record must provide documentation of the completion of all four of the following tests/measurements:
  1. BMI,
  2. Blood Pressure,
  3. Blood Glucose, and
  4. Lipid Panel (which includes total cholesterol, triglycerides, high-density lipoprotein, and low-density lipoprotein)
Criteria for the Screening
- Screenings must have been completed at least once in the 12 months prior to the patient’s date of discharge.
- Screenings can be conducted either at the reporting facility or another facility for which records are available to the reporting facility.
- The presence/absence of each screening element is determined by identifying the documentation of numeric lab results and vitals in the medical record reviewed.

Data Accuracy: Data accuracy is enhanced when all definitions are used without modification. The data dictionary should be referenced for definitions and abstraction notes when questions arise during data collection.

Sampling: For reporting to the IPFQR Program two options are available for measure data collected in CY 2017 and submitted in CY 2018, impacting FY 2019 payment determination:
- No sampling
- Submit one uniform, global sample for all measures that allow sampling as described on pages 46717-46719 of the FY 2016 IPF PPS Final Rule.

Data Reported As: Aggregate rate generated from count data reported as a proportion

Selected References:

Screening for Metabolic Disorders

**Numerator:** The total number of patients who received a metabolic screening in the 12 months prior to discharge - either prior to or during the index IPF stay.

**Denominator:** Discharges from an IPF with one or more routinely scheduled antipsychotic medications during the measurement period.
Screening for Metabolic Disorders Narrative

**Numerator:** The total number of patients who received a metabolic screening in the 12 months prior to discharge - either prior to or during the index IPF stay.

**Denominator:** Discharges from an IPF with one or more antipsychotic medications during the measurement period.

1. Start processing. Run cases that are included in the Initial Patient Population.
2. Calculate Length of Stay. Length of Stay, in days, is equal to the Discharge Date minus the Admission Date.
3. Check Length of Stay
   a. If Length of Stay is equal to or greater than 365 days or equal to or less than 3 days, the case will be excluded. Stop processing.
   b. If Length of Stay is less than 365 days and greater than 3 days, proceed to Discharge Disposition.
4. Check Discharge Disposition
   a. If Discharge Disposition equals 6, the case will be excluded. Stop processing.
   b. If Discharge Disposition equals 1, 2, 3, 4, 5, 7, or 8, proceed to Number of Antipsychotic Medications Prescribed at Discharge.
5. Check Number of Antipsychotic Medications Prescribed at Discharge
   a. If Number of Antipsychotic Medications Prescribed at Discharge is equal to zero, the case will be excluded. Stop processing.
   b. If Number of Antipsychotic Medications is equal to or greater than 1 or unable to determine, proceed to Body Mass Index.
6. Check Body Mass Index
   a. If Body Mass Index equals No, proceed to Reason for Incomplete Metabolic Screening.
   b. If Body Mass Index equals Yes, proceed to Blood Pressure.
7. Check Blood Pressure
   a. If Blood Pressure equals No, proceed to Reason for Incomplete Metabolic Screening.
   b. If Blood Pressure equals Yes, proceed to Blood Glucose.
8. Check Blood Glucose
   a. If Blood Glucose equals No, proceed to Reason for Incomplete Metabolic Screening.
   b. If Blood Glucose equals Yes, proceed to Lipid Panel.
9. Check Lipid Panel
   a. If Lipid Panel equals No, proceed to Reason for Incomplete Metabolic Screening.
   b. If Lipid Panel equals Yes, the case will be included in the Numerator. Stop processing.
10. Check Reason for Incomplete Metabolic Screening
    a. If Reason for Incomplete Metabolic Screening equals No, the case will be included in the Denominator only. Stop processing.
    b. If Reason for Incomplete Metabolic Screening equals Yes, the case will be excluded. Stop processing.

<td>122</td>
</tr>
</tbody>
</table>
**Data Element Name:** Admission Date

**Definition:** The month, day, and year of admission to an inpatient psychiatric facility

**Suggested Data Collection Question:** What is the date the patient was admitted to inpatient psychiatric facility?

**Format:**
- **Length:** 10 – MM-DD-YYYY (includes dashes)
- **Type:** Date
- **Occurs:** 1

**Allowable Values:**
- MM = Month (01-12)
- DD = Day (01-31)
- YYYY = Year (20xx)

**Notes for Abstraction:**
- The intent of this data element is to determine the date that the patient was actually admitted to an inpatient psychiatric facility. Because this data element is critical in determining the population for all measures, the abstractor should NOT assume that the claim information for the admission date is correct. If the abstractor determines through chart review that the date from billing is incorrect, for purposes of abstraction, she/he should correct and override the downloaded value.
- If using claim information, the ‘Statement Covers Period’ is not synonymous with the ‘Admission Date’ and should not be used to abstract this data element. These are two distinctly different identifiers:
  - The Admission Date is purely the date the patient was admitted as an inpatient to the facility.
  - The Statement Covers Period (“From” and “Through” dates) identifies the span of service dates included in a particular claim. The “From” Date is the earliest date of service on the claim.
- For patients who are admitted to Observation status and subsequently admitted to inpatient psychiatric care, abstract the date that the determination was made to admit to inpatient psychiatric care and the order was written. Do not abstract the date that the patient was admitted to Observation.
  
  **Example:**
  Medical record documentation reflects that the patient was admitted to observation on 04-05-20xx. On 04-06-20xx the physician writes an order to admit to inpatient psychiatric care effective 04-05-20xx. The Admission Date would be abstracted as 04-06-20xx; the date the determination was made to admit to inpatient psychiatric care and the order was written.
- The admission date should not be abstracted from the earliest admission order without regards to substantiating documentation. If documentation suggests that the earliest admission order does not reflect the date the patient was admitted to inpatient psychiatric care, this date should not be used.
- If there are multiple inpatient orders, use the order that most accurately reflects the date that the patient was admitted.
Note: The physician order is the priority data source for this data element. If there is not a physician order in the medical record, use the other only allowable sources to determine the Admission Date.

**ONLY ALLOWABLE SOURCES**
1. Physician orders
2. Face Sheet
3. UB-04

**Excluded Data Sources**
UB-04 “From” and “Through” dates

**Inclusion Guidelines for Abstraction:**
None

**Exclusion Guidelines for Abstraction:**
- Admit to observation
- Arrival date
Data Element Name: Blood Glucose

Definition: A lab test of glucose levels in the blood that complies with the American Diabetes Association (ADA) guideline. The guidelines currently recommend using the HbA1c, a fasting plasma glucose, or the 2-hour plasma glucose value after a 75g oral glucose tolerance test (OGTT) to test for diabetes.

Suggested Data Collection Question: Is there documentation of a numerical value of blood glucose or HbA1c in the patient’s medical record during this stay or at any time during the 12 months prior to discharge?

Format:
- Length: 1
- Type: Alphanumeric
- Occurs: 1

Allowable Values:
Y (Yes) Documentation in the medical record for this stay or at any time during the 12 months prior to discharge includes the numerical value of blood glucose.
N (No) Documentation in the medical record for this stay or at any time during the 12 months prior to discharge does not include the numerical value of blood glucose or unable to determine from medical record documentation.

Notes for Abstraction:
- To meet the screening element for blood glucose value, the abstractor can either check for documentation of HbA1c, a fasting plasma glucose, or the 2-hour plasma glucose value after a 75g oral glucose tolerance test (OGTT) to test for diabetes.
- Review the medical record of the current patient stay. If you do not find evidence that a blood glucose measurement occurred or was documented during this stay, review any available medical records for the 12 months prior to the date of discharge.
- If the blood glucose value was not from the current stay, documentation in the patient record for this stay needs to include the original date on which the blood glucose was measured and the source of the information (e.g., medical record of a prior hospital stay, information obtained from another provider, and the name of this provider).

Suggested Data Sources:
- Emergency department record
- Consultation notes
- History and physical
- Initial (admission) assessment form
- Laboratory reports
- Nursing graphic sheets
- Nursing notes
- Physician progress notes
- Psychiatrist assessment/admission form
**Inclusion Guidelines for Abstraction:**
- Fasting glucose level
- Fasting sugar
- HbA1c
- 2-hour glucose level after OGTT

**Exclusion Guidelines for Abstraction:**
- Non-quantitative assessment of glucose test (i.e., normal, abnormal, etc.)
- Finger-stick blood glucose (FSBS)
Data Element Name: Blood Pressure

Definition: Reading of diastolic and systolic blood pressure

Suggested Data Collection Question: Was there a blood pressure (numerical systolic and diastolic values in mmHg) documented in the patient’s medical record during this stay or at any time during the 12 months prior to discharge?

Format:
   Type: Alphanumeric
   Occurs: 1

Allowable Values:
Y (Yes) Documentation in the medical record for this stay or at any time during the 12 months prior to discharge includes the numerical value of blood pressure.
N (No) Documentation in the medical record for this stay or at any time during the 12 months prior to discharge does not include the numerical value of blood pressure or unable to determine from medical record documentation.

Notes for Abstraction:
- Review the medical record for the current patient stay. If you do not find evidence that a blood pressure measurement occurred or was documented during this stay, review any available medical records for the 12 months prior to the date of discharge.
- If the blood pressure measurement was not from the current stay, documentation in the patient record for this stay needs to include the original date on which the blood pressure was measured and the source of the information (e.g., medical record of a prior hospital stay, information obtained from another provider, and the name of this provider).

Suggested Data Sources:
- Biopsychosocial assessment
- Emergency department record
- History and physical
- Initial (admission) assessment form
- Laboratory Report
- Nursing notes
- Physician progress notes
- Psychiatrist assessment/admission form
- Vital record/flow sheet

Inclusion Guidelines for Abstraction:
None

Exclusion Guidelines for Abstraction:
- Self-reported blood pressure.
- Non-quantitative assessment of blood pressure (i.e. normal, abnormal, etc.).
Data Element Name: Body Mass Index (BMI)

Definition: Weight-to-height ratio, calculated by dividing one’s weight in kilograms (kg) by the square of one’s height in meters (m). If the weight is in pounds (lb) and height is in feet (ft) or inches (in), conversion to the metric unit is needed prior to the BMI calculation.

Suggested Data Collection Question: Was there a numerical value of Body Mass Index (BMI) documented in the patient’s medical record during this stay or at any time during the 12 months prior to discharge?

Format:
   Type: Alphanumeric
   Occurs: 1

Allowable Values:
Y (Yes) Documentation in the medical record for this stay or at any time during the 12 months prior to discharge includes the numerical value of BMI.
N (No) Documentation in the medical record for this stay or at any time during the 12 months prior to discharge does not include the numerical value of BMI or unable to determine from medical record documentation.

Notes for Abstraction:
   • Documentation of height and weight only is NOT an acceptable substitute for BMI.
   • Review the medical record for the current patient stay. If you do not find evidence that a BMI was calculated or documented during this stay, review any available medical records for the 12 months prior to the date of discharge.
   • If the BMI value was not from the current stay, documentation in the patient record for this stay needs to include the original date on which the BMI value was calculated and the source of the information (e.g., medical record of a prior hospital stay, information obtained from another provider, and the name of this provider).

Suggested Data Sources:
   • Biopsychosocial assessment
   • Emergency department record
   • History and physical
   • Initial (admission) assessment form
   • Nursing notes
   • Physician progress notes
   • Psychiatrist assessment/admission form

Inclusion Guidelines for Abstraction:
   None

Exclusion Guidelines for Abstraction:
   • Documentation of height and weight only
   • Non-quantitative assessment of BMI (i.e., normal, abnormal, etc.)
Data Element Name: *Discharge Date*

**Definition:** The month, day, and year the patient was discharged from inpatient psychiatric care, left against medical advice, or expired during this stay.

**Suggested Data Collection Question:** What is the date the patient was discharged from inpatient psychiatric care, left against medical advice (AMA), or expired?

**Format:**
- **Length:** 10 – MM-DD-YYYY (includes dashes)
- **Type:** Date
- **Occurs:** 1

**Allowable Values:**
- MM = Month (01-12)
- DD = Day (01-31)
- YYYY = Year (20xx)

**Notes for Abstraction:**
Because this data element is critical in determining the population for many measures, the abstractor should NOT assume that the claim information for the discharge date is correct. If the abstractor determines through chart review that the date is incorrect, she/he should correct and override the downloaded value. If the abstractor is unable to determine the correct discharge date through chart review, she/he should default to the discharge date on the claim information.

**Suggested Data Sources:**
- Discharge summary
- Face sheet
- Nursing discharge notes
- Physician orders
- Progress notes
- Transfer note
- UB-04

**Inclusion Guidelines for Abstraction:**
None

**Exclusion Guidelines for Abstraction:**
None
**Data Element Name:** Discharge Disposition

**Definition:** The final place or setting to which the patient was discharged on the day of discharge.

**Suggested Data Collection Question:** What was the patient’s discharge disposition on the day of discharge?

**Format:**
- **Length:** 1
- **Type:** Alphanumeric
- **Occurs:** 1

**Allowable Values:**
1 – Home
2 – Hospice: Home
3 – Hospice: Health Care Facility
4 – Acute Care Facility
5 – Other Health Care Facility
6 – Expired
7 – Left Against Medical Advice/AMA
8 – Not Documented or Unable to Determine (UTD)

**Notes for Abstraction:**
- Only use documentation written on the day prior to discharge through 30 days after discharge when abstracting this data element.
  Example: Documentation in the Discharge Planning notes on 04-01-20xx state that the patient will be discharged back home. On 04-06-20xx the physician orders and nursing discharge notes on the day of discharge reflect that the patient was being transferred to skilled care. The documentation from 04-06-20xx would be used to select value “5” (Other Health Care Facility).
- The medical record must be abstracted as documented (taken at "face value"). Inferences should not be made based on internal knowledge.
- If there is documentation that further clarifies the level of care, that documentation should be used to determine the correct value to abstract. If documentation is contradictory, use the latest documentation.
  Examples:
  - Discharge summary dictated 2 days after discharge states patient went home. Physician note on day of discharge further clarifies that the patient will be going home with hospice. Select value "2" (Hospice: Home).
  - Discharge planner note from day before discharge states XYZ Nursing Home. Discharge order from day of discharge states Discharge home. Contradictory documentation, use latest. Select value "1" (Home).
  - Physician order on discharge states Discharge to ALF. Discharge instruction sheet completed after the physician order states patient discharged to SNF. Contradictory documentation, use latest. Select value "5" (Other Health Care Facility).
- If documentation is contradictory, and you are unable to determine the latest documentation, select the disposition ranked highest (top to bottom) in the following list. See Inclusion lists for examples.
  - Acute Care Facility
  - Hospice: Health Care Facility
Hospice: Home
Other Health Care Facility
Home

- Hospice (values "2" and "3") includes discharges with hospice referrals and evaluations.
- If the medical record states only that the patient is being discharged to another hospital and does not reflect the level of care that the patient will be receiving, select value "4" (Acute Care Facility).
- If the medical record identifies the facility the patient is being discharged to by name only (e.g., Park Meadows), and does not reflect the type of facility or level of care, select value "5" (Other Health Care Facility).
- If the medical record states only that the patient is being discharged and does not address the place or setting to which the patient was discharged, select value "1" (Home).

When determining whether to select value "7" (Left Against Medical Advice/AMA):
- Explicit "left against medical advice" documentation is not required; e.g., Patient is refusing to stay for continued care - Select value "7".
- Documentation suggesting that the patient left before discharge instructions could be given does not count.
- A signed AMA form is not required, for the purposes of this data element.
- Do not consider AMA documentation and other disposition documentation as contradictory. If any source states the patient left against medical advice, select value "7", regardless of whether the AMA documentation was written last; e.g., AMA form signed and discharge instruction sheet states Discharged home with belongings - Select "7".

Suggested Data Sources:
- Progress notes
- Physician orders
- Discharge summary
- Discharge instruction sheet
- Discharge planning notes
- Nursing discharge notes
- Social services notes
- Transfer record

Excluded Data Sources:
- Any documentation prior to the last two days of hospitalization
- Coding documents
- UB-04

Inclusion Guidelines for Abstraction:
Home (Value 1):
- Assisted Living Facilities (ALFs) - Includes ALFs and assisted living care at nursing home, intermediate care, and skilled nursing facilities
- Court/Law Enforcement - Includes detention facilities, jails, and prison
- Home - Includes board and care, foster or residential care, group or personal care homes, retirement communities, and homeless shelters
- Home with Home Health Services
- Outpatient Services including outpatient procedures at another hospital, Outpatient Chemical Dependency Programs and Partial Hospitalization
Hospice - Home (Value 2):
  - Hospice in the home (or other Home setting as above in Value 1)

Hospice Health Care Facility (Value 3):
  - Hospice - General Inpatient and Respite
  - Hospice - Residential and Skilled Facilities
  - Hospice - Other Health Care Facilities

Acute Care Facility (Value 4):
  - Acute Short Term General and Critical Access Hospitals
  - Cancer and Children’s Hospitals
  - Department of Defense and Veteran’s Administration Hospitals

Other Health Care Facility (Value 5):
  - Extended or Intermediate Care Facility (ECF/ICF)
  - Long Term Acute Care Hospital (LTACH)
  - Nursing Home or Facility including Veteran’s Administration Nursing Facility
  - Psychiatric Hospital or Psychiatric Unit of a Hospital
  - Rehabilitation Facility including Inpatient Rehabilitation Facility/Hospital or Rehabilitation Unit of a Hospital
  - Skilled Nursing Facility (SNF), Sub-Acute Care or Swing Bed
  - Transitional Care Unit (TCU)
  - Veterans Home

Exclusion Guidelines for Abstraction:
  None
Data Element Name: *Lipid Panel*

**Definition:** A lab test including at least the following four components: total cholesterol, triglycerides, high-density lipoprotein cholesterol, and low-density lipoprotein cholesterol

**Suggested Data Collection Question:** Is there documentation of numerical values of all the components of a Lipid Panel (total cholesterol, triglycerides, high-density lipoprotein cholesterol, and low-density lipoprotein cholesterol) in the patient’s medical record during this stay or at any time during the 12 months prior to discharge?

**Format:**
- **Length:** 1
- **Type:** Alphanumeric
- **Occurs:** 1

**Allowable Values:**
- **Y (Yes)** Documentation in the medical record for this stay or at any time during the 12 months prior to discharge includes the numerical values of all four components of the lipid panel.
- **N (No)** Documentation in the medical record for this stay or at any time during the 12 months prior to discharge does not include the numerical value of all four components of the lipid panel or unable to determine from medical record documentation.

**Notes for Abstraction:**
- To meet the screening element for lipid panel, numeric values for all four components of the lipid panel need to be documented in the medical record. If any one of the components is missing, select “No.”
- The high- and low-density lipoprotein lab value MUST reference cholesterol (HDL-C or LDL-C).
- Review the medical record of the current patient stay. If you do not find evidence that a lipid panel measurement occurred or was documented during this stay, review any available medical records for the 12 months prior to the date of discharge.
- If the lipid panel values were not from the current stay, documentation in the patient record for this stay needs to include the original date that the lipid panel was measured and the source of the information (e.g., medical record of a prior hospital stay, information obtained from another provider, and the name of this provider).

**Suggested Data Sources:**
- Consultation notes
- History and physical
- Initial (admission) assessment form
- Laboratory reports
- Nursing notes
- Physician progress notes
- Psychiatrist assessment/admission form
**Inclusion Guidelines for Abstraction:**
There must be numerical values for all four lipid panel components documented in the medical record. This list is all inclusive:

- TC: total cholesterol
- TG: triglycerides
- HDL-C: high-density lipoprotein cholesterol
- LDL-C: low-density lipoprotein cholesterol

**Exclusion Guidelines for Abstraction:**
- Non-quantitative assessment of lipid panel (i.e., normal, abnormal, etc.)
- Results from point-of-care tests for any of the four lipid panel components
Data Element Name: *Number of Antipsychotic Medications Prescribed at Discharge*

**Definition:** The number of routinely scheduled antipsychotic medications prescribed to the patient at discharge as documented in the medical record.

**Suggested Data Collection Question:** What is the documented number of antipsychotic medications prescribed for the patient at discharge?

**Format:**
- **Length:** 2 or UTD
- **Type:** Alphanumeric
- **Occurs:** 1

**Allowable Values:**
- 0-99
- UTD (Unable to Determine)

**Notes for Abstraction:**
- An antipsychotic medication is defined as any of a group of drugs, such as the phenothiazines, butyrophenones or serotonin-dopamine antagonists, which are used to treat psychosis. An antipsychotic medication is also called neuroleptic (refer to Appendix C, Table 10.0 - Antipsychotic Medications).
- All antipsychotic medications should be counted regardless of the indication for use or the reason documented for prescribing the antipsychotic medication.
- If the patient was in an acute-care hospital and had multiple admissions to the psychiatric unit during his or her hospitalization, this information should be abstracted only once at the time of discharge from the hospital.
- If the patient is on two forms of the same medication (i.e., po and IM), this would be counted as one antipsychotic medication.

It is acceptable to use data derived from pharmacy reports or clinical information systems if they are available and are directly derived from the medical record with a process in place to confirm their accuracy. If this is the case, these may be used in lieu of the suggested data sources listed below.

**Suggested Data Sources:**
- Aftercare discharge plan
- Continuing care plan
- Discharge plan
- Final discharge summary
- Interim discharge summary
- Medication reconciliation form
- Physician discharge orders
- Physician progress notes
- Referral form

**Inclusion Guidelines for Abstraction:**
Refer to Specifications Manual for Joint Commission National Quality Core Measures, Appendix C, Table 10.0 – Antipsychotic Medications.
Exclusion Guidelines for Abstraction:

- PRN antipsychotic medications
- Short-acting intramuscular antipsychotic medications (refer to Appendix C, Table 10.1-Short-Acting Intramuscular Antipsychotic Medications)
Data Element Name: *Reason for Incomplete Metabolic Screening*

**Definition:** A statement by the physician/APN/PA in the current medication record indicating that the screening elements could not be completed due to patient’s enduring unstable medical or psychological condition.

**Suggested Data Collection Question:** Is there documentation in the medical record noting that the metabolic screening cannot be completed due to patient’s unstable medical or psychological condition?

**Format:**
- **Length:** 1
- **Type:** Alphanumeric
- **Occurs:** 1

**Allowable Values:**
- **Y** (Yes) Documentation in the medical record for this stay specifies that the metabolic screening cannot be completed due to patient’s unstable medical or psychological condition
- **N** (No) Documentation in the medical record for this stay does not specify that the patient’s unstable medical or psychological condition was the reason that the metabolic screening cannot be completed or unable to be determined from medical record documentation

**Notes for Abstraction:**
There must be specific documentation by the physician/APN/PA in the medical record for this stay that the patient has an enduring unstable medical or psychological condition that prevents completion of a metabolic screening.

**Suggested Data Sources:**
- Biopsychosocial assessment
- Functional skills assessment
- History and physical
- Individual plan of service
- Initial (admission) assessment form
- Physician progress notes
- Psychiatrist assessment/admission form

**Inclusion Guidelines for Abstraction:**
None

**Exclusion Guidelines for Abstraction:**
None
